

## Senator Morse To Meet With Conservation Workers Here

When U.S. Sen. Wayne L. Morse comes to southern Oregon early next week he will meet with conservationists and a group of citizens interested in the promotion of the Talent project, it was announced today.

The special gathering has been arranged for late afternoon Monday, July 4, at Hanleylands on Ross lane, with Mrs. E. B. Hanley acting as hostess for her daughter, Mrs. Hanley Heffernan, member of the board of supervisors of the Rogue Soil Conservation district, who is on the coast convalescing from a recent illness.

### Shows Accomplishments

Hanleylands is an illustration of what can be done in the Rogue River valley with water, district spokesmen pointed out in announcing the meeting. Water development was pioneered there with only a small supply of water apparently available.

The Hanley ranch on Jackson Creek, is in one of the major problem drainage areas of Jackson county, second only to Bear Creek and the river, which does not fall into the small watershed program. It will be shown to Senator Morse as an example of what is being done at the grass roots level.

There will be a general discussion of the overall conservation program and a demonstration of what the people here consider their problems in conservation within the small watershed program.

### Officials to Attend

Clem Ault, of the United States Soil Conservation service, and W. B. Tucker, county agent, will be present to discuss certain technical aspects of the program.

The major projects at Hanleylands include water development, which is being accomplished independent of irrigation projects; creek bank stabilization; one of the serious erosion problem areas of the county; land leveling; seeding of new

## Josephine County Juveniles Arrested

Grants Pass — Max McMillin, Josephine county district attorney, aided city and state police and the sheriff's department in arresting 18 juveniles, ranging from 13 to 17 years of age, in a curfew enforcement drive last week end.

The district attorney, in an announcement last week, declared that a drive would be made to curb juvenile delinquency by enforcing more strictly the state juvenile curfew law. The law prohibits minors from being in public places between midnight and 4 a.m., unless accompanied by parents or other authorized adults.

"This was not a 'one shot' effort," McMillin said. "Enforcement of the state juvenile curfew law will be a continuing policy with all law enforcement agencies in Josephine county." The 10 boys and 8 girls were taken to the city police department where they were held for their parents.

### Teamsters Conducting Western Conference

Los Angeles — (U.P.) — Delegates to the 19th AFL Western Conference of Teamsters conferred in business sessions today as the five-day gathering reached its mid-point.

An industrywide pension plan that eventually would cover all members of the union is one of the major projects under discussion, according to Frank Brewster, president of the Teamsters.

Brewster said the immediate goal is \$75 a month, a figure he expects will be doubled in a few years.

Gov Goodwin J. Knight is scheduled to address the conference tomorrow in the Biltmore ballroom.

An average American starting work today has a prospect of about \$150,000 as a lifetime income, according to figures compiled by the Institute of Life Insurance and other agencies.

pasture grasses and legumes, and development of habitat for wild life, coinciding with the overall conservation project.

Advocates of the Talent project feel they will be able to give Senator Morse some valuable first hand information on the situation at the grass roots level to aid him in the valuable support he is already giving the project, Mrs. Henley said.

### Representatives Invited

Mrs. Hanley hopes to have present representatives of the boards of the three irrigation districts of the county, members of the Jackson county court, representatives of the boards of supervisors of the several conservation districts in southern Oregon, representatives of sportsmen's groups, and Dr. Elmo Stevenson, president of Southern Oregon college, one of the valley's recognized and most ardent conservationists.

Assisting Mrs. Hanley as hostess will be Mrs. Seabury M. Wood, Palo Alto, Calif., the former Edgaria Webster of Seattle and Los Angeles, who is spending some time at the Webster orchard in the valley, and Miss Claire Hanley, president of the Oregon Federation of Garden Clubs.

Mrs. Hanley is former chairman of the horticulture committee of the Seattle Garden club and one of the original members of the Washington State Conservation society.

## Report on Speech And Hearing Clinic At College Given

Ashland — A report on the activities of the Southern Oregon college speech and hearing clinic during the past school year has been given by acting-director, Dr. Donald Wilson.

