

ORDINANCE NO. 6248
 AN ORDINANCE declaring the assessment on the property benefited by the laying of a six (6) inch water main on Jackson Street from Genesee Street to Hawthorne Street in the City of Medford, Oregon, and directing the Recorder to enter a statement thereon to the Docket of City Liens and publish a notice thereof as required by the Charter.

THE CITY OF MEDFORD DOTH ORDAIN AS FOLLOWS:
 Section 1. Whereas the City Council did heretofore by Resolution declare its intention to lay a six (6) inch water main on Jackson Street from Genesee Street to Hawthorne Street in the City of Medford, Oregon, and to assess the cost thereof on the property fronting on said portion of said street in proportion to the frontage of said property, and did fix a time and place for hearing protests against the laying of said water main on said street and the assessment of the cost thereof as aforesaid;

And Whereas said Resolution was duly posted and published as required by Section 115 of the Charter of said City, and a meeting of the Council was held at the time and place fixed in said Resolution for the purpose of considering any such protests but no protests were at that time made or received by the Council to the laying of said water main or the assessing of the cost thereof, and said Council, having considered the matter and deeming it of material benefit to said City, and that all the property to be assessed thereon will be benefited to the extent of the probable amount of the respective assessments to be levied against said property, did order the water main laid.

And Whereas a summary of the cost of the said water main is as follows:

Construction Cost	\$797.96
Advertising	27.78
Notice of Assessment	24.21
Engineering	53.76
Interest on Warrants	9.05
Amount to be Assessed	\$913.82
Property frontage assessed 404.00 feet	
Cost per linear foot of frontage to be assessed	\$2.26

The cost of said water main to be assessed has been and hereby is declared to be the sum of \$913.82. WHEREFORE, it is hereby further determined that the proportionate share of the cost of laying said water main on the property fronting on said portion of said street is the amount set opposite the description of each piece or parcel of land below and that each such piece or parcel is benefited by the laying of said water main to the full extent of the amount so set opposite the description of such piece or parcel and that the respective amounts represent the proportional benefits of said water main to said respective parcels of property and also the proportional frontage thereof on said portion of said street, and the Council does hereby direct each of the parcels of property in the City of Medford as described below to be assessed and each of the same hereby is assessed the amount set opposite each respective description for the cost of laying said water main:

Vacant Field Serves As Customer Airport

Cleveland, O. — (U.P.)— Joe Reithoff's barber shop at near-by Auburn corners has a back door opening onto a vacant field. That fact got him one customer and may get him more.

An amateur pilot, Richard Komin of Chagrin Falls, made a mental note of the field one day as he flew over because it looked like a good emergency landing place.

Then he discovered that Reithoff's barber shop was next to it. He decided his shaggy head of hair was an "emergency," landed on the field and taxied right up to the back door.

Reithoff thinks the idea might spread—if enough barbers have vacant fields.

Same License Number Shared For 44 Years

Chicago — (U.P.)— Two employees of the Powers Regulator Co. in suburban Skokie have had the same license plate numbers for 44 years.

Elmer W. Reitz of Highland Park, Ill., export manager of the firm, and Paul Charles, Winnipeg, Manitoba, Can., first received their respective numbers every year since. Reitz has plate 179 from the province of Manitoba.

Both have their old plates on their garage walls, but neither knew of the other's collection, though each had worked for the Powers Co. 35 years, until a recent chance conversation.

Lakeview Uranium Find Said Significant

Lakeview, Ore. — (U.P.)— A state geologist says the recent uranium find in the August Creek area 12 miles from Lakeview is "significant" in that the ore was found in types of volcanic rocks which had not been known to contain the radioactive material.

Max Schafer of the state bureau of geology said that "at the very least a small amount of commercial" ore has been found in the mountainous area which is teeming with an estimated 500 uranium seekers.

The uranium strikes, richest found in Oregon to date, are reported to be in the form of a yellow-green film deposited in fractures in rocks, or a crystalline material found in rock openings, or in the form of altered volcanic rocks.

Uranium fever is spreading in southeast Oregon, and the Lakeview Lumber company reported it had run out of four-by-four lumber for claim staking.

