

'Partnership' Power Issue Talked By McKay, Others for Senators

Washington — (U.P.) — Interior Secretary Douglas McKay Wednesday defended the Eisenhower administration's "partnership" policy for development of power projects as a "positive program . . . that will make a valuable contribution to the power supply of the country."

In a requested appearance before the House Interior committee, McKay also said:

1. The administration has no preference between private utility companies and governmental agencies in selecting "partners" for development of projects.

2. The government will continue to use power rates on federal projects as an informal "yardstick" to indicate what private rates might be.

Democratic committee members questioning him in turn attacked the partnership policy. Republican members told McKay they agreed with it.

He said increasing applications for power development made to the federal power commission by local groups, both public and private, show that local initiative for power development exists.

In 1953, he said, the FPC granted permits for plants to produce 1,597,000 kilowatts of power. The figure jumped to 5,537,000 in 1954 and applications pending at the end of the year would provide 8,166,000.

He said the administration is not abandoning construction of plants to turn out "low cost public power . . . but we are abandoning the policy of the previous administration that the federal government alone should develop all this power."

He argued that power shortages have developed in the two areas of the country "where

public power is dominant," the Tennessee valley and the Pacific Northwest.

Rep. Lee Metcalf (D-Mont.) told McKay the partnership policy allowed only "financially able" groups to join the government in building projects. In Montana, Idaho and other sections, he said, government agencies can't contribute.

"That leaves only the private companies," he said.

"There is nothing in this policy that turns over anything to private companies," McKay said. "There is no preference. You're seeing things under the bed."

Washington — (U.P.) — A series of witnesses told a Senate Interior subcommittee Thursday that local districts can build small water projects much more cheaply than the federal government can.

They were testifying in favor of a bill to authorize federal grants and interest-free loans to local agencies for projects costing less than \$5,000,000 and another to allow interest-free loans for irrigation distribution systems of authorized projects.

The subcommittee took the bills under advisement. Chairman Clinton P. Anderson (D-N.M.) said the group may vote on them in about two weeks.

William E. Welsh, secretary-manager of the National Reclamation association, said that the small projects bill would provide "simplified procedure, elimination of hurdles and less red tape, thereby reducing costs."

Object to Smaller Limit

He said the association would object to dropping the limit on projects to \$200,000 as proposed by the Senate committee last year. It also objects to imposing

the 160-acre reclamation land limit on eligible projects, he said but would agree that excess land owners should pay interest costs on water for lands over the limit.

Elmer Bennett, legislative representative of the Interior department said the agency "approves very highly" the principle of local cooperation contained in the bill. He said, however, the department feels that local agencies should make some contribution to project costs.

Howard Stodard of a Fresno, Calif., engineering firm told the subcommittee that irrigation districts could build distribution systems connecting with the Central Valley Project at savings of 30 to 50 per cent over federally constructed systems.

UAW Convention Reelects Reuther, Talks Wage Hikes

Cleveland, O. — (U.P.) — The CIO United Auto Workers closed out their 15th constitutional convention here today with three major issues approved during the six-day gathering.

They were the 25-million dollar strike fund, a collective bargaining program and the merger with the AFL.

Cleveland, O. — (U.P.) — The United Auto Workers (CIO) constitutional convention today turned its attention to the 1955 collective bargaining program and the guaranteed annual wage increase, the main issue confronting the nation's auto makers this year.

The 3000 delegates to the 15th annual gathering quickly disposed of elections by returning an unopposed slate of officers.

Re-elected by voice vote was President Walter Reuther, who has headed the 1,300,000-member union since 1936. Other returned to office were Vice-Presidents Richard Gosser and John Livingston, and Secretary-Treasurer Emil Mazey.

Norman Matthews of Detroit and Leonard Woodcock of Grand Rapids, Mich., backed by the Reuther group, were elected to newly-created vice-presidencies.

Reuther, referring to the collective bargaining program, said it would include a wage boost and improved health and pension plans. The amount of the wage increase was not revealed but Reuther said it would be "based on recognized principles."

Although the union signed five year contracts in 1950, Reuther said he was opposed to contracts running more than two years. He said changing conditions demand "new decisions and new conclusions."

