### Oil Industry Suggests Budget For Smog Study

San Francisco—(U.P.)—American oil industry scientists today recommended a \$188,000 budget for 1956-57 to study the causes of air pollution, especially in smog-ridden Los Angeles.

The recommendation, along with a report on progress in solving the mystery of eye-stinging smog, was made at the 35th annual meeting of the American Petroleum Institute.

The institute's technical advisory committee placed heavy emphasis on the situation in Los Angeles in its report to the smoke and fumes committee.

**Attack Proposed**  
A two-pronged attack was proposed:

1. A \$63,000 appropriation to set up in Los Angeles a newly developed instrument capable of identifying much smaller amounts of air impurities than has been possible up to now.

2. A \$10,000 appropriation to speed up study of a method of identifying the properties of smog by cooling the air. This machine would liquefy or freeze contaminants which then would be removed by traps or filters.

The committee asked an additional \$52,000 to continue work on the first instrument, known as the ultra-long-path infra-red spectrometer.

Developed at Franklin Institute, Philadelphia, the spectrometer so far has been used only in the laboratory to measure what happens when sunlight causes chemical reactions on impurities in the air.

**Reaction Shown**  
But it was reported to have shown how auto exhausts wastes from burning rubbish and by-products of industrial plants react with nitrogen oxides in the air during sunlight to form ozone.

Ozone, a "supercharged oxygen," is present 10 times more than normal during a smoggy day in Los Angeles, scientists said.

The committee recommended further study of causes of lowered visibility, eye irritation and plant damage during smog conditions.

The committee also asked for \$18,000 to help underwrite a Bureau of Mines project to analyze engine exhausts.

### Sherry Fong Takes Stand in Death Trial

Portland—(U.P.)—Sherry Fong went on trial today for the slaying of 16-year-old Diane Hank in the state's third attempt to convict her of the 1954 mystery death.

Multnomah County Circuit Judge Alfred P. Dobson, who overruled the conviction of Sherry and her husband, Wey Him Fong, several months ago, was to preside.

A second attempt to convict Mrs. Fong failed earlier this month when Judge Dobson declared a mistrial.
