CAUSING GREATEST TRAGEDY in history of auto racing, German Mercedes sports car driven by Frenchman Pierre Levegh, exploded after collision, killing 79 spectators, injuring approximately 100. Relatives and track officials are helping victims shortly after crash. (International)

BLUSHING DURING EXPLANATION, Senators John McClellan (D), Ark., and George Bender (R), O., watch attentively as Harry Lev, millionaire cap maker, holds out foam rubber "grommet" he invented to keep crown of military cap stiff. Lev said he got idea for invention from "falsies" used to provide curves for ladies whom nature failed to endow. (International)

Physicist Lifts Clock Watching To New Heights

Washington — (U.P.) — It's never later than you think Dr. Zoltan Bay, a nuclear physicist who is lifting clock-watching to new heights.

Bay and a small corps of

scientists at George Washington University have a "clock" origi-

minated by him that is ticking off tomorrow as it solves the secrets of an atom nucleus.

Their piece of scientific wizardry doesn't measure minutes and hours. It tells time at the rate of one one-hundred-billionth of a second.

That's as fast as the speed of light, fastest traveler known to man. (It takes light only about one second to get from earth to the moon.)

The measurement also is "10 times less time" than can be clocked by any other gadget—

as small a part of a second as one second is to 10,000 years.

The one-of-a-kind "clock," un-

der Navy contract, enables scientists to chart the myster-

ious energy changes of a nucleus from an "excited" or higher-

than-normal state, to the "ground" state and to note the time spent in that step.

In 10 years?

Gamma rays emitted during the change give off electric shocks which the clock is triggered to count.

If that sounds simple
