

Council Authorizes Water Mains; Calls For Bids on Project

Ordinances calling for bids and authorizing construction of water mains in the recently annexed Laurelhurst addition were adopted by the Medford city council last night.

A six inch water main will be installed on Stevens st., from Oregon Terrace to Crater Lake ave., and four inch mains will be installed on Marie, Effie, Bessie and Pearl sts. between Saling ave. and Stevens st. A dead-end six inch main on Mary st. will be extended to Stevens st.

To Install Hydrants

In addition, seven fire hydrants will be installed providing the area with adequate water service and fire protection. Many residences in the area have no water facilities other than pumps, and several residents own temporary pipes, which will be eliminated.

The estimated cost per front foot to property owners is \$2.10. Property owners representing 52.3 per cent of the front footage signed petitions requesting the service, which was recommended by the water commission.

The council also adopted an ordinance amending present ordinances to permit installation of bicycle racks and bicycle parking on city street parking strips, subject to the approval of the county.

A request from St. Mary's school to install bicycle parking rack in the parking strip on Ivy st. near 11th st. was referred to City Manager Robert Duff and Public Works Director Vern Thorpe. A report of proposed specifications will be submitted to the council later for approval.

Recommend Action
Mayor Earl Miller recommended action on the request be postponed until next meeting to give residents living in the area an opportunity to present reasons for objecting. He pointed out that some residents object,

and he believed they should be heard.

A motion to delay action was defeated by the council 3-2, and the ordinance amending present ordinances to permit bicycle racks in parking zones was adopted 3-2.

Both Jimmy Dunlevy and Frank Dorigan favored the amendment, pointing out a bicycle rack will provide an orderly place where bicycles presently are being piled up in the parking zone. They pointed out also that limited ground space at the school makes parking strip of bicycles desirable.

An ordinance was adopted to conveying property back to William C. and Frank L. Earhart along Bear creek south of the city limits. The land was conveyed to the city in 1940 with provisions certain improvements would be made by WPA assistance. The WPA program ended shortly thereafter, and provisions were not carried out because the city had no finances for a flood control project.

Alley Vacated

Other ordinances adopted vacated an alley in the Cromwell addition, and accepting J. C. Compton company work on Hamilton st. and East Jackson st. paving projects.

The council continued hearings on annexation of California Pacific Utilities property on Groveland ave. and on Benton Smith and Odell Larson lots at Murray and Columbus ave. because titles have not been resolved.

The council instructed City Attorney Frank Farrell to prepare an ordinance calling for a hearing on a request from Mr. and Mrs. James S. Winslow, 349 Saling st., for a change of setback to construct a carport.

The planning commission recommendations were accepted by the council.
