#### ARTHRITIS IS NOT RHEUMATIZ

In the pamphlet *Young Folks and Old Folks I say*: NUTRITION means mastication, digestion, assimilation, oxidation or combustion of food to produce heat and energy (metabolism); utilization of material thus absorbed to repair wear and tear and build new tissue (growth); and discharge of waste, ash or by-products by expiration, perspiration, urination and defecation.

In the pamphlet *Yankee Stomach I say*: I DO NOT CONTENT that if all of your teeth are in good functional condition, you will be immune to stomach trouble. I do believe that people who keep all their teeth working efficiently rarely suffer from gastric disturbance characterized by hyperacidity, hunger pain, heartburn, acid eructations, waterbrash, uneasiness from fullness after eating, bloating by gas, and general crankiness, impatience and irritability engendered by these discomforts.

In the pamphlet *Calcium and Rheumatism*—(rheumatism, if you please, not rheumatoid)—I say: IF OR WHEN joint disability

### MOO-O-O'S AND MUSINGS

According to Doc Brady, 9 out of 10 people who smoke buy tobacco in one form or another.

The tenth one just stands around and bums cigarettes from the other nine.

1440 "THE VOICE and CHOICE" of the Rogue Vacation Land

Lest credulous customers assume that this means one must faithfully brush one's teeth with some snappy dentifrice consisting essentially of glorified soap, I beg to remind you that among the millions of Americans who brush their teeth regularly it is hard to find one whose teeth have not decayed, while among the hundreds of inhabitants of Tristan da Cunha who had absolutely no use for toothbrushes or dentifrices it was hard to find a man, woman or child with any sign of tooth decay — in 1950, that is. I'm afraid the establishment of a canning factory there to market the abundant fine quality lobster (crayfish), with the new "store" where the natives could get refined white flour, white sugar, candy and other cheat-foods, dooms the inhabitants to go the way of all "civilized" people.

The way to save your teeth is simple enough: Keep your nutrition better-than-average, optimal; and have treatment by your dentist early and often enough to prevent loss of teeth — but if you neglect your teeth and have to lose one or more, see that the dentist replaces it immediately with a functionally efficient denture.