Diagnostic speech clinics were held in 43 schools of Jackson, Josephine and Curry counties. A total of 395 speech examinations, including parent and teacher consultations, were provided the children in these schools. "The public has become increasingly aware of the speech services that are available for school age children, through radio and television programs, newspaper articles, parent meetings, and through interest shown by teachers and parents who follow-up the speech clinic meetings," Dr. Wilson said.

"Parents are gradually recognizing that some children must have special help to master the complicated sounds of American English, especially after faulty habits have become established," he added.

One of the primary purposes of the speech and hearing clinic has been to show parents what can be done and to enlist them as helpers in improving the speech of their children.

The campus speech clinic at SOC provided speech therapy on a continuing basis to 10 children during 1954-55. A short-term type of therapy was given to 14 additional children, while diagnosis was provided for 17 others during the same period.

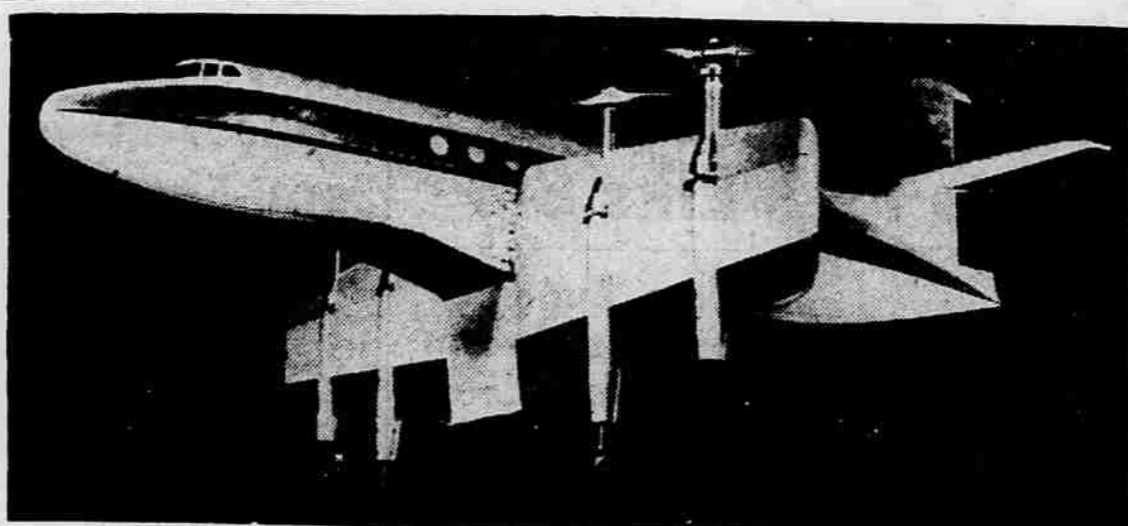

## Bill Graham To Have Audience With Queen

Dortmund, Germany — (U.P.) — Evangelist Billy Graham leaves for Holland today and an audience with Queen Juliana.

His visit to the Netherlands is the next stop in his cross-Europe crusade for Christ which is attracting followers in record numbers.

The North Carolina preacher drew an estimated 30,000 listeners to the huge steel and glass Westfalen Hall here last night. A member of his team said it was the largest indoor crowd Graham has ever preached to anywhere in the world.

When a domestic electric light bill runs to three cents a kilowatt hour, it can be assumed that one pound of coal will produce about 13 cents worth of energy at the utility's switchboard.

STRAIGHT UP AND—AWAY!—Scale model (above) of an airliner able to take off and land vertically has been test-flown successfully at Ames Aeronautical Laboratory at Moffett Field, Cal. Wings move into horizontal position for normal flight. Plane would carry 50.

## Air Force Reports New Advances in Guided Missiles

Washington — (U.P.) — The Air Force today reported "some advances" in developing an intercontinental ballistic missile against which there is no known defense.

