PACER 21 TELEVISION

G. E. Famous Aluminized Tube

These models have the famous aluminized picture tube which General Electric pioneered and introduced in 1947... G.E. HAS SOLD MORE SETS WITH ALUMINIZED TUBES THAN ALL OTHER MAKES COMBINED!.. In this tube a special aluminum mirror coated on the inside of the glass makes the picture up to 100% brighter. Also, a black dye in the tube face acts as a filter to reduce haze and give clear, sharper pictures.

G. E. Black - Tinted Safety Glass

General Electric was the first TV manufacturer to introduce black-tinted safety glass which makes blacker blacks, deepens all the in-between picture tones and materially reduces glare.

- Genuine mahogany veneers
- Aluminized picture tube—dark safety glass
- full size picture tube—252 square inches
- Horizontal chassis—front controls
- Auto transformer power supply
- Shielded tuner—temperature compensated to eliminate drift
- 41-megacycle I.F.
- Retrace line suppression
- Dynapower speaker with moisture-proof aluminum voice Coil
