PASSENGER TREATED

Shannon Airport, Ireland—(U.P.) This international airport celebrated its 10th anniversary as a transatlantic base today by serving passengers coffee and cream with an Irish touch. The Irish touch was a potent one—it was Irish whiskey. The drink is called "Gaelic Coffee."

EXCITOR PAST 40

Troubled with GETTING UP NIGHTS
Pains in BACK, HIPS, LEGS
Tiredness, LOSS OF VIGOR

If you are a victim of these symptoms then your troubles may be traced to Glandular Inflammation. Glandular Inflammation is a constitutional disease and medicines that give temporary relief will not remove the causes of your troubles. Neglect of Glandular Inflammation often leads to premature senility, and incurable malignancy. The past year men from 1,000 communities have been successfully treated here at the Excitor Institute. They have found soothing relief and a new zest in life. The Excitor Institute, devoted to the treatment of diseases peculiar to older men by NON-SURGICAL Methods, has a New FREE BOOK that tells how these troubles may be corrected by proven New Surgical treatments. This book may prove of utmost importance in your life. No obligation. Address Excitor Institute, Dept. 7111, Excitor Springs, Missouri.

Dr. Huxlock marry. If you have known him for a period of six years and been engaged for over a year, why did you suddenly discover that he has a bad temper and is jealous? Has he always been this way or has this been a recent development? Tell Him Frankly. Regardless of this, it still would not be fair to marry him. You should tell him frankly that the arguments you have had have killed your love for him, and ask him to release you from your promise to marry him. As for the other man, you had better take plenty of time to decide whether or not you really love him. Love at first sight is often merely an infatuation.

Personal Health Service

By WILLIAM BRADY, M.D.

Readers should address inquiries to:
Dr. William Brady
283 El Camino, Beverly Hills, Calif.

FATHER WASN'T REHABILITATED

Father had more fractures, all at one time, than I have had in all my life, but I feel competent to tell what I think was wrong with the treatment of father's fractures. Although my fractures were comparatively trifling injuries—one a mere chipping of the tip of the shoulder in an automobile accident and an impacted Colles fracture (wrist) in a fall off a slippery porch. Father stepped off the sidewalk to point out the North Star and Little Dipper to a group of boys one night and fell into an excavation. I'm at a loss to account for the extent of the injuries he sustained in such a fall—less than five feet. He was only about 36

years old. Yet he came up with some broken ribs, broken collar bone, broken leg. Anyway such injuries should disable a man of 50 or 60 years old three months at the longest. Not father. He was down and out for a year or more—in fact he never was rehabilitated. That is to say, he never got back at his trade — blacksmith, horseshoeing. Not strong enough or some such vague reason, the doctor decided.

I remember how the doctor would pay his daily visit and get out his hypodermic syringe and administer a dose of, I can only guess it was morphine and atropine. Shortly afterward father would carry on deliciously for a while, and then quiet down until the next shot.

Aside from the inadequate practical training of the doctor

Former Schoolhouse Now Used by Bankers

Ithaca, N. Y. (U.P.)—There used to be a "wood inspector" for the famed "eight-square schoolhouse" near here.

Getting wood was quite a problem when the 140-year-old octagonal-shaped school was in its infancy. Each resident was expected to give his share, and the wood inspector was appointed by the school board to make sure that he did.

The former schoolhouse is now used as a classroom for members of the New York State Bankers Association who annually attend a short course in agriculture at Cornell University.

Regular classes in the red brick school were discontinued in 1941.

EXCLUSIVE INTERVIEW
London—(U.P.)—Daily Herald correspondent Hugh Pilcher cabled from Malta today that he had a most unusual exclusive interview with Maltese Premier Don Mintoff. He said Mintoff saved him from drowning during a water polo game.

Roundup, Mont.—(U.P.)—A speeding car veered across the center line of Highway 87 nine miles north of here Saturday night and smashed head-on into another auto, killing five persons and injuring two.

San Francisco's most recent sharp earthquake hit suggest some exciting new song titles.

Such as "Shake the town and yell at the people."

Life is Worth Living

Bishop Fulton J. Sheen discusses the problems of everyday living and offers practical solutions in inspiring, informal talks.

Tuesday at 9:30 P.M. on KYJC, 1230 on the dial
Sponsored by Admiral Corp.

ABC Radio Network

most doctors in those days went directly into practice from medical school, without the finest possible post-graduate course—a year or two of internship—it is certain that the doctor hadn't the faintest notion, in fact no doctor had, in those days, that nutrition, particularly calcium metabolism, had anything to do with the fragility of bones or with the healing of broken bones and the restoration of function.

In the light of our present knowledge of nutrition it is conceivable that a healthy young man might sustain a broken rib or two, even a broken leg, falling into a five-foot hole in the ground, but three separate fractures in such a mishap today would or should strongly suggest calcium deficiency—a precarious state which is widely prevalent but seldom recognized unless or until the individual seeks treatment for one or another manifestation, such as I describe in Little Lesson 26, "The Calcium Shortage," for which send 25 cents and stamped, self-addressed

envelope. Besides the everyday complaints which I ascribe to calcium deficiency, retarded or unsatisfactory healing of fractures and incomplete rehabilitation after such injuries are commonly due to calcium deficiency, in my opinion. If by any chance you ever crack a book that doesn't bear the imprimatur of the AMA brain that does your thinking, you may learn that in any illness or injury that necessitates prolonged confinement to bed or prolonged inactivity there is inevitably a steady loss of calcium from the body, unless the patient receives an adequate daily ration of calcium and vitamin D to supplement the diet. This explains not only the susceptibility of such patients to fracture from slight injury in the first days or weeks of convalescence, but more important, it explains their discouragingly slow convalescence and rehabilitation.

QUESTIONS AND ANSWERS
Nutritive Value
Does it lessen the nutritive value of milk to follow a glassful with a glassful of water at the same meal? (J.G.)
Answer—No. If you feel thirsty you will digest the milk, or any other food, better if you satisfy your thirst with water, at any stage of a meal.

Helps You Overcome FALSE TEETH Looseness and Worry
No longer be annoyed or feel ill-at-ease because of loose, wobbly false teeth. FASTEETH, an improved alkaline (non-acid) powder, sprinkled on your plates holds them firm so they feel more comfortable. Avoid embarrassment caused by loose plates. Get FASTEETH today at any drug counter.
