TRACTION that grips loose soil

ASSURES STEADY DRAWBAR PULL

Behind the new "Caterpillar" Diesel Do keep 13 grouser in soil-gripping position. That adds up to a total of 6 square feet of grouser surface constantly brooding this tractor's weight against the soil. And each broad track keeps 9 1/2 square feet of shoe surface on the soil.

Both tracks thus provide a total of 19 square feet of over-pressure, plant-like support to give a grouser and shoe combination that means positive traction.