Many Good Ideas for Quicquics

Make picnics any time, spur-of-the-moment thing and bring joy to the children. Take a lunch in a basket to back-yard, picnic park, nearby pool edge being sure there's an expert "lifeguard" standing by. No chore at all to plan a quicquic once you get organized like this:

Keep handy paring knife, salt and pepper, mustard, mayonnaise, sugar and cream, spoons, knives, forks, paper plates and containers loads of paper napkins; maybe some frozen concentrated lemonade.

Consider hot soup for a first course. It will carry safely, prove satisfying when poured from a thermos. Especially good if other food consists of sandwiches and salad.

Preacher on Air for 15 Minutes, 26 Years

Houston, Tex. — (U.P.)—Rev. Charles C. Hard is well on his way to his 10,000th 15-minute daily radio sermon.

He's just past the 9,500 mark in his 26th year on the air.

The 66-year-old minister conducts scripture reading and hymns, offers a prayer, short sermon, and benediction while accompanying himself on the organ.

In turn he is accompanied by three pet canaries—Matthew, Mark and Luke.

Where's John?
 "He got out of his cage one day years ago," Rev. Hard explained.

The chirping canary choir has added much to the homey appeal of his early morning program which is one of the most popular of radio church programs in the Houston area.

Klamath County Court Hikes Salary of DA

Klamath Falls — (U.P.)— The Klamath county court has agreed to supplement the yearly salary of its district attorney, thereby raising the total salary to \$7500. The court also raised the first deputy's salary to \$5000 and that of the second deputy to \$4200.

The action was taken despite the court's opposition to Governor Paul Patterson's action in naming former Deputy District Attorney Richard Beesley to succeed Frank Alderson as the chief prosecutor and ignoring the court's recommendation.

Francis Wolle invented a machine to make paper bag containers in 1852.

bread and butter sandwiches. Fish and Shellfish afford fine meal variety. Abundant supplies of fresh fish with high level production of halibut from North Pacific fishing grounds joining heavy supplies of frozen halibut keep prices for this fine fish quite reasonable. Good supplies of salmon, smelt, flounders and sole from northwest waters with barracuda, lingcod, rockfishes, flounders, swordfish and shrimp predominating from southern coastal waters.

Vegetable plentiful are many. When menu planning, consider cauliflower, cabbage, celery, beets, cucumbers, corn, carrots, lettuce green and dry onions, radishes, tomatoes, spinach, squash.

Fruit Situation. Plenty of cantaloupes, watermelons; good berry variety, handsome cherries, apricots, peaches, nectarines and plums at moderate cost. No bargains such as we used to anticipate before commercial freezers came along.

Other Items. Abundant, economical rice, canned grapefruit sections, good values in cheddar cheese, salad oils, processed (frozen and canned) lemonade; big honey crop!

Peak of the watermelon season is here and they were never sweeter, it seems. Usually sliced and served fresh and cold, they're increasingly popular in colorful melon balls in fruit cups, dessert specially often combined with other melons and offered guests from scooped-out melon half. Never add ice to melon balls or fill melon centers with ice because it dilutes their delicate and perfect flavor.

Cantaloupes are plentiful, reasonable. Honeydews, honeybells, Cranshaws and Persians are available; cost more.

Ice cream, America's favorite dessert is unusually plentiful due to high milk production. Now available at practically all grocery stores as well as at drug store fountains, confectionery stores and all eating places, vanilla, chocolate and strawberry flavors continue to represent nearly three-fourths of all ice cream produced. Of major interest to homemakers is fact that about one-fourth of all ice cream manufactured today is sold in the half-gallon unit. Plain or fancy, the family will enjoy ice cream any time of day or evening.

Broilers and fryers are more plentiful than usual at this time of year; of generally high quality, they make mighty good eating indoors or outdoors, freshly fried or barbecued or cold with

What if all the labels were ripped off?

Be pretty confusing, wouldn't it? You'd never be sure of what you bought until you got it home and tried it.

That kind of experimenting would be not only confusing but expensive. Because when you buy as much as you do, you can't afford buying mistakes.

And so, like most buyers, you've learned to follow the first rule of safe and sound buying:

A good brand is your best guarantee

You know you can count on a good brand. The maker stands back of it. And so you know you're right whenever you buy it.

The more good brands you know the surer you are about buying. You'll find lots of them in this newspaper. Let them help you cut buying mistakes—get more for your money.
