**Rural Area Writes Chapter In Ohio Chemical Center**

Charleston, W. Va. (U.P.)—The latest chapter in the phenomenal growth of the upper Ohio River valley into one of the great chemical centers of the nation is being written at the rural community of Ravenswood, W. Va.

Kaise Aluminum and Chemical Corp. has started construction of a new \$100,000,000 plant at the town, which now counts its inhabitants at 1,200. The new plant will employ twice that many persons and the population of the community is expected to reach 5,000 within five years.

The story of Ravenswood is typical of many communities nestling in the broad valley of the Ohio River affected by the growth of the chemical industry in the area in the past 12 years. War Started It

The boom started during World War II when the nation's chemical facilities were strained to the breaking point. Geologists, studying earth formations, concluded the great salt vein which made central New York a chemical center should reappear near New Martinsville, W. Va.

The government immediately started a million-dollar chlorine and caustic soda plant there. The geologists were right. Drillers found the valley was underlaid with rich salt deposits.

The Columbia Southern Division of Pittsburgh Plate Glass Co. was named to operate the plant. At the end of the war, Columbia Southern bought the facilities and started an expansion program that continues. The parade was on.

Solvay Process and National Aniline built at Moundsville, W. Va., American Cyanamid at St. Mary's DuPont at Parkersburg and Linde Air Products at Sistersville.

The plants began pouring out products with such tongue-twisting names as phthalic anhydride, anhydrous ammonia, chloroacetylene and polyethylene. They find their markets in wearing apparel, plastics, fertilizers and thousands of other products for industrial and consumer use.

The boom had a mushrooming effect. As a plant would go into operation, others were built nearby to make use of its products and by-products. The end isn't in sight.

The coming of the chemical industry was a boon to residents of the valley. Mayor Paul Stewart of Ravenswood described the town's experience as "like moving from a small apartment into a fine, large home."

"We'll have better schools, bigger church congregations—just a better place to live," he said.

To the economy of West Virginia, the upsurge of chemicals was like a lifeline in the wilderness of problems arising out of decline of the soft coal industry, the state's biggest business.

Coal hit the skids about six years ago. Unemployment rose, payrolls fell and retail business suffered. Now coal experts predict the industry will make a comeback and within 15 years once again be booming.

With a giant chemical and a healthy coal industry, West Virginia expects to take its place among the leading industrial areas of the nation.

A key lifeline of the boom is the Ohio River which offers cheap water transportation to other chemical and industrial centers on the Gulf Coast. Tonnage transported on some sections of the Ohio is more than double that of the Panama Canal.

**Long-Haul Trucks Again Haul Freight**

Los Angeles (U.P.)—Long-haul trucks moved again today over the highways of 11 Western states following ratification of a new three-year contract between AFL teamsters and the trucking industry.

Approval of the new contract was announced Saturday by Federal Conciliator John Fenton and thousands of drivers, dockmen and office personnel were ordered to return to work. The strike began May 19.

With local contract variations, long-haul operators won an immediate 8-cent-hourly pay increase, with additional hikes totaling 15 cents to follow in the next two years.

Short-haul workers received boosts totaling 29 cents over a three-year period. The union also received a mileage increase of one-fourth cent a mile and pension benefits.

**End of Cominform Believed Possible**

London (U.P.)—Russia may be willing to break up its notorious "Cominform" as part of a bargain for cooperation with the Western Powers, diplomatic reports have indicated.

The Cominform is the Communist Bureau of Information which the Kremlin formed as a propaganda and coordinating agency in 1947.

Reports from behind the Iron Curtain suggest that the dissolution of the Cominform might be promised by Russia as one of its maneuvers in the new "soft approach" it is now using.

It was recalled that the "Cominform"—Communist International—which was the predecessor of the Cominform was dissolved during World War II as a gesture toward the non-Communist Allies.

**Butler in Texas To Patch Up Rift**

Dallas, Tex. (U.P.)—Paul Butler, national chairman of the Democratic party, flew here today to begin a week-long tour of Texas designed to patch up the rift in party ranks.

The Democrats split in the 1952 presidential campaign when the liberals supported Adlai Stevenson, while Gov. Allan Shivers led the conservative elements in backing President Eisenhower.

