Experiments Prove Superior Durability Of All-Cotton Damask

All-cotton table damasks are much more durable than those made of cotton and rayon mixtures, the U. S. Department of Agriculture reports.

Cotton's superior durability was found in tests made at the Oklahoma Experiment Station. Cotton table damasks showed no fraying of hems after 75 launderings, but some cotton-rayon damasks frayed after only a few washings.

The researchers tested ten all-cotton and ten cotton-rayon table damasks. One set of these was used and laundered in homes over a period of two years, and another set was tested in the laboratory.

Ethel Says:

Marie Earle's Aralinn is a special formula of a unique blend of astringents and oils. It is rich in the substances which will give your skin a fresh, youthful appearance—a quality it tends to lose with lack of time and attention. Aralinn gets to the very heart of your problem, helping to wear away puffiness and to correct and firm the contours of the face and neck. Not only does it clear and brighten the skin, giving it a fresh transparent quality, it imparts a tingling aliveness to the sleepy muscles being treated.

Use as a night treatment after a thorough cleansing with cream and skin freshener. Before make-up apply as directed and follow with Almond Lotion. Your make-up will go on beautifully and stay on for hours.
