

ANOTHER FIRST FOR WINNIE—Sir Winston Churchill (left) receives a silver Town Crier's bell from Winthrop Rockefeller of the new Williamsburg award at a banquet in London's Draper Hall. Churchill is the first recipient of the award, established by the trustees of colonial Williamsburg, Va. It includes \$10,000 in cash. The bell is inscribed with the purpose of the award: "To commemorate in outstanding contribution in our time to the struggle for men to live freely and self-respecting in a just society."

Rhodes Scholarships Go To 32 Americans

Swarthmore, Pa. — (U.P.) — Thirty-two men from 30 states and 23 colleges and universities have been awarded Rhodes scholarships for two years of study at Oxford university in England. Dr. Courtney Smith, president of Swarthmore college and American secretary of Rhodes Scholarships, said the winners named Sunday were active in student governments in their various colleges or distinguished themselves in varsity sports as well as being top scholars in their classes.

Those awarded scholarships included:

Arthur G. Siler, Orinda, Calif., Harvard university.

Edward M. Taylor, Elmont, Calif., Pomona college.

Gary B. Christiansen, Salt Lake City, Harvard, also University of Utah and U.S. Naval Academy.

Davis B. Bobrow, Tucson, Ariz., University of Chicago.

Russell McCormack, Walla Walla, Wash., Washington State college.

Paul Richards Burgess, Hyrum, Utah, Reed college.

Tuna Industry Intervention Hinted

San Diego, Calif. — (U.P.) — A prediction that the federal government will intervene in the West Coast tuna industry crisis was made by Rep. Robert Wilson (R-Calif.) when he addressed by amplified telephone a meeting of 400 wives of San Diego tuna fishermen.

According to Mrs. Laura Tocco chairman of the Tuna Fishermen's Wives Emergency Committee, imported Japanese frozen tuna have ruined the San Diego tuna industry.

"Our fishermen simply can't compete with the Japanese, who sell their fish for \$100 less a ton than our men can afford to sell for," she said.

The wives organized to conduct a campaign to get President Eisenhower to establish a quota on the frozen tuna imports.

Wilson told the wives that the "only solution is a quota and one which will have some teeth in it. However, we are going to have to share the market with other countries."

Mercury is the only metal that remains liquid at ordinary temperatures.

RAIN OR SHINE—President Eisenhower (right) and Postmaster General Arthur Summerfield are bundled up against the inclement weather as they trudge along the walk to Laurel Lodge at Camp David, Md. for the cabinet meeting. It snowed heavily as the President left the meeting for the motor trip back to his farm at Gettysburg. The road was wet but safe.

Damage To Plants From Smog Studied

Riverside, Calif. — (U.P.) — All agricultural areas of California are being surveyed to determine the extent of plant damage from smog.

University of California farm advisors throughout the state were supplied with tabulating cards on which to report possible effects of air pollution on various crops in their areas.

Absence of injury also is indicated on the cards to aid scientists in establishing the pattern of smog damage in the state. Color photographs of typical smog injury symptoms have been provided with the cards to aid the field men in recognizing damage.

The survey is being conducted by A. O. Paulus, extension specialist in plant diseases. The cards will be sent periodically to the University of California's Riverside campus for tabulation.

Meriden, Conn. — (U.P.) — A slightly angry driver appeared at police headquarters to pay a \$1 parking fine and handed Lt. Louis V. Aloia a \$100 bill. Aloia promptly counted out 99 singles in change.

Oregon May Lose Salk Vaccine, State Says

Portland — (U.P.) — Oregon

parents, warned that the state may lose part of its Salk polio vaccine supply, are sending their children for shots in increasing numbers, the State Board of Health reported yesterday.

The board said that some druggists now were re-ordering Salk vaccine from supply houses. Preliminary figures indicated that public acceptance may have doubled in the state from some 2500 to about 5000 shots a week.

The board had warned that unless response was better some of the supply would be taken to other states.

Forest Fire Energy Waste Linked to Bomb

Ann Arbor, Mich. — (U.P.) —

There's as much energy wasted in forest fires each year as would be released by the explosion of 250,000 medium atom bombs, according to a University of Michigan forestry professor, Kenneth P. Davis.

Davis, co-author of "Forest Fire Control and Use," explained that the energy equivalent of an A-bomb is released in 40 acres of burning brush, and 10,000,000 acres of forests burn each year.

Steps are being taken to cut down the loss, Davis said. Modern fire-fighting equipment is being used increasingly against the fires, and airplanes are supplementing watch towers in spotting them before they get out of control.