Portland Alleged To Have Advantage In Truck Rates

Olympia — (U.P.) — The State Public Service commission has asked the Interstate Commerce commission permission to intervene in a dispute over truck hauling rates, alleging Portland had an unfair competitive advantage over Puget Sound points.

The commission said it wanted to join with the Seattle Traffic Association, Seattle Chamber of Commerce, Port of Tacoma and Tacoma Chamber of Commerce to eliminate "unjust" rates maintained by some truck lines.

The commission claimed the Puget Sound cities were unjustly discriminated against and Portland was unduly preferred under present rates. The cities and commission wanted a parity of rates with the Portland area into eastern Oregon, southern Idaho and Utah, or an advantage in rates to eastern Washington, northern Idaho and Montana.

The commission said Portland enjoyed a substantial advantage in rates to southern points and a parity to the eastern Washington and northern Idaho area.

Phoenix — Mrs. C. T. Pipes is again at home convalescing after a brief stay in a Medford hospital.

A. H. Dudley, who has been in a Medford hospital for about ten days, is expecting to be home soon. He will have to be in bed for some time yet.

Dr. Rae Foster and Mrs. Foster and three children of Portland visited Mr. and Mrs. Albert Arnold here last week end on their way to Los Angeles, Calif., where Dr. Foster will attend a medical meeting. The Fosters' little two-month-old daughter will spend the next ten days with the Arnolds while her parents and older sister and brother are in Los Angeles. Mrs. Foster is a daughter of Mr. and Mrs. Arnold.

Herman Gier is home now, feeling fine, and expects to be back in the drug store next week.

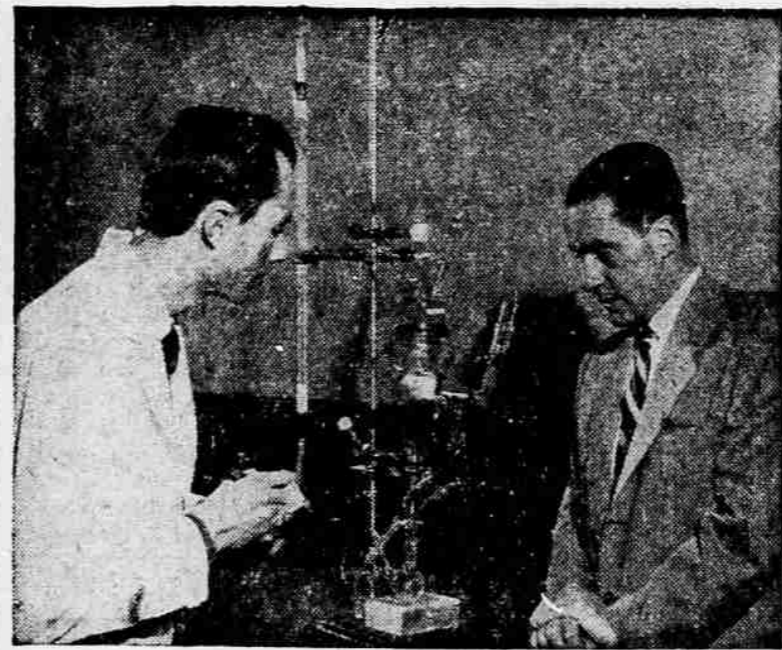

Mr. and Mrs. Mark Norton are back home after having been gone about three weeks. They went by car to Flat Rock, Ill., and then to Springfield, Ark., where they visited a brother of Mrs. Norton. From there they went to Houston, Texas, where they visited a cousin of Mrs. Norton and back through New Mexico and down through Old Mexico. At Carmel-by-the-Sea, Calif., they visited an old friend, a Mr. Chiddix, and came home by the Coast highway. They report a very enjoyable trip and wonderful weather all the way.

Slight damage to the wall behind a wood stove was caused by a fire resulting from a faulty flue at the home of Gloria Everden at 508 5th St. Wednesday evening.

O. C. Hill of Church st., spent last week in Portland where he was visiting relatives. He made the trip to Portland and back by bus.

