End of Controls on Natural Gas Urged

Washington (U.P.)—President Eisenhower's cabinet committee on fuels, in a move that may affect 30,000,000 consumers, has recommended removal of all federal control over natural gas before it enters interstate pipelines.

The committee also urged that limits be placed on foreign oil imports to help the domestic petroleum industry and to aid the competitively-sick coal industry. For the immediate relief of coal, it urged freight rate adjustments.

It also proposed a subsidy for coal exports to offset higher shipping costs which result from the requirement that 50

per cent of all foreign aid shipments be carried in American vessels.

WRONG ADDRESS
Los Angeles (U.P.)—Pete J. Perich failed to take his address seriously. Perich, yesterday received a one-year term for misdemeanor drunk driving, lived at 635 Aqua Pura drive.

Washington (U.P.)—President Eisenhower has put off indefinitely any consideration of inviting Marshal Georgi Zhukov, new Soviet Defense Minister, to visit the United States.

Dead line Sunday Classified is at noon Saturday; 10 a.m. Monday for Monday; other days 5:30 previous day.

Your Health and Its Care

By DR. WILLIAM BRADY, M.D.

Readers should address inquiries to: William Brady, 263 El Camino, Beverly Hills, Calif.

THE DAMP BASEMENT OBSESSION

In the spring the daily mail seldom fails to bring a few queries from the people who are worried about the damp basement or the effects of living, working or playing on concrete, tile or asphalt floors.

Dr. Brady

Let's in-correctible fuss budgets complain of my constant harping I had better say nothing about the belief of physicians and laymen a hundred years ago that malaria was due to noxious effluvia or miasma in the air, especially in night air near a swamp, and pneumonia was due to change of weather, drafts, wet feet, insufficient clothing and the like—you see, the plasmodium (parasite) of malaria was not discovered until 1880 and the pneumococcus (pneumonia germ) not until 1880.

It was after physicians had learned about these specific causes of disease and particularly pneumonia that the resourceful practitioners conjured up the "lowered resistance" theory, which has kept everybody so confused that a smart doctor can hedge on the diagnosis in any circumstance.

Not that I enjoy discomfort from cold or dampness. I merely contend that such discomfort has nothing to do with susceptibility to or immunity to any known disease or ailment. I contend that no one has educated scientific evidence that cold drafts, wet feet, insufficient clothing, change of weather, sudden chilling after being overheated or any other everyday discomfort "lowers resistance" to respiratory infections, rheumatic fever (streptococcal septicemia), inflammatory rheumatism, or infantile paralysis.

For that matter, no one has proved and, I can safely say, no medical authority will attempt to prove that "lowered resistance" or "maintaining resistance" is anything more than sheer hokum. Mind you, now, sophomores, we're talking about hypothetical or imaginary "resistance." Please do not babble about immunity, which is specific and sometime measurable (Schick test for immunity to diphtheria) and confusable (immunity to typhoid fever, diphtheria, smallpox, tetanus and in the near future, let us hope, to infantile paralysis with Salk's vaccine). The childish fancy of "resistance" applies to nothing in particular and everything if you are not particular.

As long as the medical profession clings to nineteenth century theories about the cri (common respiratory infections), malaria and the rheumatiz, probably basement apartments will be unpopular. As a matter of fact

We respect the Cracker Jack Company for their premium program to bring better things within the reach of us ordinary folks.

Answer—No. For the pamphlet STAGE FRIGHT AND EXAMINATION JITTERS send stamped, self-addressed envelope. If you do not name the pamphlet I will not know what you want.
Noises, Sounds and Ringing
I think you mentioned that you have a pamphlet on head noises.

Now Many Wear FALSE TEETH

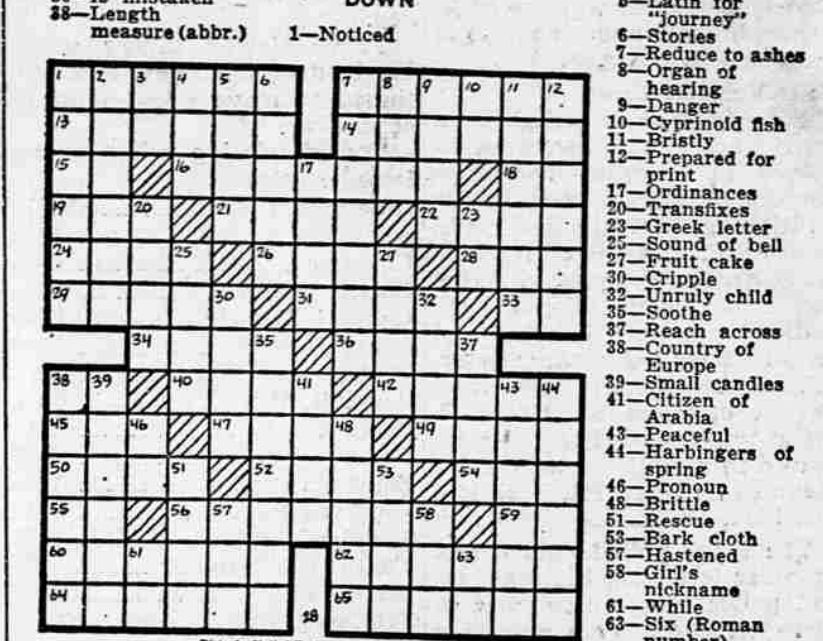

With Little Worry

Eat, talk, laugh or sneeze without fear of insecure false teeth dropping, slipping or wobbling. FASTEETH holds plates firmer and more comfortably. This pleasant powder has no stummy, gooey, pasty taste or feeling. Doesn't cause nausea. It's alkaline (non-acid). Checks "plate odor" (denture breath). Get FASTEETH at any drug counter.
