### REHABILITATION OF BORIC ACID

Now that most people with a fair knowledge of and interest in the promotion of health and vitality are getting or trying to get an adequate daily ration of sunshine (ultraviolet) vitamin D, popular magazines are no longer warning the public about the hypothetical dangers involved in taking "too much" vitamin D. How much "too much" would be the science experts never indicated. The daily ration of vitamin D I recommend, in the pamphlet **Young Folks and Old Folks**, available on request if you provide stamped, self-addressed envelope, is a little less than one would get in a fluidounce of standard cod liver oil. Indeed, because of the discovery of vitamin D by McCollum and his associates in 1922, a minimum daily ration of one fluidounce (2 tablespoonfuls) of standard cod liver oil was generally satisfactory treatment for chronic rheumatism—but that was before "arthritis" became the rage among glibulous customers with joint disability. If you are subject to joint disability of over a year's standing, it can do you no harm to read **Calcium and Rheumatiz**, likewise available—income ten cents in addition if you want both pamphlets.

A year or two ago, Drs. R. B. and A. Goldbloom reported in "Journal of Pediatrics" a case of boric acid poisoning in an infant, resulting from the use of borated talcum powder. The doctors thought enough boric acid to poison the baby had been absorbed through raw spots in the skin. They added that they had found 109 similar cases reported in other medical journals throughout the world.

That was enough. The "science" writers and editors zealously warned the public against further use of borated talcum, boric acid solutions, boric acid ointments. Gee whiz, what fools these doctors be—they have been using saturated solution of boric acid as an all-around cleansing, soothing, mildly antiseptic lotion for sore eyes, etc., for nearly a century, and they never suspected the stuff was poisonous until the hasty experts published their report.

A year or so after the Goldbloom report was published one of the authors (R. B. Goldbloom) published in the same journal a retraction of the original allegation.

Russell Fisher M.D., Henry Freimuth, Ph.D., Kathleen O'Connor, B.S., and Viola Johns, M.D. remind us (JAMA 2/5/55) that boron is widely distributed in fruits and other foods, and the human organism constantly absorbs and excretes it. Four ounces (half a glass) of orange juice might contain 1.68 mg. of boron, equivalent to 9.8 mg. of boric acid (approximately one-sixth of a grain), and this fact renders the usual chemical determination of the presence of boric acid in the urine invalid, though many "scientific" reports of alleged boric acid poisoning from alleged absorption through the skin have rested on such "proof."

As I would say, one has to be constantly on guard against being bamboozled when reading current medical authorities—these "scientists," as Lum would say, seldom have the courage or honesty to acknowledge and correct an error, as Dr. Goldbloom did.

Relax, everybody. There will be no change in the chapter on Boric Acid in The Medicine Cupboard. For this No. 14 Little Les-

## Oregon 'Navy' Plan In Police Measure

Salem — (U.P.) — Oregon will again have a "Navy" if the Legislature approves part of the state police budget calling for \$25,000 for purchase of an offshore patrol boat.

The House Ways and Means Committee Thursday approved the fund in the \$5,568,000 budget.

Sen. John Hounsell (R-Hood River) said a much cheaper boat was approved two years ago but that it lost much of its bottom while crossing the sand bar and the mouth of the Columbia river. The vessel up to then had brought in \$7500 in license fees from wayward fishermen. Fees collected are expected to pay for the boat in four years. The old boat was sold for about \$8,000.

The measure brought a bit of joking when Sen. Gene Brown asked if the measure called for Rep. Orval Eaton of Astoria as admiral of the Oregon Navy. Sen. John Merrifield of Portland suggested that Eaton take command of the vessel with the hole in its bottom.

## Named KOG Chairman

Portland — (U.P.) — Edward P. Stamm of Portland, vice-president of Crown Zellerbach Corporation, is the new chairman of the Keep Oregon Green association.

Stamm succeeds Paul M. Dunn former dean of forestry at Oregon State college.

The group re-elected Albert Wiesendanger of Salem as executive secretary and Carl Her-

### Churchill Gives Eden Boost as Successor

London — (U.P.) — Prime Minister Winston Churchill gave Foreign Minister Anthony Eden another boost this week as his possible successor.

Laborite Fenner Brockway asked Churchill in Commons whether he would urge his "successors" to carry on his Formosa policy "if the unkind finger of time" denied him the chance to do it himself.

Churchill replied: "No one has worked so hard in the whole world as the foreign secretary to steer this matter out of the danger area."