He said a modern power plow or tractor equipped with power spray nozzles, two-way radios and walkie-talkies does the work of 50 men in fighting forest fires.

"The United States traditionally has followed Europe in all other phases of forestry," he added, "but it is the world's acknowledged leader in fire control."

NOW... MORE OVEN SPACE IN LESS FLOOR SPACE!

Electric Model E-174 \$249.95
A LOVELIER KITCHEN!
Sculptured contour styling you'll be proud to see, proud to show. The lovely copper tone on the mantel adds richness to any kitchen decor. Full-width fluorescent lamp! Big storage drawer to conceal your pots.

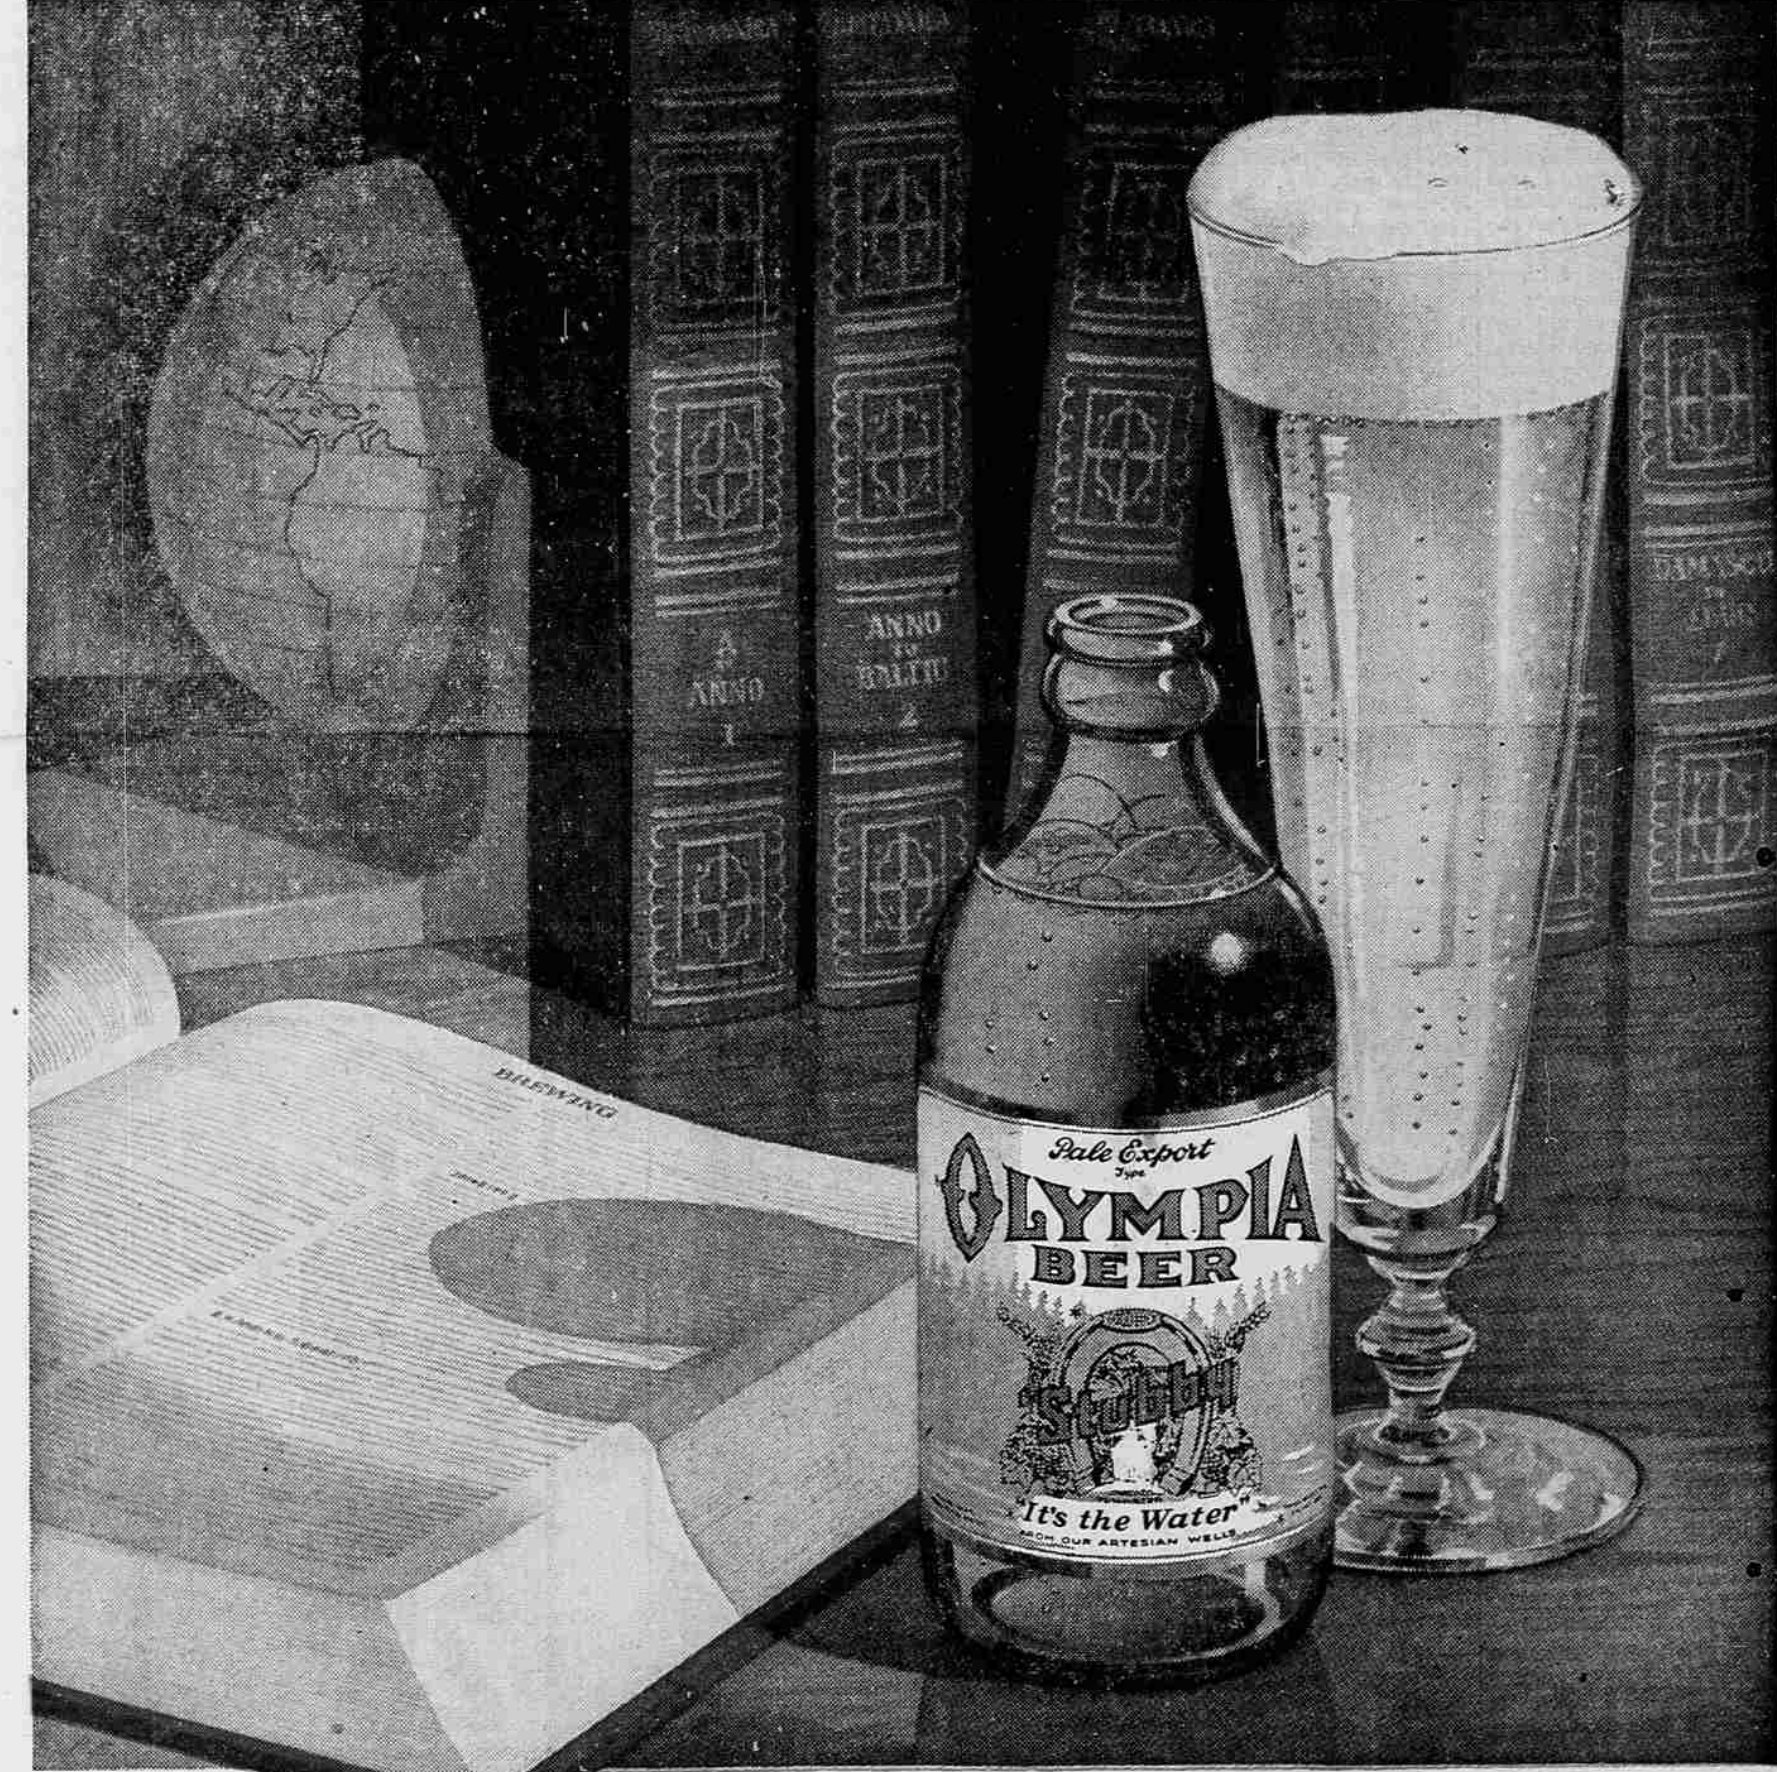

\$10⁵⁶ per Month
for a new
RCA Estate Space King
ELECTRIC RANGE

"Super Size" Oven is 24 inches wide, holds enough for 20 hearty eaters. Yet this range is only 30 inches wide. Radiant high broiler. Insulizer walls and Silicone heat-seal on doors keep kitchen cooler.
Cooks Automatically with the electric clock providing on-off control of oven and appliance outlet.
Easy to Clean with a 1-piece top. You get Disposable-Bowls, the handy, throw-away grease catchers!

