

Schedules for City Junior High, Grades Schools Listed

All Medford public schools, with the exception of the senior high school, will start the 1955-1956 school year Monday morning.

Opening day for the senior high school will be Monday, Sept. 26.

The opening day schedules for the two junior high schools and the city's elementary schools were announced Saturday by Leonard Mayfield, superintendent of schools.

Junior high schools will start at 8:30 a.m. each day and end their normal day at 3:15 p.m. at which time the activity period of 45 minutes begins. Students will spend 1½ hours in their first class period, the first half hour of which is a homeroom period for orientation, guidance, and general announcements.

Two additional one-hour periods round out the morning, followed by three class periods in the afternoon following noon recess. Except in laboratory-type classes, the last half of each regular class period will be devoted to supervised study under the teacher's direction.

There will be no study hall periods as such. Entire classes will be periodically scheduled for the library and students individually will have access to library facilities during out of class hours.

The activity period of 45 minutes will enable interested students to take additional instruction in classes not individually scheduled during the regular six period day. Such activities will include band, orchestra, vocal music, intramural athletics, woodshop, homemaking, and others.

Junior High Schools
Hedrick Junior High school will conduct a regular full class day on Monday and the cafeteria will operate on opening day. Desks within the school entrance will have school personnel available to direct students to their respective homerooms.

All regular junior high school students and fifth and sixth grade students in the Roosevelt annex in the east wing of school will be able to obtain a hot lunch at noon in the cafeteria. Milk is available for students bringing sack lunches.

Students will be dismissed at the regular time of 3:15 p.m. as the activity period program will be functioning after the first day.

At McLoughlin Junior High school, following 8:30 a.m. opening Monday, approximately 1½ hours will be devoted to student orientation and homeroom organization. Desks within the school entrance will have school personnel available to direct students to their respective homerooms.

Following this initial period on opening day, students will be dismissed until 12:20 p.m. at which time their regular schedule will be gone through in abbreviated periods in order to familiarize each student with his personal schedule.

Students will be dismissed at 3:15 p.m.

The cafeteria will not operate the first day but will be in full operation on Tuesday, Sept. 20. Schedule adjusting, in view of the preponderance of non-high school district students attending this school, will be accomplished following the morning dismissal.

Elementary Schools

Elementary schools will open at 8:55 a.m. Monday, Sept. 19. Children and parents will be directed to registration rooms. Following registration and securing of books, students will be dismissed until 1 p.m. At that time children will be placed in their own homerooms and arrangements will be made for a regular full day of school on Tuesday.

Cafeteria will not operate on Monday. Children transported by school bus are asked to bring sack lunches on opening day and

milk can be secured at the school. Transported children will be cared for at their respective schools during the balance of the opening morning.

Senior High school opens Monday, Sept. 26.

Arrangements for students from Kenwood school district have been completed by city school officials.

All fourth, fifth and sixth graders from Kenwood district will attend Lincoln school, as will any first, second and third graders from the same families.

All first graders from Kenwood who attended Jackson school last year will continue at

Jackson school in the second grade. All other first, second and third graders will attend Jefferson school.

All seventh, eighth and ninth graders from Kenwood will attend E. H. Hedrick Junior High school.

All students from Dewey district in grades one through six will attend either Roosevelt school or the Roosevelt annex located in the Hedrick Junior High school building. Dewey students in grades seven through nine will attend Hedrick Junior High.

Areas within District 49 served by the various city schools were announced earlier.

Good Adverse Neutral

As We Live

By ELIZABETH HURLOCK, Ph.D.

Early Experiences Important

In Shaping Child's Future

Most people believe that what happens to a person when he is young really doesn't count. After all, they argue, people can't remember much before they are three, four, or even five years of age. Studies of memory have shown that the ability to remember things does not begin until the child is two or three years old and even then, memories are short-lived.

One thing that few people understand is that specific memories are not important in determining how much influence early experiences will have on the course of a person's life. He does not have to remember details, or even the major events of his life, to feel their influence.

Even more important than specific memories are the vague and hazy impressions a child gets from his early experiences and which remain with him as feelings about people, things and places. He may not, for example, remember everything about the time when a big dog jumped on him, knocked him over, and frightened him so that he screamed for help. Nevertheless, he has a vague and general impression printed on his mind of this experience and as a result, any dog frightens him. He may not be able to tell you why he dislikes dogs, but the impression is still there.

Must Be Overly Careful

Realizing how important early experiences are in affecting the future course of a person's life may make you uneasy about yourself and your children. You may feel that any-

thing you do or say may leave a scar on their lives that can never be eradicated and that, as a result, you must be overly careful.

