

Atlantic Coast States Making Preparations for Giant Hurricane

RUSS POWER STATION—Soviet scientists revealed that their nation has been generating power from atoms. A report at the Geneva conference contained the drawings presented here. Numbered designations are the Russians.

Burial of More Villa Gold Loot Disclosed

Brawley, Calif. (U.P.)—Miss Dolores Vasquez, 76, who disclosed locations in Texas where Mexican revolutionary Gen. Pancho Villa buried \$1,500,000 in gold coins, told today of additional riches buried in Mexico.

The trail spinner, a former colonel who commanded Villa's women's forces, said she knows of scattered hiding places of \$8,000,000 in gold and silver bullion in Mexico.

"I don't dare tell the exact places," she said, explaining she feared reprisals from Villa's men still living. One huge cache of gold bullion and silver bars is hidden in a cavern in Mexico, she said.

Miss Vasquez was released yesterday from the hospital where she had been taken with heat prostration. While there, she believed she was near death and dictated a "will" leaving the treasure to "disabled veterans."

Ever wish you could wave goodbye to the stay-at-homes on shore?

FLOWERS IN STATEROOMS... champagne, confusion and telegrams! An exciting send-off for the vacation of your life! Everybody deserves at least one trip to far-off lands—to see exciting travel spots—to visit old friends and relatives—to make a lifetime of memories. Don't you wish you were taking off? The shortest route between you in your armchair and you in a deck chair is via the Payroll Savings Plan.

Join the Payroll Savings Plan where you work. Tell your company pay office how much you want to save each payday. They'll save out that amount from your check before you have a chance to spend it. Then, when enough money accumulates in your account, they'll buy you a U. S. Series E Savings Bond. That's when your nest egg really starts growing. When held to maturity (9 years and 8 months) each Series E Bond pays an average of 3% per year, compounded semiannually. And now, with the automatic extension privilege it will go on paying that same fine interest for 10 more years. That means a return of up to 80% more than you originally invested.

By investing regularly in U.S. Savings Bonds, you can easily get that long awaited ocean trip... that down payment on a new home... or other important savings goals. For example, save just \$5.00 every week through the Payroll Savings Plan. In 5 short years you'll have \$1,367—enough to take you where you want to go.

Join the Payroll Savings Plan today! If you're self-employed, start investing regularly in United States Savings Bonds where you bank!

The U. S. Government does not pay for this advertising. The Treasury Department thanks, for their patriotic donation, the Advertising Council and

Connie Slows Pace As Carolinas Put On 'Critical' Alert

Miami (U.P.)—The Atlantic Seaboard began making serious preparations today for a giant of a hurricane that was lumbering through the Atlantic almost 500 miles offshore.

Hurricane Connie had slowed her pace to 10 to 11 miles an hour.

Coastal areas of North and South Carolina were put on "critical" alert for the next 12 to 24 hours although the Miami Weather Bureau acknowledged that the big blow's course could swing away from the mainland. Encampment Interrupted

The North Carolina Air National Guard abruptly interrupted its annual encampment at Savannah, Ga., ahead of time and flew for home because of the storm. The encampment will be resumed when hurricane danger is over.

In midmorning, the hurricane center was 470 miles east of Jacksonville, Fla., and 370 miles south-southeast of Cape Hatteras, N.C.

Small craft warnings were raised from Jacksonville, Fla., to Block Island, R.I. The Navy sent its big ships out to sea from Hampton Roads. Some military planes were evacuated from the coast. The Red Cross went on alert.

A weather forecaster said that although the hurricane has gradually shifted to a northerly course that would keep it at sea, "it isn't time yet to say it has cleared land."

"With it slowed down like this we can't say what it will do even though it might look like it will miss land," he said.

Moving Northward
The Miami Weather Bureau in a midnight advisory located the storm at 28.8 north, 73.0 west, about 450 miles east of Titusville, Fla., and said it was moving northward about 12 miles per hour.

The Weather Bureau predicted, cautiously, that Connie would continue the present course and relatively slow forward speed for the next 12 hours, and bring high tides to Florida, Georgia and Carolina shores by tonight.

Observers on hurricane hunter planes tracking Connie 24 hours a day reported the hurricane, now full grown after moving five days over water, packed winds of 135 miles per hour near the center.

"Hurricane winds (75 miles per hour or above extend out 120 miles to the north and east and 50 miles to the southwest, and gales extend out 350 miles to the north and east and 150 miles to the southwest," the report said.

