

## Church Requests Approval for New Gold Hill Building

Gold Hill—Plans will be submitted by the Catholic church to the Gold Hill city council in the near future for approval and a building permit for construction of a building for Catholic school students who desire one hour of religious instruction per week.

The building would be located at the corner of Sixth ave. and 10th st., a lot which was purchased by the church recently from George P. and Jessie Martin.

The structure will accommodate students who desire released time for religion instruction for one hour during each school year week. The location is near the present.

**Votes Regular Meetings**  
Also at Monday's council meeting, the council voted to meet at 7 p.m. regular meetings during the months October through April.

Councilmen also discussed removal of trees from streets, and decided that removal should be done by city employees. Several residents recently have inquired about removing trees which were extensively damaged during a heavy wind storm Labor Day weekend.

Frank Benesh, representing California Oregon Power company, discussed with the council the recent power shortage caused in Gold Hill by heavy winds and nearby forest fires. He pointed out that power was not restored as promptly as company officials would like because employees were needed elsewhere to restore power.

## Lewiston Protests Passenger Train Halt

Boise — (U.P.) — A delegation from Lewiston meets with the public utilities commission today to protest Union Pacific railroad's application to discontinue passenger service out of Lewiston and Moscow.

The PUC is to hold a formal hearing on the application in Lewiston Oct. 18.

The group, headed by James McMonigle, met with Gov. Robert E. Smylie yesterday afternoon.

James Givens, Lewiston city attorney and a member of the delegation, later told reporters the area served by the Lewiston and Moscow passenger trains has a population of more than 114,000.

A. B. Barnes, president of the Lewiston chamber of Commerce, said discontinuation of the service would leave both Lewiston and Moscow without direct rail passenger service to the Pacific coast, eastern Oregon, southern Idaho, Utah, California and other points.

## Blaze Nothing New In Way of Inventions

London — (U.P.) — Members of the Royal Commission on Awards to Inventors thought someone was showing a new invention Tuesday when a cloth covering their meeting table suddenly caught fire.

Then they discovered that the sun's rays, concentrated by a beaker of liquid, had set the cloth ablaze. They put out the fire, moved the beaker and continued the meeting.

## Knight Would Head Presidential Ticket In California

Sacramento, Calif. — (U.P.) — If President Eisenhower does not run again, Gov. Goodwin J. Knight said today he will head up a favorite son ticket in the California presidential primary next June even if Vice-President Richard M. Nixon files a competing slate.

At an interview marking the start of his third year in office as governor, Knight made it clear that he expects to control the 70-vote California delegation next year regardless of anything Nixon does.

**At Political Odds**  
Knight and Nixon, both Californians, have been at political odds for years and the governor has never endorsed Nixon for reelection other than to say that "If Ike wants him, that's all right with me."

Asked if his plans to run as a favorite son presidential candidate would be changed in any way by the possible filing of a Nixon for President ticket in California, Knight said:

"Not in the slightest. We are going all the way regardless of what Mr. Nixon does."

The governor stressed, however, that he is for Mr. Eisenhower "first and foremost" and that if the President runs again, Knight expects to head up a delegation pledged to Mr. Eisenhower's reelection.

## Vancouver Chef Held On Charge of Murder

Portland — (U.P.) — Police today booked a 53-year-old Vancouver, Wash., chef on a murder charge after they found an unemployed Portland waitress fatally knifed on the floor of her apartment.

Miss Mary Marks, 46, was found dying on the floor of her apartment and neighbors said a man they knew to be Quinton Robert Gault was seen leaving the building shortly after Miss Marks' screams were heard.

Gault was picked up two hours later in his car as he drove toward eastern Oregon. Photographic negatives found in the Marks apartment also put detectives on Gault's trail. No weapon was found.

## Greater Floods Threaten Texas; Many Flee Homes

**By UNITED PRESS**  
Rain-swollen flood waters drove 500 persons from their homes in Wichita Falls, Tex., today and even greater floods threatened to spill out of the rising Red river.

To the south, meanwhile, the disaster at flood-devastated Tampico, Mexico, mounted. Fourteen U. S. Navy helicopters flew hundreds of persons from a tiny island in the heart of the city. But there were 60,000 persons in the area and the waters were rising.

Rains in this country continued from the Mississippi Valley to Central Oklahoma and spread over most of the Great Lakes region today. The heaviest recent rains included 1.99 inches at Hobart, Okla., and 1.50 inches at Lawton, Okla.

The autumn rains had already done their flooding work at Wichita Falls, where water spilled over the banks of Holiday creek and spread over 100 residential blocks.

The creek, fed by swollen Lake Wichita, rose steadily and was expected to reach a 21.22 crest today. It was the highest flood stage since 1950 and water already stood seven feet deep on two golf courses.

On the Red river, the principal boundary between Texas and Oklahoma, the water was running 18 feet deep and rose 11 inches within three hours. Worse floods could follow if the river keeps rising and thus turns back the runoff from the swollen Wichita river.

More flooding was feared in Oklahoma along the Wasita river from Clinton to Carnegie.

## Pair Trapped in Car In Good Condition

Portland — (U.P.) — Two men, freed from the wreckage of an old model coupe after being trapped for two hours last night, were reported in good condition in a local hospital today.