Things are not as bad as all that. True, unpleasant, frightening, or painful early experiences may affect the person's outlook on life but they can be counteracted with pleasant, happy, and gratifying experiences. When it is apparent that a person has the impression that no one loves him, that he can't do as much as others do, or that he lacks the abilities others have, that is the time to counteract the impressions before they become set.

LETTERS FROM READERS

Bright but Critical: "Most of the bright people I know are critical and tend to look down their noses at others. Wouldn't you think they would be smart enough to realize how unpopular this makes them?" V. B.

(A) Smart people usually are aware of the fact that an overly critical attitude makes others dislike them. However, they do not care whether the people they criticize like them or not. I think you will find they take a very different attitude toward the people they consider "good enough" for them and whom they would like to have as friends.

Spending Money: "We have a budget in which my husband and I allow ourselves a certain amount each week for our own spending. My husband always asks me what I did with my money but if I ask him what he did with his, he is offended and accuses me of 'prying' into his affairs. Did you think this is fair?" Mrs. D. W.

(A) No, I do not think it is fair for your husband to expect you to account for your spendings unless he is willing to account for his. If you have agreed upon a certain amount for each of you for your personal spending, it would seem that neither of you should account to the other for it unless you wish to do so. Only if you go over the limit agreed upon should there be any accounting needed by either.

Toys vs. Television: "I have decided that it is foolish to put money into toys and books for children as they prefer watching television. My children rarely play with their toys." Mrs. A. F.

(A) If your children are spending so much time looking at television that they do not use their toys or books, it would seem that you should limit the time they spend before the television screen. Their play is too one-sided to be healthy and they need to learn to amuse themselves instead of sitting back and waiting for someone to amuse them.

(COPYRIGHT 1955, GENERAL FEATURES CORP.)

Portland — (U.P.) — Dr. David Witter, dental health director for the State Board of Health, says that addition of fluorides to Portland water supply would reduce dental costs some \$12,000,000 over a 16-year period.

U.S. farmers operate from 60 to 65 per cent of all farm tractors in the world.

Near-Record Home Building Reported During Past Month

Washington — (U.P.) — Two government agencies reported Saturday that a near-record number of Americans started to build—or announced plans to build—new homes in August.

Construction starts and appraisal requests during August indicated that 1955 would be the second greatest housing boom in the nation's history.

Nonfarm housing starts reported by the Labor Department's Bureau of Labor statistics and appraisal requests recorded by the Veterans administration showed a sharp increase over July, when construction starts took an unusual and unexpected decline.

BLS reported 123,000 new houses were started in August—a seven per cent rise over July. It brought to 927,900 the number of new houses started so far this year. Of these, 916,000 are privately owned.

Seasonally adjusted, the August rate on privately owned housing starts worked out to an annual rate of 1,304,000—the biggest housing boom since 1950's all-time record of 1,352,000. In 1954, 1,201,700 private homes were started.

Bend Gets Television

Through High Antenna

Bend — (U.P.)—Television came to Bend this week after engineers located a zone about four miles east of town in which good signals were received.

A high antenna was erected in the area and cable strung to downtown Bend by Bend TV Cable, Inc. Programs were received starting Thursday night from KOIN-TV and KQOR-TV, Portland, and KVIA-TV, Eugene.

Lloyd Robideaux and Fred L. Hartman spearheaded the cable company.

Price Record Falls During Timber Sale

The highest bid for Douglas fir ever offered for Bureau of Land Management timber in the Medford district was made last week, the BLM reported Saturday.

The record-breaking offer was \$48.50 per thousand board feet, compared with an appraised price of \$23.40, by the Oregon Veneer company, Medford, in oral bidding against four other lumber firms. The tract of timber is located on the Ragdale Butte rd. in northern Jackson county, and includes about 3,844,000 board feet of lumber.

Oregon Veneer was also the successful bidder for a tract on West Fork Trail creek, including 4,089,000 board feet, against four other bidders.

Six Tracts

The sale included six tracts of timber, totalling 19,500,000 board feet, offered for sale by the Medford BLM district Thursday. Total sales price was \$667,024.39, or 61 per cent over the appraised price of \$414,652.95.

Jackson Creek Lumber company, Medford, submitted the highest of eight bids on the only tract offered for sale under sealed bids. The purchase was of some 2,499,000 board feet of timber on North Fork of Little Butte creek, for \$77,171.59.

A tract of 1,498,000 board feet on Tyner creek, near the Oregon Caves highway, was sold to Cabax Mills, Grants Pass, which made the highest bid of five competing companies.

