

**Barbara Benson,  
Canadian Doctor  
Wed in Temple**

Salt Lake City—(U.P.)—Miss Barbara Benson, attractive brunette daughter of Secretary of Agriculture Ezra T. Benson, and a young Canadian doctor were married today in the high-spired Salt Lake Temple of the Latter-day Saints Church with Benson, an LDS apostle, officiating.

Only close friends and relatives witnessed the ceremony, one of the most impressive in the Mormon ritual. Details of the rites are never divulged to non-members of the LDS faith.

Immediately after the temple wedding, Dr. Robert Harris of Calgary and his bride were honored by 1500 guests at a reception in the nearby Hotel Utah in the same suite where Benson and his wife had their reception 30 years ago.

The newly married couple will take a honeymoon trip to Yellowstone and Glacier National Parks and Waterton Lakes in Southern Alberta on their way to their new home in Calgary.

**Safety Expert Declares Theory  
Of Accident-Prone Unsound**

By ELIZABETH TOOMEY  
United Press Correspondent

New York—(U.P.)—The popular theory that little Jimmy is destined to skin his knee ten times to his brother's once because Jimmy is "accident prone" is a lot of nonsense, a safety expert says.

There is almost no such thing as accident proneness, C. R. DeReamer insisted when he and other safety experts got together this week at a conference for safer living.

DeReamer based his statements on studies as he has made of accident statistics as the safety consultant for the General Electric Co. He showed how they applied to home-owners because at the conference, sponsored by the American Mutual Liability Insurance company, a survey showed that five-million accidents occur each year in American homes now, and if the present rate of increase continues, the figure will reach seven-million by 1975.

"All the talk about accident prone people has a bad effect on parents," DeReamer said. "If one member of the family begins having repeated accidents a parent who believes in the theory of accident proneness will feel there is nothing he can do about it. He will regard it as a problem for a psychologist."

"Accidents don't just happen" in most cases. They are caused. And they are caused by unsafe acts and unsafe conditions. It is up to parents to accept this basic philosophy and then take individual responsibility for developing what I call "accident awareness" in children."

**Hopes for Program**

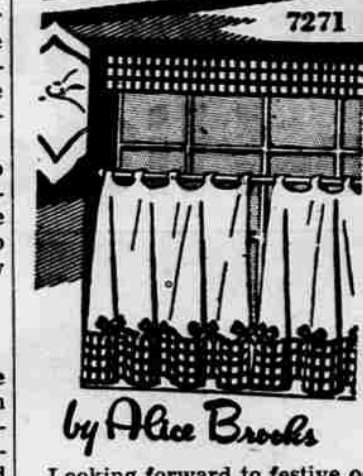

DeReamer hopes there will be a concentrated program across the nation to urge parents to hold regular family safety sessions. At these the family could discuss such things as what to do in case of fire, the danger of falling downstairs (one of the most common household accidents) how to avoid it, and the danger of using a knife improperly and how to avoid it.

"The home is a safer place to be than it was 50 years ago, because competition forces home equipment manufacturers to make it safe," he said. "Now it is up to the parents."
