## A Nichols' Worth of— Comment On This and That

By HARMAN W. NICHOLS  
United Press Feature Writer

Washington, July 3—(U.P.)—The temperature in plants is, they say, many times cooler than that of a pavement in the sun. Plants, it is claimed, transpire and the evaporation of the moisture rising from them makes the air cooler.

All of which has me a little confused.

Boy, fetch me another Tom Collins!

**Solons Expected Ask Spy System Shake-up**

Washington, July 3—(U.P.)—The surprise red attack in Korea followed by shocking reverses is expected to bring congressional demands for a shake-up in our counter-spy system.

The surprise followed by a few days a Tokyo conference among Gen. Douglas MacArthur, Secretary of Defense Louis A. Johnson and some of his high brass. Something slipped badly when such men could sit down so near trouble and not know it.

The known facts indicate our intelligence failed in the field where the information was to be had and here at home where it should have been studied and judged for what it was worth.

Our counter-spy organization terminates at the top in a central intelligence agency. The surprise in Korea revealed the fact that there is no firm understanding about conclusions to be drawn from espionage reports once they are assembled by CIA.
