Your Health and Its Care

By DR. WILLIAM BRADY, M.D.

Readers should address inquiries to: William Brady,
263 El Camino, Beverly Hills, Calif.

THE DIGITALIS HOKUM

Concerning treatment of a person after a "heart attack," a physician who presumably has had

Dr. Brady

some experience as a consultant, writes:

"In many cases the man's doctor would have preferred not to give him any medicine, but he knew it he didn't

give some medicine the patient or his wife or family would feel that he was being badly

neglected."

So you see, poor souls, why some keep their customers taking digitalis indefinitely. Indeed

some of them make their customers believe that life itself depends on taking the daily dose

of digitalis or some similar medicine.

It's funny how a doctor can be so busy and yet be afraid to tell a patient he doesn't need any

medicine.

Many times in my early practice—the honest years—I tried it, and the experiment proved

costly. The patient would go straight from my office to the

office of a more experienced doctor who considered medicine

indispensable. I not only lost business but sometimes gained the

enmity of the patient that way; the patient could be pretty

indignant if I decided after careful examination that he needed no

medicine and yet charged a fee for my advice. It took several

years—lean, unhappy years—for me to learn to hand such

patients six cents worth of inert tablets and keep him coming.

Then, after I became callous about it, I wasn't entirely

happy, except that the children got more of the pleasures other

children enjoyed.

Digitalis may possibly be beneficial in some circumstances. At

least a lot of good doctors seem to think so. Some good doctors

have tried to explain to me, in language simple enough for a

man, that digitalis is good for certain conditions of the heart. Trouble

is, they become first nettled, then vehement, and finally so

dern mad . . . I used to say I'd never take digitalis unless my doctor

ordered me to take it or else.

Now I must amend that, to read as follows:

I would not take digitalis in any conceivable circumstance. If

I consulted a physician and the physician prescribed digitalis, I'd say "Uh-uh."

If the doctor gave me the take-it-or-else routine I'd say "Well, that's too bad, Doctor. I liked

you. But without digitalis. Give it to some poor goof who doesn't

know anything about therapeutics."

It is my sincere belief that the heart tonic I recommended in the booklet C.V.D., about heart

and artery troubles, would prove a boon to most poor geeks who

think they have to take digitalis daily to keep going. For the

booklet send 25c and stamped, self-addressed envelope.

QUESTIONS & ANSWERS

Borated Talcum Powder
You boast that you acknowledge your mistake when you find you were wrong—when will you apologize for advising the use of borated talcum on skin irritations of infants? (Miss F. T.)

Answer—When I learn of a single authenticated case of boric acid poisoning due to use of borated talcum powder, I'll consider the idea.

Hairy Child
Daughter, aged four, seems healthy

enough but has a lot of hair across shoulders and down back to the waist line, also on outer surfaces of arms and legs. . . (L. G. W.)

Answer—In some instances such hairiness is a manifestation of hypothyroidism—deficient thyroid gland function. Thyroid feeding, of course, under your physician's care, may correct the trouble in a matter of eight or ten months. Especially when the child's gain in height is slow.
