Strange Facts about Water..

Water is the greatest solvent of all

A lump of sugar dissolves slowly in alcohol or gasoline, but much more rapidly in water. More substances are "soluble" in water than in any other compound. Naturally, then, waters of different localities vary greatly in mineral content.

RARE WATER BLENDS FLAVOR

The great solvent power of Olympia's rare subterranean well water is utilized to the utmost in extracting hidden flavors from the choice grains used in the brewing process. That's why we say "It's the Water" that makes Olympia so constantly pure—so mild and flavorful.
