MAGIC MEDICINE FROM NEVER-NEVER LAND

3. Active and

Passive Heat

Occur from careless or deliberate

quick cooling after one has

become overheated artificially,

say from a hot air bath or from

confinement in overheated room

or from exposure to extremely

warm weather. Abrupt cessation

of sweating in such circum-

stances is perfectly harmless.

Nothing in the sweat but salt

and water—nothing of any spe-

cial significance. No overproduc-

tion of combustion products in

muscle tissues to be removed

through the circulation. There-

fore not the slightest danger at-

tends quick cooling of the body

after passive overheating, if one

finds quick cooling refreshing or

comfortable.

QUESTIONS & ANSWERS

Phony "Doctor"

Amused by your talk about raw

eggs, I may have a surprise for

you, but Dr. — has told us that

since the coming of the x-ray we do

know that the white of egg taken

raw cannot be digested, so...

(M. W. R.)

Answer—Nothing the phony "doc-

tor" tells his credulous prospects

would astonish me. Raw egg white

is not so completely digested as coo-

ked egg white, but it is digestible

enough if you prefer raw egg to

cooked.

Phlebitis

Never any mention of phlebitis in

your column. Please write something

about this horrible malady.

(Mrs. M. C.)

Answer—I have carefully avoided

mentioning it. Why frighten people

needlessly. Phlebitis means inflama-

tion of a vein. It occurs in any case

of various vein where a leg ulcer

develops. Send stamped self-addressed

envelope for pamphlet VARICOSE

VEIN AND VARICOSE ULCER

Hay Fever

It is true that hay fever is not con-

tagious. My husband has a severe

case of it and I don't know whether

it is safe to let the children go too

close to him. (P. C.)

Answer—No. It is not communi-

cable. Send stamped self-addressed

envelope for pamphlet on Hay Fever.