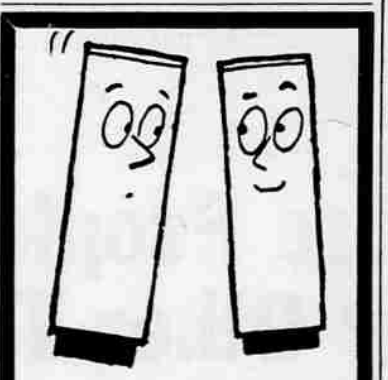

One engine of a B29 reconnaissance plane with 12 men aboard conked out in the calm "eye" of the hurricane Monday and some crew members kissed the ground after they flew back through the tempest unharmed with a broken fuel line.

Capt. George Newkirk of Lindsay, Calif., commander of the Air Force plane, said he feathered the idle propeller of one of his two starboard engines, trimmed the plane and "hailed out of there fast."

Patch of Marijuana Raided Near Nyssa

Nyssa (U.P.)—State police Sgt. Russell Haynes and Liquor Control Inspector Bill Courtney yesterday raided a marijuana patch which had been carefully cultivated in an inaccessible area two miles south of here on the bank of the Snake river.

Police had had the patch under surveillance for some time and moved in yesterday just before harvest time. No arrests have been made.

Tanks just the same?

Electric water heater tanks may look alike, but appearance is only paint-deep, in NATIONAL exclusive features inside make the difference. When you've used one for years, you'll say "Tanks for the memories" of wonderful service! Let us prove it to you.

Hurricane Warning System Said Vastly Improved

Washington (U.P.)—The U.S. Weather Bureau manned a vastly improved hurricane warning system today to alert East Coast points which may be endangered by Hurricane Connie.

"We have marshalled all our resources," a bureau spokesman said. "We are ready for anything."

Ever since last year's hurricane sisters—Carol, Edna and Hazel—ravaged the Atlantic coast with a record-breaking \$800,000,000 damage, the Weather Bureau has given top priority to finding better ways of tracking hurricanes and alerting communities in their paths.

One of the most valuable additions to the bureau's alert system is a big radar station at Cape Hatteras, N.C. Every known hurricane that has struck the northeast coast has swept within 200 miles of the Cape. The radar screen can reach out 250 miles into the Atlantic to trace the storms.

The radar station went into operation last week.

Cape Hatteras Key Point

Norman Hagen, one of the Weather Bureau's hurricane experts, said Cape Hatteras is the key point in tracking hurricanes heading north. Upon reaching Hatteras, hurricanes normally "speed up and curve" toward

their ultimate destination, he said.

Another important improvement in the warning system is the addition of 11 major Eastern cities to the Weather Bureau's

hurricane teletype circuit. These cities—Portland, Me.; Hartford, Conn.; New Haven, Conn.; Prov-

Help for Russian Agriculture Urged

New York (U.P.)—A top expert in foreign trade said today the United States can strike a blow for world peace by helping Russia improve agricultural production.

"It is usually hungry people and have-not nations that start wars," said Gottfried Neuburger, an official of a firm that sponsors international trade fairs and expositions.

"If people are satisfied," he said in an interview, "they won't want to go to war."

The 48-year-old executive of International Trade Shows recently urged the Soviet Union to permit a U.S. trade exposition specializing in agriculture to be held in Moscow next summer.

That plan is said to be under "serious consideration" by Russian authorities.

The U. S. navy's first submarine derived its power from a conventional four cylinder gasoline engine.

idence, R. I.; Atlantic City, N. J.; Wilmington, Del.; Albany, N.Y.; Bridgeport, Conn.; Richmond, Va.; Raleigh, N.C.; and Wilmington, N.C.—now receive all hurricane information instantaneously. There is no delay, as existed last year, in relaying the information from such cities as Miami, Washington, Baltimore, Philadelphia, New York and Boston.

The Air Force and Navy also are providing improved hurricane service this year. They will fly more hurricane reconnaissance flights than ever and carry extra equipment to give better details of the storms.

Emergency Basis Operation

The bureau itself has added extra emergency equipment to insure rapid transmission of hur-

ricane reports. The radar station at Cape Hatteras, for example, has a special radio hookup with Washington headquarters in case its ground transmission lines are knocked out. The bureau also has a telephone hookup that permits immediate contact with field offices along the coast.

With the hurricane season started, the Weather Bureau is operating on an emergency basis. Staffs of bureaus along the coast have been increased, other weathermen are standing by to be dispatched to "assault" areas, and many staff members are working 12-hour shifts.

Special warning centers have been set up in major Eastern cities to help newspapers and radio and television stations publicize hurricane warnings.
