Buick—Best Seller in the West!
In the Pacific Coast area, where "hardtops" hit a new high in popularity, the Buick Wildcat for outsells all others, bar none!

There's a new zip to Dynaflow*

— and better gas mileage to boot!

This is something you really ought to try.

Even though you may be familiar with earlier versions of Dynaflow Drive—either from personal experience or from hearsay—you owe it to yourself to press the pedal of a 1955 Buick with Variable Pitch Dynaflow. Just as simple as ever to operate—easier, in fact, with the new positioning of the lever. Just as smooth as ever, with nary a lag, halt or hesitation throughout the speed range.

But brother!—hang on to your hat when you call for action! Because that's what you get, instantly.

Because twenty power blades inside the very heart of this wondrous automatic transmission switch their pitch for getaway performance—much like the airplane's propeller is angled for take-off.

It's as simple as that—but far more thrilling than words can tell.

And it's a big boon to your gasoline money, too. For, just as the plane's propeller changes

pitch aloft for greater fuel efficiency in cruising, so the Dynaflow "propellers" change pitch to deliver a lot more miles per gallon in normal driving and cruising.

Come in and try it—this week. You'll find it harnessed to the highest V8 horsepower in Buick history—and housed in the bold new styling that says Buick and nothing but.

*Dynaflow Drive is standard on Roadmaster, optional at extra cost on other Buicks.
