## Jacksonville Man Hurt in Accident

William N. Fraser, 22, of 102 C Street, Jacksonville, was reported to be in "poor" condition at Community hospital this morning following a car-motorcycle accident last night at the entrance to the Jackson county fairgrounds.

Fraser was injured at about 9:30 p. m. when the motorcycle he was riding collided with a car driven by William E. Kennedy, 711 Waverly avenue, according to state police. Attending physicians said Fraser suffered a "serious head injury" in the accident. He was taken to the hospital by Conger Morris ambulance.

According to investigating officers, Fraser's motorcycle apparently ran broadside into the Kennedy car as it turned into the fairgrounds. Kennedy and three passengers in the car were not injured, police reported.

**SCHOOL DAMAGED**  
Portland—(UPI)—Damage was estimated Tuesday at \$10,000 from a fire which swept three stories up a waste paper chute, damaging four rooms in Jefferson High School.

*What's that?*

... you mean I must pay the same price for milk I carry home myself?

*Yes*

Oregon Milk Control compels stores to charge as much for cash-and-carry milk as you pay for home delivery—a requirement in which Oregon stands almost alone among the 48 states.

Among cities of Portland's size or larger, 92% have lower prices for milk bought in stores, with an average saving of 1 1/4 cents a quart. Portland is the only such city west of the Mississippi where store and delivered prices are the same. The six cities where store customers save most are:

|                  |        |             |        |
|------------------|--------|-------------|--------|
| New York City    | 4 1/2c | Detroit     | 2 3/4c |
| Minneapolis      | 4c     | Chicago     | 2 1/2c |
| Washington, D.C. | 3c     | Kansas City | 2 3/4c |

(U.S. Dept. of Agriculture, May, 1952)

Oregon Milk Control has not permitted the consumer to benefit from such savings made possible by efficient distribution.

Lower store prices are possible in Portland, too. This fact was disclosed by Oregon State College's two investigations of distributing and retailing costs for the Milk Control authorities published in 1951 and 1952. These cost studies show:

1. Milk could have been profitably priced an average of two cents lower by half the stores surveyed (most of them independent stores) when supplied by half the wholesalers studied.

2. A four cent saving could actually have been passed on to consumers by Portland's most efficient independent store, supplied by Portland's most efficient wholesaler.

**SHOP SAFEWAY . . . FOR FINE FOODS AT EVERYDAY LOW PRICES**

The questions and answers below show some other ways in which Oregon Milk Control affects YOU

- Q. Does Milk Control limit the richness of milk?  
A. Yes. The richness (butterfat content) of milk sold in each price range is limited by the rulings of the Milk Administrator.
- Q. Does Milk Control set the price you must pay?  
A. Yes. That is the purpose for which the law was designed. It sets floor prices, not ceiling prices.
- Q. Does Milk Control discourage competitive distribution of milk?  
A. Yes. No one can enter the milk business if the Administrator says such new competition might disturb existing distributors.
- Q. Does the Oregon Milk Control Law regulate sanitary conditions?  
A. No. It has absolutely nothing to do with the sanitation, health inspection, cleanliness, or the purity of milk.
- Q. Does Milk Control limit the supply of Grade A milk?  
A. Yes. To sell Grade A milk for your use a farmer must first get permission from the Administrator. If he gets permission (and many do not), he is given a quota. If he produces more he must often sell the surplus at a lower price for cheese or other factory uses.