Donald Phillips, 43, Hood River, and Robert Bartol, 28, of Iowa, were trapped when the car overturned on the new Bandfield expressway and was struck and smashed by a giant semi-trailer.

It took 40 rescuers two hours to free the pair. Bud Thompson, driver of the big truck, said the car had passed him at high speed and then rolled over in front of him.

## POLIO VICTIM DIES

Baker, Ore. — (U.P.) — Baker county marked up its first 1955 polio fatality today with the death in Portland of Ronnie Bowers, 5, from bulbar polio. The boy had not received polio vaccine inoculations. He was flown to Portland a week before his death.

## Railroad Trainmen Granted Wage Boost

Chicago — (U.P.) — An agreement was reached early today granting a 10½ cent hourly wage increase to trainmen on the nation's 130 Class I railroads.

The Brotherhood of Railroad Trainmen said that 175,000 members would benefit, but a spokesman for the railroads said the raise would affect 110,000 employees.

A negotiation session of nearly 15 hours produced the agreement shortly after midnight.

The settlement with the trainmen came as another operating union, the Brotherhood of Locomotive Firemen and Enginemen, is legally free to call out 60,000 of its members.

Other unions in current negotiations include the Brotherhood of Locomotive Engineers with 80,000 members, the AFL Switchmen's union with 10,000 and a group of 11 non-operating unions with a total of 800,000.

## Shorter Work Week

The trainmen's agreement provides what the union said was an extra 13½ cent hourly increase for 45,000 members who will shift Dec. 1 from the 48-hour week to a 40-hour week.

A railroad spokesman said that the additional payment for workers changing to the 40-hour week would be \$1.30 a day for yard conductors, \$1.13 a day for yard brakemen and 82 cents a day for switch tenders.

Both union and railroad officials agreed that about 45,000 workers would go on the shorter work week.

The trainmen received a five-cent hourly increase and an ex-

## Kaiser Announces Expansion Program

Oakland, Calif. — (U.P.) — Kaiser Aluminum and Chemical Corporation has announced the start of a \$90,000,000 expansion program involving five of the company's biggest manufacturing plants.

Vice-President and General Manager D. A. Rhoades said the major emphasis of the program will be centered at the firm's new plant at Ravenswood, W. Va., where an additional \$75,000,000 will be spent to enlarge and complete the initial facilities now under construction.

He said the expansion will increase Ravenswood's annual capacity from 250,000,000 pounds to 333,500,000 pounds of commercial sheet and foil products, thus making it the largest aluminum fabricating plant to be built in the nation since World War II.

In addition, the company will increase capacity at its extrusion plant in Halethorpe, Md., and its reduction plants at Mead and Tacoma, and install new facilities at its reduction plant at Chalmette, La.

## Ground Observers Discus Air Defense

Hamilton Air Force Base, Calif. — (U.P.) — Top Ground Observer Corps staff coordinators and military officials met here today to discuss civil air defense planning for California, Nevada, Washington, Idaho and Utah.

Col. Henry J. Tyler, Air Defense force civil air defense boss, presided over the one-day meeting. He reported that 1955 was an eventful year for the GOC.

Biggest forward step of the period was Continental Air Defense command's decision to expand the GOC to cover all 48 states. As part of the expansion, the requirement for volunteers was stepped up to about 1,500,000 from 500,000.

The 26-inning, 1-1 tie game between Brooklyn and Boston on May 1, 1920, is the longest game in major league history.

## U of O Develops Sun Tan Pill

Portland — (U.P.) — A pill which if used properly will help persons get a sun tan but if used improperly will lead to a sunburn has been developed by University of Oregon medical school researchers, it was announced today.

The pill contains a drug called 8-methoxypsoralen (8-MOP). Researchers said the drug increases a person's tanning ability and therefore the tolerance of the skin to direct exposure to sunlight.

Several persons who took vacations in the Caribbean last year reported getting good sun tans after taking the pills, the medical school said.

Doctors said the discovery was made when treating patients suffering from vitiligo, a disease which discolors the skin with white blotches. They said however, that general uses of the drug—obtainable only by prescription—was not recommended at present.

Doctors said the drug must be taken in careful, controlled amounts and exposure must be limited during the first few days.

Dead line for Sunday Classified is noon Saturday; 10 a.m. Monday for Monday; other days 5:30 previous day.

## Can you find the "guarantee" in this picture?

You buy a refrigerator only two or three times in your lifetime.

Yet you don't hesitate to buy one without getting so much as a look at the intricate "works" that makes it run.

How do you dare make such an important purchase without having an expert check it over for you? What makes you so sure you're getting your money's worth when you say, "I'll take that one"?

The answer's obvious. You look for the brand name on the refrigerator—your "guarantee." You've learned to follow this first rule of safe and sound buying:

A good brand is your best guarantee No matter what kind of product you want to

buy, you know a good brand won't let you down. You know the maker stands back of it—guarantees it. And so, when you buy a good brand you know you're right.

Read this newspaper to find out which are the good brands (and the stores that sell them). The more good brands you know, the surer you are about all your shopping.
