

Three Army Men Called in Trial Of Draft Adviser

Brattleboro, Vt. — (U.P.) — The government today summoned three army men into U. S. District Court to testify in the trial of a 44-year-old mother accused of advising them to dodge the draft.

The defendant, Mrs. Lucille Miller of Bethel, a housewife, went on trial today before a jury of seven women, all housewives, and five men. The jury was selected yesterday before Judge Ernest W. Gibson.

Advised To Refuse Service

Mrs. Miller is charged in 18 counts in two indictments with counseling young men to refuse service in the armed forces and to turn over their draft cards to her.

"We've been wanting to make a test of peacetime conscription," the stocky defendant said. Her attorneys said the defense will be based on the constitutionality of the draft law.

Free on \$1000 bail, Mrs. Miller and her husband, Manuel, 46, plan to commute the 80 miles between here and their Bethel home every night to care for an eight-year-old son and twin 10-year-old daughters.

It was at their Bethel home last May that the couple held off federal marshals trying to take Mrs. Miller to a mental hospital. The couple was forced from their home with tear gas during the 12-hour siege.

Miller, a former Bethel selectman, is free on \$10,000 bail awaiting trial on charges of obstructing justice.

Mrs. Miller was released from the Washington, D. C., mental hospital on a finding that she was sane and capable of defending herself against the charges. She faces a maximum penalty of five years in jail and a \$10,000 fine if convicted.

Enemy Property Brings \$11,000,000 To Treasury

Washington — (U.P.) — The government collected more than \$11,000,000 during the first half of 1955 on income and sales of enemy property seized during World War II, Asst. Atty. Gen. Dallas Townsend said today.

The figure was almost double the amount received in the first six months of last year, Townsend reported.

Set Back, Zone Plans Talked by Commission

The city planning commission last night, in addition to discussing two proposals for annexation, recommended to the city council that a set back conforming with other set backs on Eighth st. at Orange st. be granted. Homer J. Bringle requested the set back on West Eighth st. and no one appeared at a public hearing before the commission.

The commission made recommendations that change of zones in Queen Anne addition and on East Jackson st. between Hawthorne and Genesee sts. be denied. Both requests were referred to the commission by the city council for reconsideration.

The Queen Anne addition involved property at the corner of Crater Lake ave. and East Jackson st. from "single" to "multiple family" dwelling.

Charles Gould, 916 East Jackson st.; John Graves, 920 East Jackson st.; and Champ Pitts, 915 Queen Anne st., appeared to object. They said rezoning the corner would constitute spot zoning, and desired to keep the area for single family residences.

The East Jackson st. change from "multiple family" to "commercial" is between Hawthorne and Genesee sts. Several people also objected to the change on grounds that it should remain residential and would not like to have businesses established near Hawthorne park.

A. D. Harvey, a member of the commission, pointed out that East Jackson st. is part of Medford's arterial street program, and businesses should be kept to a minimum. He said once the commission started rezoning the south side of East Jackson st. to business, then other requests would have to be granted.

Call Hearing

The commission called a hearing for next meeting on a request to change from "residential" to "commercial" an area along West Jackson st. between Welch and Narregan sts. A committee report recommending the change be denied was received by the commission.

A hearing also will be held at the next meeting on a request from Herb Morris for a set back from 20 to 10 feet along Reddy st. Allen Perry and W. H. Fisher were appointed a committee to study the request and report at the next meeting.

The commission also discussed deleting the word "structural" in ordinances governing non-conforming zones to control alterations of non-conforming businesses. Also discussed was a possible time limit on non-conforming zones, under which those zones would be reviewed upon duration of the time limit and possibly rezoned to the district most applicable.

CONSTRUCTOR'S SON DIES

San Sebastian, Spain — (U.P.) — Paul de Lesseps, constructor of the Suez Canal, was to be buried today. He died Monday of a heart attack. He had been living here as a political refugee the past seven years.

Ike Promises Report On Geneva Progress

Washington — (U.P.) — President Eisenhower promised Republican and Democratic leaders of Congress today that he would make "frequent progress reports" on the Big Four summit conference at Geneva next week.

The White House announced that the President also told a group of 25 legislative leaders at a White House conference that he will give them "an appraisal" of the accomplishments of the Big Four meeting when it is over.

The lawmakers conferred with Mr. Eisenhower and Secretary of State John Foster Dulles for nearly two hours on plans for the momentous conference opening in Geneva Monday.

The leaders reported general unanimity of views at the meet

One Shelf Displayers Gilded Wire Finish (used in our display department) Lower Floor

Feel like you're driving with the hand brake partly on?

Only Shell Premium with TCP* overcomes combustion chamber deposits to give your engine the full benefits of high octane gasoline

Within 2000 miles a high compression engine has built up engine deposits. These deposits cancel out some of the power and economy the engine should get from high octane gasoline.

And the more "around-town" driving you do, the more these engine deposits can drag down engine power.

In the combustion chambers these

deposits glow red hot and burn the gasoline before the piston is ready for its power stroke. This is called pre-firing—a major cause of engine knock and power loss.

These deposits also short-circuit spark plugs and cause them to "miss." Power falls off. It's almost like driving with the brake on!

But there's one high octane gasoline that gives you all the benefits

of high octane power without the harmful effects of engine deposits!

Before you've used two tankfuls, Shell Premium with TCP additive will re-power your engine by overcoming the deposits that cause the pre-firing. It also keeps deposits from causing spark plug "miss."

Enjoy the full power built into your engine! Start using Shell Premium with TCP today.

*Shell's Trademark for this unique gasoline additive developed by Shell Research. Patent applied for.

Only Shell Premium Gasoline has both TCP and High Octane!