Mrs. Kathryn Stancliffe attended a get-together with Mrs. Grace Dickey and her former Phoenix High school students Thursday night. The reunion was held at the home of Mrs. Agnes Anderson of 2607 East-over Terrace, in Medford. A most enjoyable time and renewal of old school day memories was had by those present.

Phoenix

CONDUCT CANCER RESEARCH — William B. Feldenheimer, right, Oregon campaign chief, visits the University of Oregon medical school where Theodore Peterson, research assistant, explains a project supported by ACS grants. In this case, a radioactive substance has been incorporated in a tumor which was then transplanted into the mouse. The mouse then lives in a cage and elaborate measurements are made of all ways in which the mouse gets rid of radioactivity. Peterson is shown taking a reading.

Cancer Control Month Starting; Seek Funds

April is Cancer Control month, designated as such by the U.S. Congress.

During the month the American Cancer society will stage its annual crusade, seeking funds to carry on its vast program of research and education and at

the same time focusing attention on the necessity for more public knowledge about the disease.

William B. Feldenheimer, Portland insurance man, is chairman of the crusade in Oregon, and he has pledged his organization of volunteers to the "most successful crusade in the Oregon division's history."

The crusade has the support of Gov. Paul L. Patterson who noted that "the ravages of this terrible disease cannot be ignored by the people of Oregon." He urged "even more generous support than has been given in the past."

\$30,000,000 for Research

Feldenheimer reported that the American Cancer society has allocated more than \$30,000,000 to research in the past 10 years, adding that "almost every branch of science is in some way participating in the research attack on cancer."

"It is up to the public to stand behind these scientists, many of whom are making personal sacrifices to continue their work," the chairman stated.

He pointed out that cancer research has increased considerably in post war years. Prior to 1941, Feldenheimer revealed, not more than a million dollars was available from all sources for cancer research, while today more than \$15,000,000 is available annually from many sources including the American Cancer society.

Portland Alleged To Have Advantage In Truck Rates

Olympia — (U.P.) — The State Public Service commission has asked the Interstate Commerce commission permission to intervene in a dispute over truck hauling rates, alleging Portland had an unfair competitive advantage over Puget Sound points.

The commission said it wanted to join with the Seattle Traffic Association, Seattle Chamber of Commerce, Port of Tacoma and Tacoma Chamber of Commerce to eliminate "unjust" rates maintained by some truck lines.

The commission claimed the Puget Sound cities were unjustly discriminated against and Portland was unduly preferred under present rates. The cities and commission wanted a parity of rates with the Portland area into eastern Oregon, southern Idaho and Utah, or an advantage in rates to eastern Washington, northern Idaho and Montana.

The commission said Portland enjoyed a substantial advantage in rates to southern points and a parity to the eastern Washington and northern Idaho area.

Washington — (U.P.) — President Eisenhower Thursday signed a bill giving some 2,000,000 military personnel a \$745,000,000 a year pay boost. His signature means that the higher pay begins today.

4-H Club News

Sams Valley Club

Sams Valley 4-H Sewing club Thimble Theater, organized March 22 at a meeting at the home of Mrs. Edward Pleasant. Sixteen members signed up for sewing.

Officers elected were Beverly Sanderson, president; Vernola Hutchinson, vice-president; Susan Day, secretary; Patty Straus, song leader; Deanna Doland, reporter.

The younger members will meet at the school house after school every first and third Tuesday with Mrs. Bill Duggan the assistant leader. Older members will meet in the evening of the same day at each others home.

Next meeting will be at the home of Mrs. Milton Sanderson, April 5 at 7:30 p.m. Susan Day will demonstrate how to model.

Deanna Doland, Reporter.

J. Wayne Green, eminent Trichologist, demonstrates causes of baldness and how it can be prevented.

HOW TO HAVE HAIR FOR A LIFETIME TO BE DEMONSTRATED HERE BY FAMOUS TRICHOLOGIST Offers Written Guarantee

An exclusive interview by Steven Bright

WICHITA — (Special) — J. Wayne Green, Director of Rogers, Inc., Hair and Scalp Specialists, exploded the "myth of baldness" today in an exclusive interview.