In a semi-annual report to President Eisenhower and Congress, Air Force Secretary Harold E. Talbott made only a cryptic two-line reference to the ocean-spanning missile. He reported some progress on the weapon and then described it as being "of critical importance to the basic security of the United States and the free world."

Russians Work on Missile  
A true intercontinental ballistic missile could travel above the atmosphere about 10,000 miles per hour. Armed with a hydrogen warhead, it could wreak untold devastation. Russia also is believed to be working on such a weapon.

Talbott also said this country's B52 jet hydrogen bomber is the "best in the world." He added that the Air Force is steadily developing "newer and better" aircraft and guided missiles.

His statement came in the face of widespread concern in Congress over Russia's recent displays of airpower, including a formation of heavy bombers similar to the B52. The American bombers will begin going to combat units in a few days.

Sen. Henry M. Jackson (D-Wash.), said yesterday he fears Russia is making such "ominous and unexpected strides" in airpower that it will have superiority over this country within five years.

## Israeli Premier, Government Resign

Jerusalem, Israel — (U.P.) — Israeli Premier Moshe Sharett and his government resigned today.

President Isaac Ben-Zvi immediately called in party leaders for consultations in an effort to form a new government.

Sharett quit because the General Zionists refused to vote with his Mafai Party to stave off a no-confidence vote in the Knesset (Parliament) last night on the "Kastner case."

The General Zionists and the Mafai have been governing in coalition. But the General Zionists refused to support Sharett's party in the controversy and Sharett quit less than a month before Israel's scheduled July 26 elections.

### Youthful Logging Worker Killed

Swishome, Ore. — (U.P.) — A 19-year-old logging worker was killed near here yesterday afternoon by a rolling log.

The victim was Robert Crabb, 19, son of Mr. and Mrs. Perry Crabb, Greenleaf, Ore. Crabb was trying to fasten a cable to a log on a hill when a log above him dislodged and rolled over him.

A distance of 2897 miles separate Point Arena, Calif., and West Quoddy Head, Maine — the widest part of the United States.

## Chessman's Book Contains Praise For Jail Officials

New York — (U.P.) — The book which convict-author Caryl Chessman smuggled out of San Quentin prison contains only praise for the prison authorities who confiscated the original copy of the manuscript.

The villains in the book, just off the press in New York, are the prosecutors and judges who have blocked Chessman's efforts to escape death in the gas chamber, and society in general which persists in using capital punishment even after it has been proved — in Chessman's view — "a tragic, senseless, meaningless failure."

Chessman says he hopes his book will help "fire the social imagination" to find some other means of handling murderers, kidnapers and rapists.

Prentice-Hall will publish the new Chessman work "Trial by Ordeal," on July 11, four days before the scheduled execution of the author. His earlier book "Cell 2455, Death Row," became a best-seller last year.

A pre-publication copy of the book shows that Chessman thinks highly of San Quentin Warden Harley O. Teets and California director of corrections Richard A. McGee. He describes both as good and fair men "dedicated to serving the best interests of society."

Chessman's attorneys plan to seek still another stay of execution by the U. S. Supreme Court between now and July 15. This, and the unlikely possibility that the governor of California would commute his sentence, are his only possible hopes to stay alive.

## \$371,000,000 Plan For Street Work in Portland Outlined

Salem — (U.P.) — The State Highway Commission today studied a 20-year comprehensive plan for handling an expected 150 per cent increase in traffic in the Portland area during the next 20 years.

The program would cost \$371,000,000. It calls for five new bridges, widening of two others, 14 freeways, 14 expressways and 24 major streets.

Not Necessarily Final  
R. H. Baldock, state highway engineer who presented the plan said it is not necessarily final but would give the people "something to shoot at."

Baldock's report said about \$40,000,000 of the cost has been provided or will be available in the next two years.

The report recommends 96 miles of freeways, 74 miles of expressways and 120 miles of major streets, many with raised center strips for parking.

