

Truman Calls on US To Bring Threats To Peace Before General Assembly

Former President Urges Caution on Charter Revision

Washington — (U.P.) — Former President Truman called on the United States to bring "the current threats to world peace" before the U.N. General Assembly.

Mr. Truman, in his first appearance as a congressional witness since he left the Senate more than 10 years ago, did not mention the Formosa crisis by name in a prepared statement.

But he told a Senate Foreign Relations subcommittee that the United Nations should be used in order to make the world organization work.

"Whenever we can, we should use it," Mr. Truman said. "And we should use it now by bringing before the General Assembly the current threats to world peace."

Receives Ovation

However, he urged the United States to go slow in demanding revisions of the U.N. charter lest the good provisions be damaged.

Chipper and smiling, Mr. Truman received a rousing ovation as he returned to the big Senate caucus room where he first gained national fame as chairman of the Truman War Investigating subcommittee. He recalled that he had not been in the room since the summer of 1944, when he resigned to run for vice-president.

Characteristically, he arrived 15 minutes ahead of schedule. He chatted with old friends among the reporters and photographers until Chairman Walter F. George (D-Ga.) arrived.

"The present international situation is worse than the one which wrecked the League of Nations and rendered it ineffective," Mr. Truman stated.

However, he said, the United Nations has kept the world from "unlimited international warfare" since it was founded 10 years ago.

Aggression Discouraged

"Whatever its weakness and difficulties, the United Nations is a power to be reckoned with, and no aggressor can afford to ignore it," he said.

George said that it was "very fitting" that Mr. Truman should testify at the opening here on recommendations for revising the U.N. charter. He pointed out that Mr. Truman presented the charter to the Senate 10 years ago.

Mr. Truman said some changes in the U.N. charter may be desirable, but he avoided a technical discussion of possible amendments.

GOP National Chairman Hall Raps Efforts of 'New Deal Peashooters'

Washington — (U.P.) — GOP National Chairman Leonard W. Hall denounced former President Truman and Adlai E. Stevenson Sunday night as "New Deal peashooters" whose criticism of President Eisenhower "will get them nowhere."

Hall charged that Mr. Truman and Stevenson are trying to "tear down" President Eisenhower for partisan political advantage.

Republican legislators, including Styles Bridges (N.H.) of the Senate GOP Policy Committee, also criticized Mr. Truman and Stevenson for attacking the Eisenhower administration at a Saturday night dinner here.

Bridges said the two Democratic Party leaders were only looking for "political profit" in next year's presidential race.

Hall did not mention Mr. Truman by name, but he left no doubt as to his targets when he declared that the President's popularity "continues to grow

State Legislature Enters 99th Day; May Break Record

Salem — (U.P.) — The Oregon Legislature entered its 99th day today and may be out to break the 116-day record for the longest legislative session.

There were still a few optimistic senators today, though, who thought the lawmakers could wind up their business within two weeks without continuing on into May.

Still under consideration were many important pieces of legislation, including the tax program, building program, reapportionment, basic school support formula and the higher education budget.

29 Bills on Calendar

Twenty-nine bills were on the Senate calendar today, all but one of them originating in the House. Twelve bills are up for consideration in the House, eight of them from the Senate.

The House Taxation Committee was to meet at 3 p.m. for a decision on the 3 per cent sales tax bill. The sales tax will be referred to the people at a special election.

To Consider Tax Increase

Tonight the Senate Tax Committee was to consider the 32 per cent income tax increase approved by the House and also the 3-cent cigarette tax.

The House faced a hot measure to prohibit cities from levying income taxes after July 1, 1957. Last Thursday the House defeated this measure 30 to 30, but proposes to take another look. The bill would knock out Portland's business tax.

The Reapportionment Committee of the House set a hearing for tonight on a proposed constitutional amendment to give each county one senator.

Crippen Residence Damaged by Blaze

Fire damaged the Steve G. Crippen Sr., residence, 2530 Corona ave., early today, city firemen reported.

The blaze originated in the utility room and extended through the roof and through the wall to the kitchen, hallway and living room. Firemen said exact cause was not known. They reported that smoke and heat damage was extensive.

Alarm was received by the fire department about 3:15 a.m. and two pumps were sent. Mrs. Crippen reportedly was awakened by the smoke and turned in the alarm.

Taylor May Find Season Expensive

Cincinnati, Ohio — (U.P.) — It looks like an expensive baseball season for the Cincinnati tailor who offers to give a free suit of clothes to any player batting a drive off his sign on the laundry back of left field at Crosley Field.

Ray Jablonski of the Cincinnati Redlegs banged the sign on Saturday and Wally Post of the Redlegs hit it on Sunday—and Joe Adcock of Milwaukee just missed. There have been some seasons when not a single player hit the sign all year.

Curt Simmons Ready To Take Hill Anytime

Philadelphia — (U.P.) — Sore-armed southpaw Curt Simmons reports the ache in his pitching arm is "almost gone" and says he's ready "to pitch any time the ball club needs me."

Simmons said he probably would pitch in relief a few times before trying a start. Manager Mayo Smith said he would not hurry Simmons, a 13-game winner, last season, and "would be happy" if Curt can take regular starting turns by May 15.

Russian Atomic Blast Blamed for Particles in U.S.

San Francisco — (U.P.) — A Boston cancer researcher says radioactive particles from a Russian experimental atomic blast may well have showered the United States.

