# Cadillac

## The Great Practical Luxury!

This message is addressed particularly to those who have been thinking about purchasing a Cadillac—but who, for one reason or another, have not considered acting on the impulse this year.

For you, there is interesting and valuable information in the paragraphs which follow.

In the first place, there is no reason why anyone should ever put off ordering a Cadillac—once the decision for ownership has been made. For a Cadillac represents one of the soundest and most practical investments in the automotive world.

You can become the owner of a new 1955 Cadillac for little more than you would pay for many so-called medium-price cars—often within a very few dollars.

And this is only half the picture, insofar as cost is concerned. For when the time comes to sell your Cadillac, you will find that the car has held its value far beyond anything you could logically expect.

Authoritative price figures, based on year-after-year studies, reveal that a Cadillac will return its owner a larger share of his original investment than any other motor car built in the land.

And then consider Cadillac's economy of operation and upkeep.

The car will run as far on a gallon of gasoline as most standard automobiles—and it is so soundly built and so soundly engineered that it is all but free from any save the most routine service requirements.

And here is the most interesting news of all: If you act quickly, the chances are that you can get early delivery of a 1955 Cadillac!

True, we have a backlog of Cadillac orders—but many of these are for future delivery or for special combinations not now available.

So—if you have thought of owning a Cadillac—come in now. Because of our low used car inventory, we are in an excellent position to make you a liberal allowance on your present car—and, as we said, you can probably get your new car much sooner than you have believed possible.

We have a Cadillac waiting to give you the most thrilling demonstration of your life. Why not come in today?