Southern Oregon Plywood, Inc., Grants Pass, was highest of five bidders for a tract on West Fork Williams creek of 4,403,000 board feet.

The last tract was purchased by Multnomah Plywood Corp., Glendale. It included some 3,159,000 board feet on the West Fork of Cow creek in southern Douglas county.

Prices Top Estimates

Prices offered for Douglas fir, the major species of the sales, ranged from \$19.65 to \$48.50, compared with appraised prices ranging from \$17.35 to \$23.40. The next regular timber sale

Some 500 Attend SPEBSQSA Picnic

Approximately 500 people attended the inter-chapter picnic of SPEBSQSA at the Grants Pass city park last Sunday.

An open air harmony jam-boree was enthusiastically received, with Gus Witte, Medford, serving as emcee. The purpose of the picnic, formation of a chapter at Grants Pass, was assured, according to Medford club sources.

Chapters participating came from Roseburg, Klamath Falls, Eugene - Springfield, Medford, and Crescent City, Calif. It was proposed that the picnic be made an annual affair.

WHO CAN HELP YOUR HEARING?

C. R. ADAMSON

Can!

I am a trained
Sonotone Hearing
Aid Consultant

SONOTONE

C. R. Adamson, Dist. Mgr.
839 East Jackson Blvd.

By training and experience with many different kinds of hearing loss, I have been able to bring better hearing to hundreds. Now I have another wonderful new hearing aid to help break through that iron curtain of deafness.

This is the micro-midjet Sonotone "100."

It is as small as a matchbook and weighs about one ounce.

It's not a gadget designed to attract by just being small. This is a real aid to HEARING, with traditional built-in Sonotone quality.

When you do business with Sonotone, you invest in a complete hearing service and join thousands of happy users in a proven better hearing program.

CONSTIPATED?

HERE'S NATURE'S GREAT FOOD COMBINATION

For fitness
and regularity

VITAL FOOD BULK TO IMPROVE
YOUR "INTESTINAL TONE"

3 Fine Foods
in One

Comfortable Elimination

You know what milk is. It is generally considered nature's most nearly perfect food.

But do you know about bran... All-Bran? If you're interested in a natural aid to regularity and fitness, you'll be interested in these facts.

W. K. Kellogg pioneered Kellogg's All-Bran almost 40 years ago. He set out to make it three great cereals in one: 1) a good-to-eat cereal; 2) a cereal which in combination with milk would provide very solid nutritional benefits; and 3) a natural remedy for one of mankind's most common ailments, constipation due to insufficient bulk.

This he achieved. For Kellogg's All-Bran, the original whole bran cereal, has become the most widely accepted and used of all bran cereals. It has literally helped millions.

Now as to Kellogg's All-Bran itself and why it is such a great food—the answer is simple. All-Bran is made from the vitamin and mineral rich outer layers of the whole wheat grain. And not only does All-Bran supply vitamins, minerals and protein—it is scientifically milled to bring you the natural food bulk you need in its most effective and appetizing form. All-Bran stays crisp in milk and is easy to eat.

Yes, All-Bran does things no drug-type laxative can even begin to accomplish—it actually improves your "Intestinal Tone" which may be below par due to insufficient bulk.

And Kellogg's All-Bran, served with milk, contributes nine body-builders you need daily for fitness.

So why not get the safe, gentle, natural laxative cereal you know you can depend on. Kellogg's All-Bran, the original. Eat a half cup of Kellogg's All-Bran every morning for 10 days. If it doesn't bring you satisfying, effective relief from constipation, you get double your money back. That's a promise from Kellogg's of Battle Creek, Michigan.

A formula for fitness and regularity

Eat one ounce (half a cup) of Kellogg's All-Bran with milk every day. It's a safe, sensible, delicious food combination for fitness and regularity.

Just 6¢ a day can help build rich, red blood—save you from being
TIRED...NERVOUS...

EASY PREY TO MINOR ILLS

Nutritional experts reveal vitamin losses in cooked foods plus faulty diet may be seriously undermining your energy, strength, and resistance, making you feel on edge—affecting your appetite—spoiling your sleep—because your body is vitamin and iron starved.

How you can stop chronic Vitamin & Iron starvation TODAY... Feel like a new person!

Supplement your diet every day with just one High-Potency Bexel Capsule. Just one of these wonderfully strengthening capsules give you the full vitamin and iron content nature provided in the groups of the following foods before cooking:

1 quart of pasteurized milk
4 oz. of fresh orange juice
1/2 lb. of lean bacon
1/2 lb. of green string beans
1 lb. of beef
1 lb. of butter

Penny for penny... you get more value in high-potency
