On The Side

Gentle sleep!
Scatter thy drowsiest popples from above;
And in new dreams, not soon to vanish, bless
My senses with the sight of her I love.

—Horace Smith
Among the things I have never been able to understand, and of which I would welcome an explanation, is why parents give male infants first names definitely intended for females. This practice is more widespread than you think. For example, the records of just one city, Chicago, show boy babies there were given the following names: Nora, Rhea, Norma, Camille, Doris, Ethel and Emily. I don't know what the records of San Francisco reveal as to this situation, but I do know of a male infant there whose parents named him Cleopatra.

Asking
Queries from clients: Q—Are you familiar with a song titled "Ain't Got Much Money, Honey, But Ain't We Got Fun?" A—Title of song I believe you have in mind is "Ain't We Got Fun," by Dick Whiting. Was popular in early 1920s. . . Q—What are some mixed drinks that include coffee as an ingredient, but not whiskey? A—Cafe au Kirsch, Tom and Jerry, Coffee Grog, and Rum Mocha.

Sidelights
What job requires the most patience? How about that of selling shoes to women? I know of a shoe salesman who displayed and tried on 38 different pairs of shoes for a woman, and then she didn't buy anything. . . By the time you were 23, what had you accomplished? George Westinghouse fought four years in the Civil War and invented the air brake before he was 23.

Almost Confidential
Ever know anybody who married at 12? I know of a woman who married at that age. And so did her daughter. The mother's marriage was successful, but the daughter became a divorcee at 14. . . In Moscow there is a street named Shariokopodshipnikovskaya Ave. It means "Avenue of Ball Bearings." . . There are over 250 different brands of Scotch whisky but only nine brands of Irish whisky.

Horses and Women
If there is four inches difference between a woman's ankle and calf measurements, and seven inches difference between her calf and thigh measurements, she has a perfect leg. On this all authorities on feminine figures are agreed. An example of the measurements of a woman with a perfect leg are ankle, 8 1/2 inches; calf, 12 1/2 inches and thigh 19 1/2 inches.

Please Note
"No unhappily married man can succeed in life if he stays married," observes a matrimonial expert. That is not 100 per cent correct. Abraham Lincoln was unhappily married. . . How do you sleep? On your left side or right side? How many pillows do you use? Flat on the back, with no pillows used is said to be the healthiest and most rest producing way to sleep.

Asides
Aleta Morrison, who is 5 feet 8, has legs measuring 41 inches. That leg measurement sounds like a record for one of her height. She should make a marvelous cancan dancer. . . It was Churton Collins who said, "never trust a man who speaks well of everybody."

Briefly
Shakespeare said pity was the shortest way to a woman's heart but Josh Billings observed, "the shortest way to a woman's heart is to praise her hat" . . . Speaking of longshots, Miss J. V. Couzens of Detroit invested \$100 in Henry Ford's automobile company at the start and later sold her share for \$355,000.

Passing By

Federal Savings, Loan Assets Rise

An increase of more than \$1,300,000 in assets of the Jackson County Federal Savings and Loan association since Dec. 31, 1954, was reported yesterday by President W. J. Warner.

The increase, together with increase in earnings, resulted in payment to investors of an extra one per cent dividend per annum for the past six months, in addition to the current rate of three per cent.

Dividends paid between June 30 and Dec. 31 totaled \$164,395.24, making a total of \$281,395.24 paid in dividends last year. Warner reported total assets for the association Dec. 31 as \$10,353,479.81, and said the increase largely was due to a rise of more than \$1,000,000 in mortgage loans during the year.

John Pleisch, secretary-manager, said the increase confirms predictions that home building in Jackson county is increasing although there appears to be a need for more new homes, which are held back due to water and sewer shortages.
