Now you Know!

The answers to everyday insurance problems*
By Reese Alexander
Insurance Counselor

QUESTION: I understand there is a form of automobile fire and theft insurance which specifically states the amount of insurance rather than given as "actual cash value at the time of loss." Why isn't the specific value policy a better one for the average person to buy? At least you'd know exactly what you'd get in case of loss.

ANSWER: No matter what amount is stated in the policy, the insurance company will not settle for more than the actual cash value at the time of loss. No settlement will be made in such a way as to give the insured a profit from an accident or other kind of loss.

*If you'll address your own insurance questions to this office, we'll try to give you the correct answers and there will be no charge or obligation of any kind.
