

# Training of Monkeys for Light Factory Work Seen by Scientist

By ROBERT MUSEL  
United Press Correspondent

Geneva—(U.P.)—One of the world's most distinguished scientists believes the time has come for humanity to seriously consider breeding a strain of monkeys trained to do work too dull for humans and too tricky for machines.

Does he mean it? Sir George Thomson, Nobel Prize-winning son of a Nobel Prize-winning father, holder of many honors from universities and learned societies and a member of Britain's important Department of Scientific Research, says that he does.

He told me about it as we sat on a leather covered bench in a hall of the Palais Des Nations while scientists attending the Atomic for Peace Congress milled about us. Sir George, who won his Nobel Prize for physics in 1937, represents the British universities at the meeting.

Planter Used Monkeys  
"One man has already done it," he said, "just before the war. I think his name was Cotton. He was a planter in Malaya and he wanted to collect fruit from the tops of trees, those very tall jungle trees, some of them 200 feet high. I forget the name at the moment but they have climbing plants around them.

"This man trained a species of monkeys. I think they're called pig-faced monkeys, to run up and bring down what he wanted and it worked very well. He probably used a lead to direct them here or there, I suppose."

Sir George, who is 63, but has the vigor and animation of a far younger man, gesticulated. "You see," he said, "the combination of the hand and eye is an extremely valuable one. Monkeys have it. Its use has serious possibilities."

"Do you mean you would train monkeys to do monotonous factory jobs now tying down humans?"

"Well," said Sir George. "I did consider factory work for them but I don't think now that I would put them where things are mechanized. Rather I would use them for jobs that are difficult to do mechanically. I think you'll find them much cheaper."

"I'm talking, of course, of monkeys," he went on. "It's a hard job to train gorillas. They're awful fiery brutes, you know. But monkeys could do light jobs, stuff too dull for a man."

Book Planned  
Sir George paused and stared ahead as though looking into the future. In fact he has already looked far ahead in a provocative and eagerly awaited book, "The Foreseeable Future," which will be published in Britain and the United States in the fall. He said he has touched on monkey labor in the book but had elaborated his ideas since.

"Many routine things can be done by machines," he said. "But there are things which while apparently the same are really different. Such as picking apples. Each apple is different, you see."

He pointed out that monkeys breed fairly rapidly. "We'd have to go at it carefully, pick the best breeds, probably the pig-faced such as the way we've bred domestic animals. Using monkeys for light labor apparently would not be difficult if anybody took the trouble to do it."

And Sir George departed leaving me with many thoughts—a future executive phoning his wife to say he was being kept downtown by monkey business, and monkeys on strike for more nuts and bananas.

Vandals Damage Senate Painting  
Washington—(U.P.)—A vandal scarred one of the Senate's most famous paintings last spring—The Battle of Lake Erie—and left an enormous repair job.

The Battle of Lake Erie is no ordinary painting, but a giant oil, 20 feet high and 30 feet long. It hangs over the marble staircase leading to the Senate gallery.

The painting depicts Commodore Oliver Hazard Perry and a cabin boy being rowed in an open boat from the commodore's disabled flagship "Lawrence" to the brig "Niagara." It is a crucial moment in the 1813 battle that swept the British from the Great Lakes.

It was immediately after this battle that Perry sent his message that has thrilled Americans for more than a century: "We have met the enemy and they are ours."

No one yet knows how the painting was damaged.

POLICE ON THE JOB  
Nashville, Tenn.—(U.P.)—State Agriculture Commissioner Buford Ellington today praised the Tennessee Highway Patrol for "being on the job." An automobile in which Ellington was a passenger was stopped by police in a radar speed net and the driver was fined \$13.50 for speeding.

Philip Crosby Said To Be Improving  
Raymond, Wash.—(U.P.)—Pvt. Philip Crosby, 21-year-old son of crooner Bing Crosby, was reported improving today from a fractured back suffered in an auto accident Sunday.

A doctor at the New Riverside clinic said "Philip is in good condition, considering his injuries."

Philip was to be transferred to Madigan Army hospital at Ft. Lewis, Wash., today or tomorrow, depending on his condition. He is stationed at Ft. Lewis.

The youth's famous father came to Raymond but left for Idaho yesterday.

The accident took place when Phillip's auto smashed through a guardrail and rolled down two embankments on U. S. Highway 101.

Large Peppermint Crop Forecast for Oregon  
Portland—(U.P.)—A peppermint crop 21 per cent larger than last year's was forecast for Oregon today by the U.S. Department of Agriculture crop reporting service.

The service predicted the crop at 611,000 pounds, just equal to the 1949-53 five-year average. A yield of 47 pounds of oil per acre also was forecast, for a total of 1,682,000 pounds, 17 per cent over last year's figure.

DISTRICT PHONE SERVICE  
Asuncion, Paraguay—(U.P.)—Direct radio-telephone and radio-telegram services were inaugurated Monday between Paraguay and Uruguay.

Coast Guard Rescues 46 Men From Trawler  
Halifax, N.S.—(U.P.)—A U.S. Coast Guard ship rescued 46 men and a dog from a blazing Portuguese fishing trawler in the Atlantic about 800 miles southeast of Newfoundland. Air Force search and rescue headquarters reported today.

An RCAF spokesman said the 284-ton trawler Ihavense Segundo caught fire Monday while fishing in the area 45 degrees north and 41 degrees west.

A B17 aircraft from the U.S. Air Force Base at Argentia, Newfoundland, flew out in answer to the trawler's desperate signal for aid and guided the Coast Guard cutter Mendota to the scene.

Eddie Fisher Mobbed By Portland Youths  
Portland—(U.P.)—Singer Eddie Fisher was almost mobbed by hundreds of admiring bobby soxers last night after his plane landed at the Portland International airport.

Fisher had to try three times before he could make his way to a waiting car and get to his hotel room. Signing autographs as fast as he could, Fisher tried to go through the main gate and the baggage room. Finally a car was brought on the field.

The teen-agers had been told of Fisher's coming by local disc jockeys and they flocked to the field an hour before his plane was due. Fisher is en route back to New York after a holiday in Hollywood.

Directors Named by Hotel Stockholders  
Portland—(U.P.)—A five-man board of directors was named yesterday by stockholders in the Cosmopolitan Hotel Company, which was formed to help finance a proposed \$12,000,000 hotel in downtown Portland.

Named to the board were Warren Braley, Portland automotive dealer; R. L. Clark, president of the Portland Chamber of Commerce; Attorney Edwin D. Hicks; and two labor leaders, J. T. Marr and William Way.

The group proposes to raise \$2,500,000 locally for the 750-room structure, which would be built by Leo F. Corrigan, Texas promoter, and his subsidiary group, Portland Properties Corporation.

Time will tell...  
The story of electric water heater performance is not told by the outside of its white enamel tank. When it's NATIONAL, it's told by long years of dependable service. What a difference there is inside.
