

## More Copper for Civilian Industry To Be Available

Washington—(U.P.)—The automobile industry and other civilian manufacturers who need more copper to boost production are in line for extra allotments of the scarce metal.

The Defense Production Administration said Monday night that 20,000,000 to 25,000,000 pounds of copper materials and 30,000,000 pounds of aluminum are available for reallocation during the second quarter of this year.

Some of it will go to civilian goods.

### Left as Residue

DPA officials said the copper was left as a residue when discs were stamped out of brass mill sheets to make ammunition for the armed services.

The aluminum, they said, was turned back by the military as a result of stretching out the plane production program, or was left at the mills because some civilian manufacturers did not take their full allotments.

## As We Live

By ELIZABETH MURLOCK, PH.D.

### NEW INTERESTS WILL CURE GRIEF

(Q) "I am writing for some advice about a very dear friend. He is 49 years old and has never married because he has always had the responsibility of taking care of an invalid mother and two brothers who were in poor health. They have all died now and he is grief stricken because he is all alone. He is well to do but has never had many friends or outside interests because he devoted all of his time to his family. What would you suggest that I do to help him?"

L. F.

(A) New interests are the best possible cure for a grief-stricken person. It is natural that your friend would be despondent now that the responsibilities he has carried all these years are gone.

A good son and brother, he has no reason for remorse for his own sacrifices for his family. He has done all he could do. And he should feel that it was best that they be spared further suffering.

But now, he must pick up the threads of his own life and try to live as happily as possible. This is where you can help him. Here are some suggestions that will enable him to snap

out of his grief-stricken state:

1. Urge him to move out of the family home with all its memories. If he continues to live there, every room and every article of furniture will be a constant reminder to him of the past. Advise him to sell or rent the home, put the furniture in storage, and live in a man's club, a hotel, or with relatives or friends until he knows what he wants to do.

### Will Profit Personally

2. Encourage him to take an active part in church and community affairs. As he has enough money to be able to contribute some of his time and efforts to outside activities, he will not only profit personally by developing new interests but he will also help others.

3. Introduce him to friends of yours, especially women, and see if you can't interest him in marriage. A widow with partially grown children would be ideal for him as they would bring into his life the fun and pleasure he has been denied all these years.
