You Must Be Satisfied or Your Money Back

Come In and See Filter-Flo Demonstrated

GENERAL  ELECTRIC

You can buy with confidence. You know that you pay the same **LOW** price as everyone else. You know that you will receive what your old piece of equipment is actually worth. We believe you will agree with us when we say, "The cash difference is the only important price." Payments to fit your needs.

HOW THE NEW G-E FILTER-FLO SYSTEM WORKS

This new General Electric washer circulates and filters the water at the rate of six gallons per minute . . . to give you whiter, brighter clothes.

As the Filter-Flo System circulates the water, sand, soap-scum, and lint are removed to let only cleansed sudsy water flow back into the washbasket.

Big capacity, too! This G-E has 50% more clothes capacity than many other automatics. You're not forever splitting a big wash into two separate loads. And the Water Saver Control lets you select any water level from 17 down to 11 gallons of water for small washes.

1. Dirt loosens as clothes are individually dipped, flexed, and cleansed by thorough G-E Activator Washing Action.
2. Floating lint and soap scum are carried away as washbasket continuously overflows into outer tub.
3. Heavy sand and silt are flushed out here.
4. Pump continuously forces water up and through filter and (5) back into washbasket.

The original tub of water is filtered clean five times during one wash cycle.

Five Year Protection Plan

One year written warranty against defective materials and workmanship on the entire washer. An additional four-year warranty applies to the Sealed-in Transmission Parts.
