

GOT THOSE DIRTY DISHES BLUES?

Ask this question of any woman who has a modern Dishwasher and she will tell you, No! She's thrown her dishpan away! — Yet most homes do not have a Dishwasher. Why do these families continue to do this work 3 times a day—every day of their lives—without the help of a Dishwasher? Women are still skeptical about the time it saves—about its ability to handle pots and pans—what it will do with fine chinaware— that it leaves glassware spotted— wastes hot water— etc. By thinking these things women are denying themselves one of the most completely satisfying appliances yet designed!

**Do Dishwashers Save Time?
Yes They Do!**

A dishwashing job that would take 45 minutes by hand can be done in 10 minutes by using a dishwasher!

**Do You Have To Rinse Dishes First?
Definitely Not!**

Dishes need merely to be scraped before putting them into the racks.

**Do Modern Dishwashers Leave Glasses Spotted?
Not unless you have a water problem.**

Water in Medford never caused this problem. Water in the Medford area rarely causes this problem!

**Do Dishwashers Break or Chip Dishes?
Practically never**

Dishes rest on cushioned racks and do not move. Considerably less breakage than by hand!

**Do Dishwashers Fade Colors on China?
Yes -- In some cases**

China decorated with overglaze colors will be affected by hot water. Of course they will eventually fade, even by hand dishwashing. Any dishes with underglaze colors can be washed without any trouble!

**Can Plastic Dishes Be Washed Safely?
It depends on the plastic --**

Most plastic dinnerware is perfectly safe in a dishwasher and you will be told this when you buy the dishes!

**Are Dishes Cleaner and More Sanitary When Washed in a Dishwasher?
Absolutely!**

It stands to reason that dishes washed in water much hotter than hands can stand will be more sanitary. Bacteriological tests prove this!

**How About Pots and Pans?
The story is simple --**

Pots and pans reasonably free from stuck-on or charred food can be washed in your dishwasher!

**How Much Hot Water Does a Dishwasher Use?
Relatively Little--**

Dishwashers use about 6 gallons— less than the amount of water necessary to fill most sinks!

**And So How Much Work Does a Dishwasher Do?
We think that it does plenty--**

A dishwasher will do one of the most irksome jobs in housekeeping and does it better! A dishwasher ranks with an automatic clothes washer in giving a woman a more gracious way of living!

**But It Costs Money To Buy a Dishwasher
Yes, It Does --- but really such a SMALL amount
YOU CAN ACTUALLY BUY A DISHWASHER FOR AS LITTLE AS**

**34¢ A DAY!
ON A TWO-YEAR CONTRACT**

Men, would you allow your wife to take a job washing dishes for your neighbors for \$2.50 a week?

Your wife works at least one full 8 hour work day each week doing this menial and tedious job for you when she could have a Dishwasher for only \$2.50 a week.

Dishwashing is the last job a man will take to keep from starving — and the first job he will quit!

In order to prove that what we say about Dishwashers is true — We are offering a
