

Talent Project Plan Progress Reported; Land Data is Sought

Progress on the final planning of the Talent project has now reached the point where the Bureau of Reclamation must have information regarding lands adjacent to the Talent Irrigation district, according to district officials.

Information as to the actual number of acres of new lands within reach of the district's canals but not now getting water, is being sought. Forms are provided on Page 6 of today's Mail Tribune on which prospective irrigators can indicate their wishes for inclusion of the presently dry lands within the new system.

Reports on Work

In a report on other phases of the project, John Hatch, office engineer for the bureau at Medford, reported that a three-man survey party is now working in the area of the south fork of Little Butte creek and Big Draw creek where the Howard prairie reservoir collection canal is to be situated.

A five-member diamond drill crew is working on the Howard damsite in two shifts, he continued. They are investigating foundation locations.

Hatch reminded residents that the bureau is now engaged only in making plans for the Talent project. Appropriations for any actual work must be approved at the next session of congress. He said that no change in the present office facilities will be made until construction appropriations are made.

Dam Repairs Due
Hatch, who is also engineer on the Savage Rapids dam repair job, reported that repairs are expected to be completed before winter at the dam. Present work includes repairing the sluiceway floor, he added. "If the good weather holds up, the work should be done in about a week," he added.

Dam rehabilitation is under contract to the Young and Smith Construction company, Salt Lake City. They began the project a year ago last spring, but worked only during certain seasons. Work was also delayed when two dirt coffer dams were washed out by high water.

The first doctor of philosophy degree was awarded by Yale university in 1861. In 1892 women were admitted to Yale as doctor degree candidates in the field of the philosophies.

City Superintendent Tells Chamber Men About Traffic Study

City Supt. Robert Duff reported on the recently-completed State Highway department survey of Medford traffic problems at Friday's meeting of the Jackson County Chamber of Commerce board of directors.

He explained the highlights of the survey, including the arterial street grid and Bear Creek freeway, and also discussed off-street parking. Vernon Thorpe, director of public works, is preparing a parking study which will be done within the next 60 days.

Chamber directors expressed their approval of the survey and related the initial effort about four years ago by the Chamber to obtain such a survey to aid in the orderly development of the city. President Walter Garner pointed out that such projects take time and continued work.

Duff told the group that the "unless something is done with the survey, it will be just another report to hit the desk."

He added that there are now certain funds available to install some of the traffic signals recommended by the survey.

The directors, in other business, approved rental of the new animated technicolor film, "It's Everybody's Business," for two months. The film was shown at the meeting and explains how the American business system works. It is recommended by the U. S. Chamber of Commerce for schools, social, business and community organizations.

Groups desiring to use it should contact Don McNeill, manager of the local Chamber.

SCOUTS PLANT TREES

Oakridge, Ore. — (U.P.) — Between 200 and 300 Boy Scouts and their parents from the Oregon Trail Area Council gathered here Saturday for the second annual tree-planting day sponsored by the local Chamber of Commerce. Some 71 acres of land, located 25 miles east of Eugene, will be planted.

County's Polling Places Are Listed

The polling places in Jackson county's 94 precincts are listed below. The general election is next Tuesday.

Any registered voter who is unsure in which precinct he lives, has been asked to call the county clerk's office to find out in advance of the election.

Following is a complete list of the precincts by number and name, and the location of the poll in each:

BUY THE LOW WAY ON THE HIGHWAY, BEAT THOSE DOWN TOWN PRICES!

THE ANSWER TO A POLITICAL LIE!

Opponents of Senator Richard L. Neuberger have bought expensive advertising and handbills to publish a charge of interest to the people of Klamath Falls and Klamath County.

They have charged that in 1951 Senator Neuberger voted against House Bill 661, which sought to protect the water of our rivers against possible diversion to California.

THIS CHARGE IS AN OUTRIGHT LIE!

The official record proves that Senator Neuberger voted in favor of House Bill 661.

When HB 661 was first introduced, Senator Neuberger pointed out certain fatal weaknesses in the bill. HB 661 was then sent to the Committee on Law, which reported out a revised bill.

This is the official Record of Proceedings in the Senate:

SENATE JOURNAL, 1951, page 249:
HB 661—Read third time. On passage of bill the vote was: Yes 25; No 1 (Belton)... Bill passed.

SENATE JOURNAL, 1951, page 284:
HB 661—Coming on for repassage (after consideration in the House). On repassage of bill the vote was: Yes 29; No 0; Absent 1 (Musa). Bill repassed and title of bill stood as title of act.

Both times that HB 661 came to a vote in the Senate, Senate Richard L. Neuberger voted for passage of HB 661!

THAT IS THE PUBLIC RECORD!

- ☆ Why are Senator Neuberger's opponents lying to the voters?
- ☆ Why must we be forced to set the record straight?
- ☆ Why is the Old-Guard trying to divert you from the real issues at stake in this election?

Is Cordon's Reactionary Record the Answer?

DON'T TAKE YOUR EYE OFF THE BALL! THINK BEFORE YOU VOTE!

VOTE FOR RICHARD L. NEUBERGER FOR UNITED STATES SENATOR!

(Paid Political Adv. Jackson County Neuberger for Senator Committee.)
