New KYJC Series Is Planned For Parents-Teachers

A new radio program series of special interest to parents and teachers will begin tomorrow, January 23 on radio station KYJC at 2 p.m. The "Study Group of the Air" will feature discussions by local people interested in children of pre-school to high school age.

The Jackson County Public Health association's mental health committee is sponsoring the weekly 15-minute program. Discussions will be based on articles in the national Parent-Teacher magazines under the department, "For a Lifetime of Mental Health." This same series of articles is used in PTA study groups in Jackson county.

Tomorrow's program will be concerned with the pre-school age child, with Mrs. Cleo Kent of the Public Health department in charge. Mrs. Kent, a public health nurse, will discuss "Why Children Annoy Us" with Mrs. Thomas Shearin of Eagle Point, a nurse and mother of three children. Their topics will include the stubborn child, and parents' reactions and feelings toward their children.

On succeeding programs elementary school children and adolescents will be considered. Miss Mary Vandenberg of the Child Guidance clinic will be in charge of the programs on school-age children. Southern Oregon college, under the direction of Dr. John McAuley, will present the group of programs about adolescents and their problems.

The three subjects, pre-school children, school age children, and adolescents will be aired each Monday in rotation. It is thought parents will find the programs interesting and informative.

The same topics are also discussed weekly in another series now in progress on station KMED at 4:30 p.m. every Monday. Staff members of the Oregon Congress of Parents and Teachers, educators and doctors are the participants in this series.

KIDS IS THE CRAZIEST PEOPLE!

Kids have the goldarnest amount of energy. They play hard...learn fast...sleep soundly...grow like weeds.

How do they do it? They've got the advantage of being more recent models, of course—newer body styles and all that. But a large part of the answer lies in the fuel they run around on.

Milk's their petrol, and it's pretty hard to beat. Loaded with VCP (vitamins, calcium, protein), milk gives them mileage like you haven't gotten since you were a kid.

Funny thing about this fuel—it works fine in older models, too. Tried it recently?