Started in January  
The 151-page report has been under preparation since last January. It brings up to date a master plan prepared by the state in cooperation with the city of Portland in 1944 and restudied in 1949.

The Portland City Planning Commission has estimated that 505,800 persons will live in Portland by 1975, compared with about 402,000 at present.

## Butte Falls Bible School Will End

Butte Falls — The Vacation Bible school at Butte Falls will hold a program Thursday at 7:30 p.m. at the Assembly of God church. Children who have been attending Bible school at both the Community Bible and Assembly of God churches will participate. Friday will be the final day of the school and the children will receive their diplomas.

Nearly 60 attended the school last week, with a variety of activities such as music, stories, outdoor games and handwork. Juniors and intermediates have tooled copper plaques which they will display Friday.

The work has been organized on a community-wide basis. Except for Mrs. Virgil Musgrave, Eagle Point, and Mrs. Richard Bower, Beaverton, teaching the staffs are local people. Some of the workers are Mrs. John Fuiten, Mrs. James Wright, Mrs. Harry Dalton, Mrs. Britten Ash, Mrs. Roy Price, Mrs. Clyde Moore, Mrs. Don Smith, Mr. Howard Simmonds, Mrs. Ted Fredenburg. Girls who have helped with playground or handwork are the Misses DeLores and Kay Brown, and Bonnie McKean.

## Holiday Accidents Expected To Take Total of 380 Lives

Chicago — (U.P.) — The National Safety Council estimated today that 380 Americans will die in Fourth of July highway accidents during the "biggest holiday on wheels in America's history" next week end.

The council predicted that 40,000,000 vehicles will be on the move during the three-day holiday. It pleaded for extra caution to prove that the council's estimate was too high.

### Need Safe Drivers

"More travel does not have to bring more accidents," Ned H. Dearborn, council president, said. "All we need is more safe drivers. When you start out this week end, make up your mind to prevent just one accident—the one that may involve you!"

The council's estimate covers traffic deaths that occur from 6 p.m. (local time) Friday to midnight Monday.

### Accident Insurance

To insure themselves against accidents, the council urged drivers to:

1. Travel at about 10 mph below normal speeds.
2. Start trips early enough so that they won't have to rush to reach their destinations.
3. Stay alert.
4. Don't compete with other drivers.
5. Pass only one car at a time and allow a clear margin of safety.
6. Slow down at sundown so their cars can stop in the range of its headlights. Don't drive when sleepy or overtired.

### Egyptian-Israeli Meet Continues Near Gaza

Gaza — (U.P.) — Egyptian and Israeli officials met today in the "No Man's Land" between Egypt-held Gaza and Israel in the attempt to negotiate an end to the bloody border incidents that threatened to touch off a full-scale war.

It was the second meeting in the talks sponsored by the United Nations. Yesterday's opening session lasted more than six hours. The fact that the talks were continuing was interpreted on both sides as a hopeful sign.

### Pope Pius Blesses Feast Day Audience

Vatican City — (U.P.) — Pope Pius XII today blessed a throng of more than 100,000 persons who flocked to St. Peter's Square to mark the feast day of the first pope of the Roman Catholic Church.

The 79-year-old pontiff appeared at the window of his study to impart his benediction to the crowd which gathered in the damened cobblestones below. The sun broke through the rainy skies as the Pope appeared.

The feast of St. Peter and St. Paul drew one of the greatest June 29th throngs on record and one of the largest crowds of the year to the basilica and square which bear St. Peter's name.

## Britain Sends Arms To Strife-Torn Isle

Nicosi, Cyprus — (U.P.) — Britain flew extra arms to this strife-torn island colony today to combat a new outbreak of terrorism.

Police Commissioner M. Robins announced that fresh supplies of small weapons and ammunition were dispatched to strengthen the police force.

The move followed skirmishes by terrorists who cut telephone lines between Laphios and Kyrenia Tuesday night. It was the first anti-British action since last week when supporters of the Enosis movement threw bombs at British troops and attacked several police stations. The Enosis movement wants union with Greece.