Models to fit every kitchen, every budget

The answer is the same!

Thousands have asked us why "It's the Water"
Many have found the answer in the Encyclopaedia

Since 1896 we have been telling westerners about the rare water that flows cold and clear from our deep artesian wells — one of the world's few sources of naturally perfect brewing water. In years gone by, Olympia's Master Brewers attempted to duplicate the quality of Olympia Beer at other locations, using other waters. The results never satisfactorily approached the unchanging quality and the delightfully refreshing flavor you rely upon each time you have a glass of Olympia. That is why we confine the brewing of Olympia Beer to one plant at the site of our artesian wells, and why Olympia has won its reputation as a superb beer of consistent good taste.

Here is what the Encyclopaedia Britannica says about the importance of water in brewing:
"Beer on an average contains some 91% water. It is therefore not surprising that the character of the beer is to a large degree determined by the nature of the water used in its production. In fact, for many centuries in the past certain localities in Europe, such as Burton-on-Trent, Pilsen, Munich, Dortmund and others have enjoyed the reputation of producing ales and beers of distinctive character which could not be duplicated elsewhere. The secret, unrecognized for a long time, lay in the peculiar composition of their waters."

"It's the Water" that makes the difference

Visitors are always welcome to "One of America's Exceptional Breweries," Olympia Brewing Company, Olympia, Washington, U.S.A., 9:30 to 4:30 every day. *Oly*® 5-21

Shideler Granted Leave Of Absence From OSC
Portland — (U.P.) — The State Board of Higher Education has approved a leave of absence for Fred M. Shideler, head of the journalism department at Oregon State College, to accept an appointment as an administrative assistant to Gov. Paul Patterson. The leave is effective Jan. 1, 1956.

The U.S. Senate has rejected only one presidential cabinet nomination since the days of President Andrew Johnson and that was the nomination of Charles B. Warren for the attorney generalship by President Coolidge in 1925.
