

Hopalong Cassidy Hero of 4-Year-Old Davy Crockett

By JOHN COLTON
United Press Correspondent
Houston —(U.P.)— Now don't holler this around the hills, but: The great-great-grandson of the original Davy Crockett is a Hopalong Cassidy man himself. He is Davy Crockett IV, age four, a devotee of the six-gun not the long firl. He wears the standard Hopalong black hat, not the coonskin. And to top it off, there is no TV set at his house. His dad, Davy Crockett III, is the great grandson of the young-

est son of the now celebrated Tennessee mountainer. An architect by profession and a taciturn man by nature, Crockett takes a calm if not dim view of all the hubbub about the king of the wild frontier.

They Don't Have TV
He allowed his family had heard the "Ballad of Davy Crockett" a "couple of times." His wife elaborated a bit.

"We don't have a television set and it's just as well for the boy," she said. "All that to-do about his name might turn his head."
Prof. J. L. Highsaw, a Memphis high school principal who can reel off the life story of the backwoodsman, doubts that line about Davy killing a "bar" when he was only three.

True Story Mostly
Not unless his father held the rifle to his shoulder for him," Highsaw said. "But he really did kill 105 bears in one year."

Highsaw says the ballad is true in the main.
"Davy indeed was born on a mountaintop in Tennessee, near Greenville, on Aug. 11, 1786," he said.

"He was an Indian fighter, did kill bears as a youngster, go to Congress, die in the Battle of the Alamo. In the main, its absolutely perfect. And it's a good thing for people to sing."

plays "presumably" will be seen this year.
Heads Off Plans
The Navy said its order was issued to head off plans of field commands to display missiles.
The order was issued over the name of Navy Secretary Charles S. Thomas. It will ban Navy displays of the Regulus guided missile, which has a similar role to the Matador's and is carried in submarines, and the Terrier, which has a similar job to the Nikes.
Navy spokesmen said that the order was issued to prevent any mishaps in carrying out Defense Secretary Charles E. Wilson's tight new rules on release of military data. The Navy has been in trouble recently for stories on the atomic submarine Nautilus and vertical takeoff airplanes.

mer sharp distinction between strategic bombing forces and tactical fighter forces. He said many military and civilian leaders believe a major war of the future would be decided in a very short time. He said that similarly any "brush fire" wars in which the United States becomes involved "might be best extinguished immediately."

Rigid Navy Order Bans Displays of Guided Missiles

Washington —(U.P.)— A new rigid Navy order bans any public display of guided missiles and other new weapons "until further notice."

The order means that no Navy missiles will be exhibited on Armed Forces day on May 21 although the other two services are going ahead with plans for displaying at least two types of guided weapons.

The Air Force will show its Matador pilotless bomber here, in Baltimore and in Germany. An Army spokesman said that Nike anti-aircraft missile dis-

and Secretary of State John Foster Dulles to the effect that this country no longer regards atomic bombs as weapons to be used only in case of all-out world war. Mr. Eisenhower said at a news conference that if new tactical atomic weapons could be delivered accurately against strictly military targets, he saw no reason why they should not be used as routinely as bullets.

White said the development of nuclear weapons and in-flight refueling has diminished the for-

WINS THIRD TRACK TITLE

Portland —(U.P.)— Gresham piled up 177 points to win the Valley Coast league track and field title for the third straight time here Friday. Parkrose was second with 105 1/3, followed by Milwaukie with 101. Central Catholic had 28 1/3; Astoria, 12; and David Douglas, 10 1/3.

Florida Bay, between mainland and the Keys, shelters about 200 spoonbills and 60 nests during breeding season. When the National Audubon Society started protecting them, there were but 35 birds and 10 nests.

The outer green leaves of head lettuce are richer in vitamins than the inner, bleached leaves.

GUINEA PIG—A Patton Tank from Camp Irwin, Cal., gets into position for "Task Force Razor" which will test fifty-five tanks and men who will be exposed to atomic explosion just 3500 yards away. Tower which will house nuclear device can be seen in background at right.

Small Planes Can Carry Large A-Bombs, Air Force Man States

St. Louis, Mo.—(U.P.)—An Air Force leader said Saturday night small fighter planes now can deliver atomic bombs "much more destructive" than those which big bombers dropped on Japan during World War II.

He said such planes could be "decisive" in preventing or quickly ending so-called little wars.

New Concept

Gen. Thomas D. White, air vice chief of staff, unveiled in a prepared speech to the Reserve Officers convention a new Air Force concept for using tactical aircraft—"equipped with either atomic or non-atomic weapons"—to cope with nibbling Communist aggression "at any trouble spot on earth."

His statements offered one answer to a question some congressional Democrats have been asking—how is this country going to fight "fringe wars" like Korea with the Eisenhower Administration's "New Look" defense force which emphasizes air power and atomic weapons and sharply reduced army ground force strength?

Use Like Bullets

White also was clearly speaking in the context of recent remarks by President Eisenhower

New Radioactive Element Found by AEC Scientists

Berkeley, Calif. —(U.P.)— Discovery of a new and "intensely radioactive" element which does not exist in natural form on earth was reported Saturday by University of California scientists working under contract with the Atomic Energy Commission.

The scientists said they discovered the synthetic form of matter, Element 101, when they bombarded another synthetic element, 99, with 41,000,000 electron volt alpha particles in the university's 60-inch cyclotron at Crocker, Calif.

The discovery was made by a team of five scientists two months ago. They named it Mendelevium after a 19th century Russian chemist who developed the periodic system used to classify elements.

Element 101 is the heaviest atom known, but the scientists said it has no practical place in atomic energy for either bombs or power.

"However, like the other synthetic elements . . . it will help broaden man's understanding of matter, especially the principles involved in problems relating to atomic energy," they said.

Discoverers of Element 101

ATHLETICS GET SLEATER
Kansas City, Mo.—(U.P.)—The Kansas City Athletics have picked up pitcher Lou Sleater from the New York Yankees for the \$10,000 waiver price. Sleater, who came to the Yankees late last year, did not pitch for New York since the 1955 season began.

were Albert Ghiorso, Bernard G. Harvey, G. R. Choppin and S. G. Thompson; research chemists, and Glenn T. Seaborg, Nobel Laureate. All are employed by the university's radiation laboratory and College of Chemistry.

The near sighted elephant uses his sense of smell and hearing to give warning of potential enemies. His flapping ears become stiff as boards and fan out when he feels the presence of danger.

Now-out of Chrysler Corporation...come the most rugged trucks ever built!

Announcing new Dodge "Job-Rated" Trucks!

The power line with full-view design!

NEW! Super Power-Dome V-8 engines—169 to 202 hp. World's most powerful low-tonnage V-8's and the most dependable Sixes!

NEW! Seat material that "breathes" for cooler, more comfortable driving! New acoustic-treated cabs to increase driver efficiency!

NEW! Higher payloads, new no-clutch transmissions, power steering and braking, fuel-saving overdrive! Plus smartly styled interiors, new exterior colors and two-toning! Over 100 new features!

NEW! Full-view design with the biggest wrap-around windshield of any make! Wrap-around rear window available, too! Full-view design means greater safety and maneuverability, easier handling!

Come In today! See these great new trucks on display!
