The car that wears its own Sun Glasses

YOU may have to look twice to see it—but a lot of the new Buicks have a soft blue-green tone in all glass areas—plus a slightly darker band which shades down from the top of the windshield. And you have no idea what comfort all this adds to hot-weather driving. Its name is "Easy-Eye Glass"—which tells only half the story. While it filters out 18% of the glare (and tones down the dazzle of oncoming headlights at night)—it also cuts down sun-heat as much as 50%. So it's the best cure we know for hot laps in summer driving, when the sun beats down on the windshield.

Maybe you'd like to try this out before you buy your next car. And while you're trying it out—you can also discover how it feels to boss around a Fireball 8 Engine, that puts its own exclusive added wallop into a high-compression valve-in-head power plant. You can sample the sure-footed way a Buick settles into a curve—the way the front wheels seem to seek their course automatically—the smooth surge and falterless ease with which Dynaflo Drive* feeds the power—the level confidence of Buick's million dollar ride. You can get an idea also of the room, the comfort, the smartness, the thrill

that your dollars buy in this brilliant performer. So why not arrange for a demonstration soon? Equipment, accessories, trim and models are subject to change without notice. Wheel Covers standard on Roadmaster, optional at extra cost on other Series. *Optional at extra cost—available on most models. *Standard on Roadmaster, optional at extra cost on other Series. **Sure is true for '52** When better automobiles are built **BUICK** will build them
