## Sewage Problems Again Discussed By Phoenix Council

Phoenix—Further report was made at Monday's Phoenix council meeting on proposed sewage construction, according to Mayor Kathryn Stancliffe.

City Attorney Frank VanDyke reported on a Salem meeting with state sanitation authorities regarding state aid for the project. He cautioned against hasty action and Mrs. Stancliffe noted that a "great deal of preliminary work is to be done before a plan is initiated."

An ordinance was ordered drawn up to close a small portion of Second st. from "B" st. to the irrigation ditch, near the grade school gym. The school district had requested the closure as it has purchased the former Steadman property adjoining the street.

The new school building is planned for the area, she said. Police Chief Jim Perry requested a bicycle rack to be erected in town and the council directed Perry and Councilman H. R. Jensen to carry the project out.

A report was made on the remodeling of the city hall and library. An interior partition in the library room will be removed and the oil stove taken out and replaced with electric heat, the mayor said, before painting starts.

Electricians worked all last week in the installation of the electrical wiring for the new pump for the well's siphoning system and installation of the pump began today and will continue tomorrow. All irrigation has been ordered stopped for the two days of installation, Mrs. Stancliffe said, and it is hoped that the new pump will keep the city's reservoir full enough to avoid restricted use.

## Frozen Orange Juice To Mount in Price

Washington — (U.P.) — An agriculture Department official said the price of frozen orange juice is going up because Americans are drinking it faster than it can be processed.

He estimated yesterday that household purchases alone are currently running at a rate of about 55,000,000 gallons a year, and that doesn't count the large volume used by hotels and restaurants.

The department estimates that total output of frozen orange juice concentrate this year at about 50,500,000 gallons.

The official said there is no immediate danger of an orange juice shortage because producers can draw on their cold storage stocks. Built up in past years when the demand wasn't so great, these stocks totalled about 23,242,000 gallons at the end of June.

## Gen. Clark Planning To Retire Oct. 31

Washington — (U.P.) — Gen. Mark W. Clark, Far East commander, announced today that he plans to retire from the Army next Oct. 31 after 40 years service.

Clark made the announcement at a news conference here where he has been holding conferences prior to returning to his headquarters in Tokyo.

He said he hoped his successor would be designated in time for "an orderly turnover" in command so that he could return to the United States in September.

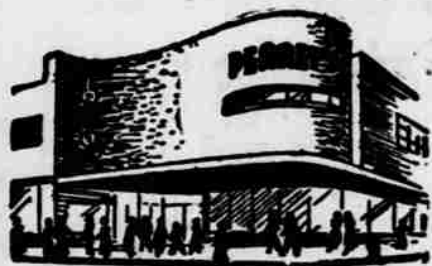

## Repatriated Soldiers Air Lifted to Japan

Tokyo — (U.P.) — Sixteen American repatriates were air lifted to Japan today from Korea.

Also aboard the C-124 Globemaster were 12 Filipinos, 7 Colombians, 20 Turks, seven French, one Greek and one Belgian returned prisoners.

The Americans brought to Tokyo included:

Marine Pfc. Alfred Graham Jr., Seattle, and Pfc. Samuel E. Banuelos, Fresno, Calif.