**On The Side** By E. V. Durling

It has been said: "Isn't it too bad that the people you want to see all of the time you see only some of the time and those you want to see only some of the time you see all of the time?" That strikes me as a good description of the television situation. Even the most brilliant entertainers are in danger of boring the customers when they are on the airwaves too often. Anyway a couple of fellows I see only some of the time on TV are two of my favorites, Jack Pearl, the highly whimsical comedian, and Morton Downey, the golden voiced Irish tenor. I first saw him in a revue on the Century Roof, Manhattan. Ben Bard was his straight man then. As for Morton Downey, I could listen to him for hours when he starts warbling Irish melodies. Let's have Jack and Morton more of the time instead of just some of the time.

**Asking**  
 Queries from clients. Q. What shape and how beautiful must be the hands of a young woman who wants to be a hand model? A. Can't answer that definitely. However the leading "hand model" in New York is Yvonne Sergent. There is a photograph of her hands in the New York Museum of Modern Art. If you have hands somewhat similar to Yvonne you are in the hand model class. . . . Q. Was John Philip Sousa the bandmaster of Italian descent? A. Sousa was born in Washington, D.C. His father, Antonio So, a trombonist in the United States Marine Band, was of Spanish birth. It is said that So added USA to his name thus making it Sousa. As you know, John Philip Sousa began his career with the United States Marine Band. Same group in which his father played the trombone.

**Horses and Women**  
 Swaps, the Kentucky Derby winner, is a nice colt. However, let's not get hysterical yet and start referring to him as "The Horse of the Century." Swaps didn't beat much in the "Run for the Roses." Nashua is an uncontrollable horse. Summer Tan is still a convalescent horse. Jean's Joe, perhaps the best horse in the Kentucky Derby from a physical standpoint, is temperamental. He runs only when he feels like it. Some day he may feel like it and beat Swaps by several lengths.

**Doormen**  
 How much does the doorman at a top grade city or resort hotel

**Medford Building Totals Increase During Past Month**

The dollar volume of new construction in Medford last month was up 11 per cent over May, 1954, according to figures released today by the statistical department of Equitable Savings and Loan association.

The Medford total last month was \$224,210, compared with \$201,230 in May, 1954. The city's volume was up 41 per cent from the total of \$158,800 for April, 1955.

**Grants Pass Increase**  
 Grants Pass showed an 85 per cent increase last month, compared with May, 1954, and a 160 per cent increase over April, 1955. The Grants Pass figures were: May, 1955 — \$244,845. May, 1954 — \$132,190. April, 1955 — \$94,125.

Figures for Klamath Falls showed an increase of 138 per cent over May, 1954, and a decrease of 4 per cent from April, 1955. The totals were: May, 1955 — \$214,511. May, 1954 — \$90,059. April, 1955 — \$223,260.

**State Totals Up**  
 Statewide, the dollars volume was up 28 per cent over May, 1954, and up 1 per cent over April, 1955.

A figure of \$36,416,142 for all construction was reached during May for the combined 47 largest cities in Idaho, Oregon, Washington and British Columbia. During the period, greatest percentage gains came in British Columbia, Idaho and Oregon in that order. Washington, while surpassing its April volume, was 17 per cent below last May's report.

**Billy Graham Arrives In Zurich for Meetings**

Zurich, Switzerland (U.P.)—American evangelist Billy Graham arrived here last night from Paris for two religious meetings to be held next week end in Zurich and Geneva.

Graham, who drew millions to prayer meetings in Britain, attracted a total of 42,883 Parisians to the vast Palais Des Sports and won 2254 "decisions for Christ."

write it St. Louis, Mo.?" one reader asked. "Everybody knows St. Louis is in Missouri." There is also a St. Louis in Michigan. A highly indignant Californian once wrote: "Why refer to Pasadena, Calif.? Everybody knows Pasadena, the home of the Rose Bowl game, is in California." Evidently the gentleman didn't know there is also a Pasadena in Maryland.

**Models**  
 In addition to young women who are "hand models" are some who are leg models. They model nylon hosiery. Ideal leg measurements of a hosiery model are said to be: length, 32 inches; calf, 13 inches; ankle, 7 3/4 inches.