The researcher, Dr. Jacob Furth of the Boston Children's Cancer Research Foundation, said his conclusion was reached after scientists noted a tremendous increase of iodine in the thyroid glands of cattle slaughtered in the Midwest.

Furth addressed his remarks to the closing session of the American Association for Cancer Research conference yesterday. Some 400 doctors and scientists attended the three-day meeting.

He refused to give a date for the blast or the discovery of the strange thyroid condition. He said only that the iodine increase was found by Dr. L. Van Middlesworth of the University of Tennessee Medical School.

However, the Atomic Energy Commission announced earlier that strong radiation had been detected after a Siberian blast in September, 1954.

The Commission said at the time that radioactivity was discovered in such widely separated areas as Japan and Vancouver, B.C.

Furth indicated that if the iodine particles contained sufficient strength to affect cattle, it would also collect in humans, adding that the AEC Nevada tests might have the same effect.

There is no reason to suspect that a large temporary increase in radioactive iodine would create cancer in either humans or cattle, Furth said.

But he indicated that the substance could cause some destruction of thyroid cells, since it gives off radioactive rays.

Openings Listed In Welding-Class

Openings still exist for three students in a welding class for school officials said today. Eight students have signed up for the class, which has a maximum of 11.

The five-weeks course includes training in both arc and acetylene welding, with a total of 30 hours of instruction. Classes are held from 7 to 10 p.m. on Tuesdays and Wednesdays.

Tuition charge is \$25, and includes all materials used. Students must provide their own helmets, goggles, and gloves. The class is instructed by Del Bergman.

Those interested in joining the class may obtain further information by telephoning the city schools office, Medford 3-3683.

There were 13.2 per cent of children in the U.S. between the ages of 5 and 17 who were not attending any school at all during the year 1953.

Rogue River GOC Sees Demonstration

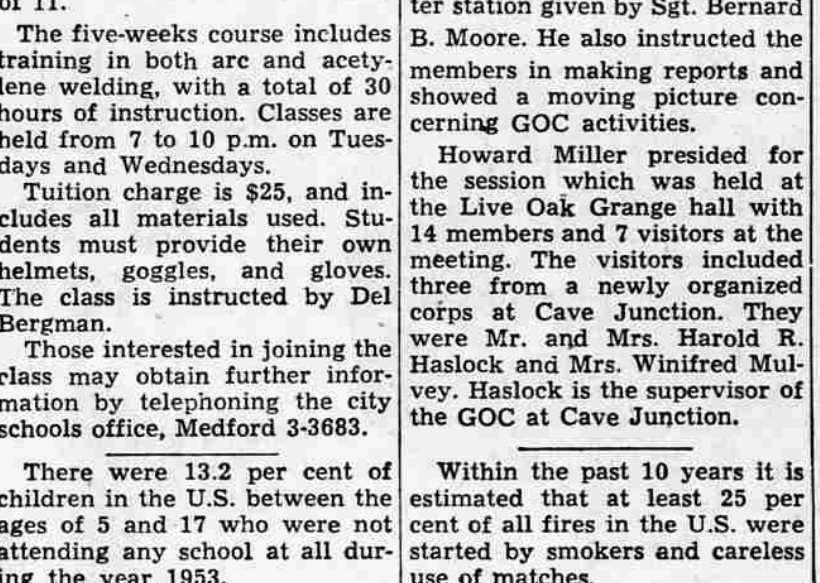

Rogue River — Rogue River Ground Observer corps members who met April 13 saw a demonstration on how GOC reports are recorded at the Portland filter station given by Sgt. Bernard B. Moore. He also instructed the members in making reports and showed a moving picture concerning GOC activities.

Howard Miller presided for the session which was held at the Live Oak Grange hall with 14 members and 7 visitors at the meeting. The visitors included three from a newly organized corps at Cave Junction. They were Mr. and Mrs. Harold R. Haslock and Mrs. Winifred Mulvey. Haslock is the supervisor of the GOC at Cave Junction.

Within the past 10 years it is estimated that at least 25 per cent of all fires in the U.S. were started by smokers and careless use of matches.

MUSICAL AMBASSADORS

The Musical Ambassadors choir, pictured above, will appear in concert Wednesday, April 20, at 7:30 p.m., at the Medford Assembly of God church, 1108 West Main st. The choir is from the Southern California Bible college at Costa Mesa, Calif. The public is invited to the program of music.

CLEANEST MOST POWERFUL GASOLINE!

ORDINARY GASOLINES ARE DESTRUCTIVE
HERE'S WHAT ORDINARY GASOLINES DO:

Dirty gasoline containing sulfur burns out mufflers and tailpipes... affects the chrome on rear bumpers. This is damage you can see—inside your engine, sulfur in gasoline causes engine wear and harmful deposits that waste power.

Every 20 gallons of ordinary gasoline contains almost a cupful of destructive sulfur.

CLEANEST... new Flying "A" Ethyl is clean... made clean to burn clean by a new process that extracts both sulfur and nitrogen compounds at the refinery—not in your engine. These dirty impurities build up harmful deposits in your engine that waste gasoline and power—cause knock and engine wear.

MOST POWERFUL... new Flying "A" Ethyl has new high octane power added by rearranging the gasoline molecules themselves. It's so clean—so concentrated you'll feel a powerful difference right from the start. Fill up with the cleanest, most powerful gasoline... new Flying "A" Ethyl—now at all Flying "A" Dealers.

Concentrated FOR FASTER STARTING • HIGHEST OCTANE PERFORMANCE
GREATER GASOLINE MILEAGE