"Baldness is unnecessary, costly, and a plague to mankind," says Green. "No man need be bald. No man need suffer the stigma of premature old age that is forced upon him because he is losing his hair. The Rogers method of hair and scalp treatment can prevent baldness—can turn colorless fuzz into healthy, growing hair—can make you look youthful again."

Demonstration To Be Held in Medford, Ore.

This revolutionary method of home treatment for the hair and scalp will be demonstrated in Medford, Ore., Sunday ONLY, April 10 at the Medford Hotel. Trichologist J. F. Blevins will conduct the private, individual interviews from 12 noon until 9:00 P. M. on Sunday ONLY. There is no cost or obligation, and you need no appointment.

Reason For Baldness

"There is always a reason for baldness," continued this nationally known authority. "Hair cannot grow through a scalp that is infected with dandruff, excessive oiliness, or extreme dryness. A scalp that has never been exercised cannot be expected to produce healthy hair. Men, and yes, women too, walk the streets today, completely devoid of nature's greatest ornament—hair. Simply because they were not taught the basic rules of hair and scalp hygiene while they were growing up. The simple answer," emphasized this expert, "is that children should be taught the same simple basic rules of hair and scalp hygiene that they are taught for the proper care of their teeth. If this were the case baldness would be a rarity today!"

Heredity Not Involved

Trichologist Green dodged no issues. He quickly took up the most widely spread theory of baldness—heredity. "Mankind's unrealistic belief that baldness is hereditary stems from a misinterpretation of the theory of genetics. Theory does not state that any person must be bald because baldness exists in the family. What it does say is, that in some families a tendency exists towards an undernourished scalp." The purpose of the Rogers Hair and Scalp Clinic is to teach the methods of strengthening the weak scalp and nourishing it to a healthy, vigorous condition. "A healthy scalp will grow hair if it is not already completely bald," assures Green.

Is There Hope For The Completely Bald?

In his travels throughout the United States and Canada, Green has collected hundreds of testimonials of his ability to develop weak fuzz into healthy, mature hair. All of his clients have started with private examination, hair and scalp analysis and a diagnosis of the disorder. Green is quick, however, to tell a hopeless case that he cannot be helped. "We strongly advise," says Green, "that no person who is completely bald hold any hope whatsoever of regrowing hair. If there is any fuzz at all, we can restore a healthy scalp condition and the hair will grow normally again as nature intended."

Offers A Guarantee

"Rogers, Inc., America's Foremost Hair and Scalp Specialists, offer a guarantee to any client who enrolls for treatment. If he or she is not completely delighted with results at the end of 30 days, the money invested will be graciously refunded," pledged Green. "We must have satisfied clients. We must regrow hair. After all, it is our best advertisement."

Is Your Hair Healthy?

If you have a scalp disorder, or if you are worried about your hair, call Trichologist J. G. Blevins at the Medford Hotel, Medford, Ore., Sunday ONLY, April 10, from 12 noon to 9:00 P.M. The examinations are private and open to men and women. You do not need an appointment, and you will not be embarrassed or obligated in any way.

If you want the real facts on new-car values see your PONTIAC dealer!

Dean's Pontiac Sales & Service

6th and Grape Streets Phone 2-5241

When you compare automobile values, one plain and easily proved truth becomes evident — Pontiac gives you more for your money than any other car in America!

Keeping in mind that Pontiac is priced within the reach of any new-car buyer, consider these three very important facts:

Pontiac is a big car! Pontiac's 122" or 124" wheelbase is 6½ to 8½ inches longer than any of the "low-priced three". It's the biggest car at its price.

Pontiac is more powerful! Model for model, its big Strato-Streak V-8 delivers more power per dollar than any car in its field!

Pontiac is the most distinctively beautiful car at any price! No other car can match the individuality of Pontiac Twin-Streak styling and Vogue Two-Tone colors.

Right there are three big reasons why Pontiac sales are at an all-time high. Come in and get all the facts—for final proof.

You can buy a big, 200-H.P. Pontiac for less than many models of the lowest-priced cars and much less than stripped economy models of higher-priced makes!
