Junior Stamp Club Announces Topic; Republics Studied

The YMCA Junior Stamp club will study Guatemala at the meeting to be held Saturday, March 19, from 2 until 4 p.m. Visitors are always welcome to visit the club, and if interested may join, the director states.

At the last meeting of the club the members studied the countries of Haiti and the Dominican Republic on the island of Hispaniola. The first European settlement there was built from the timbers of the wrecked Santa Maria, Columbus' ship. The first permanent settlement was started there a year later by his brother.

Haiti was the second independent nation in the new world the United States being the first. Haiti is also the only French speaking republic in the new world. Based on a Negro aristocracy, Haiti was freed from French rule by the revolt of the thousands of slaves, led by Toussaint L'Ouverture, Jean Jacques Dessalines, and Henri Christophe. All of these were born in slavery but rose to become a ruler in the island for varying lengths of time. Toussaint died in a French prison; Dessalines was shot and killed from ambush by Christophe, who then proclaimed himself Henri I. He ruled until his cruelty and greed caused a revolution in 1820, and then he shot and killed himself with a silver bullet.

In 1916 the United States landed Marines in Haiti to prevent damage to American property. The U.S. helped straighten out the finances of the country and finally left in 1934. Haiti joined the Allies in World War II, and now does most of her trading with the U.S.

The Dominican Republic history is similar to that of Haiti, and it is now ruled by Trujillo.

As We Live

How To Get Sloppy Romeo To Change His Habits

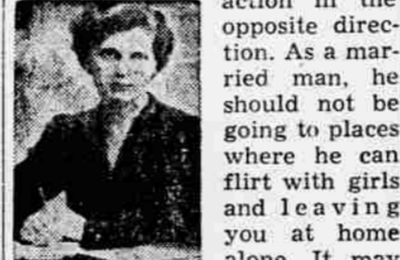

Some people feel that they can be as careless about their appearance as they please at home. This is certainly not pleasant to live with, as the woman who wrote the following letter is discovering. She said:

"My husband likes to think that he is a Romeo. He is always bragging about the way the girls fall for him. Now, I wouldn't mind this too much as I know he is imagining a lot of it. What I do object to is his slovenliness in the house. He comes home from work, doesn't bother to wash up or change his clothes, and sometimes won't even take a bath for a week. In summer, he sometimes smells so that I hate to go near him and it makes me sick at my stomach to eat at the same table with him.

"But, when he is going out where he may see some girls, does he fix himself! He is neat as a pin, smells like a perfume shop, and you wouldn't know he was the same man. As his wife, I feel that I should be given a chance to see him neat and clean once in a while, too. How can I get him to change his slovenly habits?"

(A) You are being very indulgent toward your husband and now is the time to take some action in the opposite direction. As a married man, he should not be going to places where he can flirt with girls and leaving you at home alone. It may flatter him and inflate his ego to have girls fall in love with him, but you can be sure that this does not happen without some effort on his part. Why not insist that he take

Instead of cheese, home economists suggest stuffing celery with chopped chicken, ham or smoked turkey, using savory pate as a binder. It's different, and it's delicious.

Study Home Economics For Husband, Career

Chicago — (U.P.) — If a girl wants to go to college to get a degree, a husband and a high-paying job, her best bet is to study home economics.

Miss Louise Mojonner, chairman of the home economics department at Illinois Institute of Technology, said a shortage of home economics teachers and dietitians has created unlimited job opportunities for graduates. She added that a large number of home economists never use their degrees outside the home.

"More than half of the Illinois Tech home economists majors get married while they are still in school or shortly thereafter," she said.

"Perhaps the marriageability quotient is higher because home economists enjoy an added advantage of being better equipped to manage a home."

If a girl wants to make a career of home economics, Miss

Mojonner said, she can get a starting teaching job at from \$3,200 to \$3,400 a year. Hospitals and other institutions have offered up to \$300 a month, plus maintenance, for trained dietitians.
