

Planting 230,000 Seedlings Started In National Forest

Planting of 230,000 seedling trees on logged-over areas of the Rogue River National forest was started this week, according to Forest Supervisor J. H. Wood. Planting has been delayed this year by the heavy snow pack, and crews are working against the snow line in several locations, Wood said.

Species to be planted include Ponderosa pine at low elevations and in dry areas, Douglas fir on moist slopes, and Shasta red fir at high elevations. Sugar pine and western white pine will be planted on areas protected from white pine blister rust. Experimental plantings will be made with Jeffrey pine and Cork Bark fir.

Types of Cut

Old growth timber on the national forests is cut selectively and by the clear-cut method, depending upon conditions and requirements on the ground. Slash is burned after logging, to reduce the fire hazard. Planting is done after slash burning is accomplished.

Tree planting is practiced on cut-over areas to supplement natural regrowth. Planting minimizes brush competition, protects the soil and water, and contributes to early establishment of a new forest.

Sale Receipts Pay

Timber sale receipts pay a large share of tree planting costs, Wood stated, and additional funds are appropriated by congress.

The Rogue River forest annual planting program includes about 1,000 acres and 800,000 seedlings. Planting is done in the spring and fall each year.

Smorgasbord Dinner Planned Saturday

Cruisers class of First Presbyterian church will hold a smorgasbord dinner on Saturday from 5 to 8 p. m. in the church social hall. Mrs. Ed Pathman is chairman. The public is invited. Purpose of the dinner is to raise funds for tile flooring in the new addition of the church. There will be a special price for children under 12 years of age.

Four New Fish Species Added at Smithsonian

Washington—(U.P.)—Four new species of fish, including a "porcupine-type" ray, have been added to the collection of the Smithsonian Institution.

The fish were collected by the U. S. Fish and Wildlife Service. They were found during shrimp investigations in the Gulf of Mexico last year.

The feature find of the newly acquired specimens was a skate, or ray, which has been given the scientific name of *Raja lentiginosa*. The fish is approximately a foot long and resembles a cactus plant. Its body is almost covered with thorns in rows of 30 or more to a row.

Men's Clothes Fashions Reflect World Unrest

Chicago—(U.P.)—A clothing expert says men's fashions reflect world unrest.

Bernard Epstein of New York told the National Association of Retail Clothiers and Furnishers here that men turn to color and pattern in troubled times.

"The jazz suit and all-stripe suit were born in the World War I period," he said. "World War II saw the birth of hand painted ties and colorful sportswear."

Epstein said the trend is toward sports clothes.

"Last year more than 55 per cent of men's cut and sewn shirts were sports shirts," he said.

NEW FIRE TOOL—Cecil Cunningham, assistant forester at Weyerhaeuser Timber company's Springfield branch demonstrates powersaw converted to portable fire engine for fighting forest fires. Council foresters at Springfield invented coupling and mounting for attaching auxiliary fire-engine pump to a powersaw motor. A logger can remove the sawbar from his powersaw motor and attach the fire pump in 90 seconds.

Science at Work

New York—(U.P.)—One type of baldness may be conquered through use of the hormone drug cortisone.

The drug, a product of the adrenal glands and which already has brought sensational results in the treatment of arthritis, will not be prescribed for the ordinary baldness, such as comes with middle age, according to Drs. Stephen Rothman and Dr. Calvin J. Dillaha, Chicago dermatologists.

It has been of value, however, in the treatment of forms of baldness known technically as alopecia areata and alopecia totalis. The forms of baldness attack both sexes with about equal frequency and may appear in childhood as well.

Spontaneous Cures

The doctors, reporting in the Journal of Investigative Dermatology, said that some cases may be cured spontaneously, particularly if the first attack does not occur before the age of 11 or 12. Relapses, however, are frequent. The condition causes the hair on the scalp to fall out in patches, or it may fall out completely. All the body hair may also disappear.

The doctors used cortisone after making studies which indicated that the condition may be caused by an action of the body hormones.

Patients Suffered

The doctors said all of the patients treated had been ill with the disease for periods of five or more years. The condition is not rare, they said, and estimates

show that some two and a half per cent of patients visiting a large dermatological clinic show symptoms of the ailment.

The drug was given for a period of four weeks and it was found that three out of four patients showed regrowth of hair. The drug was given in tablet form.

North California: Fair Friday and Saturday except increasing coastal fog; cloudy extreme north.

LEGAL NOTICES

RESOLUTION NO. 773
A RESOLUTION proposing to permit adjacent property to use a water main as a lateral water main; to levy an assessment on the property fronting on the street wherein said water main is laid; setting a time and place for protests thereto and providing for notice thereof.

WHEREAS the City of Medford has heretofore caused a water main in the City of Medford to be laid on West Jackson Street from Western Avenue, 410 feet East and the Council being of the opinion that said water main may be used by the property fronting on that portion of said main on West Jackson Street from Western Avenue, 410 feet East in the City of Medford, Oregon, and

WHEREAS said water main has not, as yet, been paid for and it appearing to the Council that the use of said water main as a lateral water main by said property last above mentioned will not materially interfere with the use thereof for the purpose for which it was originally laid, now therefore,

BE IT RESOLVED BY THE COUNCIL OF THE CITY OF MEDFORD, OREGON:

Section 1: That it is the opinion of the Council that that part of the aforementioned water main laid in the City of Medford described as follows, to-wit:

As laid on West Jackson Street from Western Avenue, 410 feet East in

the City of Medford, Oregon.

May be used by the property fronting thereon as a lateral water main without materially interfering with the use thereof for the purpose of a water main, the purpose for which it was originally laid, and the Council proposes to permit the owners of adjacent property to use the same for lateral purposes as aforesaid.

Section 2: It is the intention of the Council to assess the property fronting on the street wherein said water main is laid as hereinbefore last described its proportionate share of so much of the cost thereof as equals the special benefit which will result to said property from the use of said water main as a lateral water main of such size as would be required to supply the property fronting on said street in case said water main was not so used and the Council has and does hereby determine that the sum of \$2.00 per front foot is the amount of such special benefit and the proportionate cost of such a lateral water main to such property as aforesaid and intends to assess said amount against such adjacent property on account thereof.

Section 3: The Council will meet at the hour of 7:30 o'clock p.m., at the Council Chamber in the City Hall on the 6th day of May 1952, at which time and place all protests of said assessment as hereinbefore provided for, will be heard.

Section 4: The Recorder is hereby directed to serve notice hereof upon the property owners aforesaid by publishing this resolution 3 times in a newspaper published and of general circulation in said city and by posting the same in 3 public places in said city; said publication and said posting to be not less than 10 days before the date of said meeting.

Passed by the Council and signed by me in authentication of its passage this 15th day of April, 1952.
