FIERY DEATH TRAIL—A private plane (arrow) leaves a trail of burned houses and scattered wreckage after crashing in residential section in El Segundo, Calif. Four persons aboard the four-place plane were killed. The plane dove into the house in right foreground in early morning fog and also set fire to adjoining house. Neighbors of owners of the damaged homes received minor burns as they fought the flames with garden hoses.

"HELP A CRIPPLED CHILD TO WALK"

Your Health and Its Care

By DR. WILLIAM BRADY, M.D.
Readers should address inquiries to: William Brady,
265 El Camino, Beverly Hills, Cal.

WHICH KIND OF SUGAR?

It is not just by chance that babies today are more vigorous, have lower mortality rate, are more likely to survive the perils of childhood, grow and develop faster and are happier than babies when you and I were babies.

Dr. Brady

For one thing, doctors, nurses, neighborhood saireygams and parents no longer make a practice of plying infants with opium, in the form of laudanum, paregoric, soothing syrup, colic cure or cough mixture.

Nowadays intelligent people give babies a fresh air in the form of cleanliness, fresh air, light, comfortable clothing and bed-covers or none, as weather and common sense dictate, pure wholesome food and protection against unsolicited advice by interfering relatives.

Although some people remain unconvinced that it would be advisable or even proper to instruct boys and girls in the care and feeding of infants, I predict that this will eventually become a prerequisite for entrance into high school.

The newer knowledge of nutrition, acquired since Topsy was a colt and her driver an honest (99.44 per cent) doctor in Penn Yan, enables us to prevent manifestations of deficiency diseases—conditions which formerly made many babies unhappy and still do handicap underprivileged children. I use that detestable word, "underprivileged," not in the snobbish sense Lady Bountiful and the lunch club boys do, but as meaning just one thing, that the parents of these unhappy babies lack intelligence or common sense. They pay more than 60 cents a pound for fancy sugar prescribed by a trick pediatricist, although no reputable physician or nutrition authority has shown or even dare claim it is in any way superior to ordinary cane or beet sugar in infant feeding or in the diet of invalids or healthy persons.

Theoretically lactose, the sugar naturally present in milk, should be preferred for infant feeding. It was commonly used for the purpose in the era of mathematical formula feeding.

Some investigators today believe milk sugar makes more utilizable the calcium which has been assimilated from food. Whether this is so or not, milk sugar costs more than pure cane sugar or beet sugar and physicians who prescribe it in preference to cane sugar or beet sugar do so principally because it is not so sweet as cane sugar and therefore does not accustom the baby to sweet foods.

One kind of sugar is as easily digested as another and yields the same number of calories. The sugar of milk represents about one-half the caloric value of milk and sugar of one kind or another should supply one-half of the caloric requirements of the baby.

MOO-O-OS and MUSINGS

We have asked our own geologist to make a study of the Roxy Ann volcanic situation and we are certainly sleeping better since we got his report.

According to him, the mountain is absolutely loaded but there isn't a thing to worry about because it can't possibly go off before next Wednesday, when we plan to be out of town.

Korean Reds Charge Prisoners Are Spying
Tokyo, Sunday — (U.P.) — The Communists accused the United Nations today of parachuting Red prisoners into North Korea to act as spies.
The Reds made the accusation in a brief meeting of liaison officers before a 12 minute secret session of the truce delegates at Panmunjom.
Communist liaison officers handed their UN counterparts a letter addressed to Maj. Gen. William K. Harrison from the Communist chief negotiator, North Korean Gen. Nam Il. Nam told the UN senior delegate that Red prisoners were forced "to

act as your special agents" after being dropped by parachute into North Korea.

The brief session of the truce delegates — shortest since the current secret sessions began — caused a further slump in hopes that the secret talks were making progress.
After the meeting, UN officers announced only that the delegates would return to the truce tent for another secret session Monday.

Dead line Sunday Classifieds is at 5:30 p.m. for following day; 10 a.m. Monday for Monday; noon Saturday for Sunday a.m.
