

## Princess Margaret Will Get Married, Probably To Commoner, Stargazer Says

By H. D. QUIGG  
**United Press Correspondent**  
 New York—(U.P.)—David Sturgis is back in town after a couple of years telling the French what's in their stars, and it's high time.  
 He has some news from the stars for Princess Margaret.  
 She's going to get married. She'll marry a man who was born between Jan. 20 and Feb. 18, under Aquarius. The bloke will probably be a commoner. Anyway, that's the way Sturgis reads the stars.  
 And as for that little affair with Peter Townsend, it never should have happened. The Princess not only made a wise decision as far as church and crown were concerned—she got right with the universe, too.

Sturgis explains: "Margaret is ruled by the sign Leo ruled, he says, that's the way astrologers talk, and Townsend by the constellation Scorpio—and the two signs are adversely angled to each other.  
 "Such Leo-Scorpio unions usually develop into eventual calamities. Moreover, she has a more queenly horoscope than her queen sister, and she will become, after amazing changes—some through shocking tragedies—a shining sovereign of the new British Empire."  
**American Nostradamus**  
 Sturgis, who says the Paris press dubbed him "the American Nostradamus," a term he has no quarrel with, did not elaborate as to the heavenly angles, verse and adverse, that told him all these things.  
 And perhaps it's best not to ask, although the British commonwealth may be shocked by the predictions. Incidentally, he told me that I would be writing books in 1957 and 1958, a prediction that also may induce a state of shock to the American publishing business.  
 Sturgis has been an astrologer, moving in society and other heaven-bent circles, for 30 years during which time he has run up horoscopes on such diverse personalities as Barney

Oldfield, Greta Garbo, John L. Lewis, Marilyn Monroe, Aly Khan, Eleanor Duse, and Alfred Emanuel Smith.  
 Sturgis also has horoscoped the stock market and has a prediction as to how it is going to go: Blooie! The colossal bust, he says, "is now certainly approaching." If it does not get here by Nov. 21, then it certainly will arrive between Dec. 23 and 31, he thinks.  
**The White House**  
 He also predicts, horoscopically, "The political falls, in 1956, of Eden, Bulganin, Franco, Faure, Nehru, and Dulles." And, "neither the horoscope of Stassen, Kefauver, Warren, Harman, Stevenson, nor Nixon shows a White House residence for any of them."  
 The next occupant of the White House, he says, will be a political unknown, who "will advocate industrial democracy." He will be an apostle of middle universalism, a doctrine founded by Sturgis and designed to fit this, or any other universe. Under this system, America will be turned into a corporation, each citizen owning one share and, instead of paying taxes, being paid dividends.  
 Universalism had to come. Sturgis says the Geneva conference last summer was "simply a debauch of deception" and the present one "is solely a Saturnian pollution of greed."  
 "I've taken over," he said. "I had to."

## Sanitation Cleared In Malheur Epidemic

Nyssa — (U.P.) — Two Oregon health officials said today reports on surveys conducted by teams from Idaho and Oregon contained nothing to point to sanitary conditions as a cause of this year's polio epidemic in Malheur county.  
 The statement was made jointly by Dr. Grant B. Hughes, county health officer, and Dr. S. B. Osgood, epidemiologist with the Oregon Health department.  
 The doctors added, however, that the two surveys showed that sanitation conditions had deteriorated in the county during the past several months.  
 Officials Saturday completed mass gamma globulin inoculations in the Nyssa school district in an effort to halt the spread of polio in the county. The surveys were requested just prior to the inoculation program to see if sanitary conditions might possibly be a contributing factor to the epidemic.

## Former MT Editor Biography Printed By Portland Firm

Eugene — A biography of George Putnam, editor and publisher of the Salem Capital Journal from 1919-1953, has been published in a book entitled "An Oregon Crusader." Author is George S. Turnbull, former journalism dean at the University of Oregon.

Putnam's continuous campaigns to "expose everything that is crooked and to support everything that is sincere and right" are featured in the 250-page book which was published by Binford and Mort of Portland. Many direct quotations from Putnam's editorials are included in the work.

The first third of the book deals with the successful fight Putnam made when, as editor of the Mail Tribune, Medford, he was accused of libel for criticizing the county grand jury. Other sections deal with his battle with the Ku Klux Klan in Salem in 1922, and against "labor goons" in the early 1930s.

## Tokyo Bay Searched For Missing Fishermen

Yokosuka, Japan—(U.P.)—U. S. and Japanese planes and ships searched the choppy waters of Tokyo Bay today for two American Marines and three Japanese missing since their fishing boat overturned.  
 Three other Americans in the boat swam to shore or were rescued. They were Airman 1-C George O. Dowling, his brother, Marine PFC. Forrest E. Dowling, both of Osage, Minn., an unidentified man.  
 Authorities said heavy waves overturned the rented boat Sunday afternoon.

## Does Research

Author of the Putnam story recently returned to the school of journalism here to do research on Oregon journalism. Turnbull taught at the university for 31 years, retiring in 1949.

ALL the heat in EVERY drop! Your Housewarmer's Standard Heating Oils are 100% distilled to burn without waste—every drop works for you! His Standard Furnace Oil has Thermisol to "tune up" your burner while it heats! His Standard Stove Oil lights fast, heats fast, burns clean—the ideal fuel for circulating heaters. One call to your Housewarmer gives you this clean, low-cost year the rest of the winter.

Your Standard Heating Oil Distributor or local Standard Man is your Housewarmer. Look for this trademark in the Yellow Pages...

## US May Provide Anti-Aircraft Guns for Israel

Washington—(U.P.)—The United States may provide some anti-aircraft, anti-tank and other defensive weapons to Israel if Allied investigation shows they are needed to offset Soviet bloc deliveries to Egypt.

Israel within the next few days will present the State Department a long list of "defensive weapons" it wants quickly from the United States. The list has been promised consideration but no definite commitment has been made pending new reviews of the tense Middle Eastern situation.

**Will Consider Request**  
 Assistant Secretary of State George V. Allen said that any request for arms from Israel will be "considered sympathetically." Allen has charge of Mideast affairs at the State Department.

But Allen said he believes Egypt and Israel "very well might" accept the United Nations proposal for a cease fire. He said his optimistic view was based on conferences with Israeli and Egyptian envoys.

**Careful Preparation**  
 Israeli Ambassador Abba S. Eban said his country is preparing the weapons list carefully. He said that Egyptian "reinforcement" from Czechoslovakia "makes it essential that defense arms be made available to Israel." Modern jet planes are expected to be a big item on the list.

The United States will confer with Britain and France before making any limited arms deliveries to Israel. More information will be obtained on the quantity and quality of the Communist deliveries to Egypt before a final decision is made. Britain and France probably would help out on some weapons.

## All-Alarm Fire at Klamath Controlled

Klamath Falls — (U.P.) — An all-alarm fire at the Evans building here was brought under control at 7:30 p.m. Saturday after firemen battled more than an hour to contain the blaze in the basement.

The building was occupied by a loan company, a furniture company and the United Fund office.

First estimates indicated considerable water and smoke damage was covered by insurance.

A fire at the same location took five lives in 1947. The building is owned by Joel Evans of Klamath Falls.

A medium-sized tank uses 1,915 pounds of chromium and 100 pounds of tin, all of which is imported.
