Advertising helped make the difference

AN EXCITING VIEW of the Grand Canyon was the high spot of the evening with an old-fashioned stereopticon. Today, the scene from our living room has been widened enormously. The whole world is on display. The magic of radio and television brings news and entertainment to millions of Americans.

But to mass produce millions of radios and television sets, manufacturers must be able to sell them by the millions. Only by advertising can a manufacturer talk to millions of people at the same time.

ADVERTISING TELLS the story of newer radios and television sets . . . and helps sell them. The more it sells, the more must be made — keeping the production lines and the jobs going. The result: newer, better sets at prices more people can afford to pay. Advertising helped make the difference — in radio and television, and in our American way of life.
