## Speaker Discusses Gifted Children

The problem of educating the gifted child was discussed at a meeting of Jackson County Classroom Teachers held at the Jacksonville school January 17. Speaker was Dr. Phyllis Plichta, member of the faculty of Southern Oregon college. Dr. Plichta emphasized that there is no one solution to the problem of educating gifted children, and said that many different methods must be used in order that gifted children may be developed to the highest possible degree.

Mrs. Orva Taylor, president of the group, conducted a business meeting.

The teachers were served dinner, and then toured the new grade school building in Jacksonville before the program and business session.

## Parent-Teacher Unit Hears Talk

Central Point—"Better Communities" was the theme of the January meeting of Crater Parent-Teacher association.

Dr. Alvin Roberts, speaker for the evening, stated that "A better community is one that offers a pleasant environment to live in and in which to raise a family." He added that a better community should provide opportunity for both recreation and work.

"A better community doesn't just happen," the speaker declared. "It has to be built by the work, far-sightedness, sacrifice and planning for the future of civic-minded people who believe that a better community builds better citizens."

He concluded by saying that "It is a privilege for us who live in this country to guide our children to be better citizens, to live in and work for better communities."

The physical education department, under the direction of Ed Knapp, gave an exhibition of tumbling. Jim Welch demonstrated some of the work taught on the trampoline.

Parents of sophomores were hosts for a coffee hour.

J. Wayne Green, eminent trichologist, demonstrates cause of baldness and how it can be prevented.

## How To Have Hair For A Lifetime To Be Demonstrated Here By Famous Trichologist OFFERS WRITTEN GUARANTEE

An exclusive interview by Steven Bright  
Wichita (Special) — J. Wayne Green, Director of Rogers, Inc., Hair and Scalp Specialists, exploded the "myth of baldness" today in an exclusive interview. "Baldness is unnecessary, costly, and a plague to mankind," says Green. "No man need be bald. No man need suffer the stigma of premature old age that is forced upon him because he is losing his hair. The Rogers method of hair and scalp treatment can turn colorless fuzz into healthy, growing hair—can make you look youthful again."

Demonstration To Be Held in Medford, Oregon  
This revolutionary method of home treatment for the hair and scalp will be demonstrated in Medford, Oregon, Sunday ONLY, January 30 at the Medford Hotel. Trichologist Kenneth Harris will conduct the private, individual interviews from 12 noon until 9:00 p. m. on Sunday ONLY. There is no cost or obligation, and you need no appointment.

Reason For Baldness  
"There is always a reason for baldness," continued this nationally known authority. "Hair cannot grow through a scalp that is infected with dandruff, excessive oiliness, or extreme dryness. A scalp that has never been exercised cannot be expected to produce healthy hair." Men, and yes, women too, walk the streets today, completely devoid of nature's greatest ornament—hair. Simply because they were not taught the basic rules of hair and scalp hygiene while they were growing up. "The simple answer," emphasized the expert, "is that children should be taught the same simple basic rules of hair and scalp hygiene that they are taught for the proper care of their teeth. If this were the case, baldness would be a rarity today!"

Heredity Not Involved  
Trichologist Green dodged no issues. He quickly took up the most widely spread theory of baldness—heredity. "Mankind's unrealistic belief that baldness is hereditary stems from a mis-

interpretation of the theory of genetics. Theory does not state that any person must be bald because baldness exists in the family. What it does say, is that in some families, a tendency exists towards an undernourished scalp." The purpose of the Rogers Hair and Scalp Clinic is to teach the methods of strengthening the weak scalp and nourishing it to a healthy, vigorous condition. "A healthy scalp will grow hair if it is not already completely bald," assures Green. Is There Hope For The Completely Bald?  
In his travels throughout the United States and Canada, Green has collected hundreds of testimonials of his ability to develop weak fuzz into healthy, mature hair. All of his clients have started with a private examination, hair and scalp analysis, and a diagnosis of the disorder. Green is quick, however cannot be helped. "We strongly advise," says Green, "that no person who is completely bald hold any hope whatsoever of regrowing hair. If there is any fuzz at all, we can restore a healthy scalp condition and the hair will grow normally again as nature intended."

Offers A Guarantee  
"Rogers, Inc., America's Foremost Hair and Scalp Specialists, offer a guarantee to any client who enrolls for treatment. If he or she is not completely delighted with results at the end of 30 days, the money invested will be graciously refunded," pledged Green. "We must have satisfied clients. "We must regrow hair. After all, it is our best advertisement."

Is Your Hair Healthy?  
If you have a scalp disorder, or if you are worried about your hair, call Trichologist Kenneth Harris at the Medford Hotel in Medford, Oregon, Sunday ONLY from 12 noon to 9:00 p. m. The public is invited. The examinations are private and open to men and women. You do not need an appointment, and you will not be embarrassed or obligated in any way. Paid Adv.
