24-Hour Jail Term
Served for Killing

Nashville, Tenn. (U.P.)—Sarah Fly early yesterday finished serving a 24-hour jail sentence she received for the death of a St. Louis, Mo., salesman she slugged with her slipper.

An all-male jury fixed the one-day sentence for Miss Fly after she pleaded guilty to an involuntary manslaughter charge, admitting she struck and killed William D. Fernandez in a fit of jealousy.

She saw him kiss another woman in a night club, she said.

In the 1952-53 fishing season

OUR RABID PUBLIC HEALTH OFFICIALS

Believe it or not, some doctors and some hospitals still cauterize fresh wounds inflicted by animals or birds, or did indulge in such malpractice as recently as 1951 because, forsooth, of an understandable misapprehension that public health authorities prescribed it.

You see, I regard such wounds as most likely to favor development of tetanus (lockjaw) and therefore, I believe, the doctor who fails to give tetanus antitoxin, regardless of the question of rabies, takes a terrible responsibility.

Some years ago any animal-drawers upon mad dog scares infuriated a metropolitan health commissioner unbearably. He published an open letter in the press, declaring that there is only one way to destroy rabies virus—by cauterizing the wound inflicted by the animal or bird, particularly dogbite, with fuming nitric acid.

The health commissioner could not cite scientific evidence to support his assertion. But, by gum, the commissioner did his darnest to support malpractice and at the same time put me under a cloud of suspicion in the minds of many wisecracks.

The proper emergency treatment of dogbite or any wound, inflicted by the teeth, claws, beak, talons or spurs of wild animal or bird, tame or wild, gentle or "mad," healthy or "rabid," as any reputable physician or surgeon will agree, whether he or she has the courage to condemn cauterization or not is:

1. Wash out the wound with plain soap and sterile (boiled) water.
2. Rinse away the soap with sterile water.
3. Cut away dead tissue.
4. If the wound gapes, stitch it up.
5. Paint the surrounding skin with mild tincture or solution of iodine (2 per cent).
6. Apply a dressing of sterile (ironed) gauze (washed cheese-cloth) spread with just sufficient sterile (boiled) petrolatum or other sterile neutral salve or ointment to prevent the gauze sticking to the wound.

That's all.

But I'd go one step further, or at least I'd want the doctor to go at least one step further if I were the patient, and that is:

7. Administer tetanus antitoxin—one dose immediately, a second injection 5 to 7 days later.

Coon-Neuberger
Debate Due at Ontario

Washington (U.P.)—Rep. Sam Coon (R-Ore.) said yesterday he has accepted an invitation to debate with Sen. Richard L. Neuberger (D-Ore.) a bill he introduced which would allow private construction of the power facilities of John Day Dam.

The invitation was sent by the Ontario, Ore., Chamber of Commerce and the debate will be held there at a date to be set, Coon said.

Neuberger, who wants the dam built entirely by the federal government, asked for the debate two weeks ago. He suggested it be held early next fall.

Coon said the formal subject should be "agreed that the Coon bill for the John Day Dam is in the public interest," and that he would argue the affirmative.

The question of rabies (hydrophobia)?

If the wound were my child's or my own and the seven steps in emergency treatment were followed as described, I would not worry about it. In my opinion rabid animals, if there are any in the community, do much less harm than our rabid public health officials.

QUESTIONS & ANSWERS

Saved Doctor Bills

Of course we don't know what the condition of our health might have been now if we had had your instruction, but we do know that the knowledge gained from study of Little Lesson 5 has saved our family and our daughter's family a lot of doctor bills... (W. N. R.)

Answer—Thank you, sir. Little Lesson No. 5, in case any one wants to know, is the booklet CALL IT C R I, which deals with the common respiratory infections ("colds") the (un)teachable, which account for three-fourths of the everyday work of physicians, surgeons and specialists. For the booklet send 25¢ and stamped, self-addressed envelope.

Dead line for Sunday Classified is Monday, either days 5:30 previous day.

KIDNEYS MUST REMOVE EXCESS WASTE

Nagging backache, loss of pep and energy, headaches and dizziness may be due to slow-down of kidney function. Doctors say good kidney function is very important to good health. When some everyday condition, such as stress and strain, causes this important function to slow down, many folks suffer nagging backache—feel miserable. Minor bladder irritations due to cold or wrong diet may cause getting up nights or frequent passages. Don't neglect your kidneys if these conditions bother you. Try Doan's Pills—a mild diuretic. It's amazing how many times Doan's give happy relief from these discomforts—help the 15 miles of kidney tubes and filter flush out waste. Ask for new, large, economy size and save money. Get Doan's Pills today!
