Boiling Beef <sup>U.S.D.A. Choice Beef — From The Same Beef As Our Steak</sup> lb. 15<sup>c</sup>

## High Court Hears Arguments on Power Surcharge

Salem —(U.P.)— The Supreme Court heard arguments in a case yesterday testing whether Pacific Power and Light Company should refund a 20 per cent surcharge imposed on consumers in the winter of 1952-53.

No decision has been reached in the case which was first filed against Mountain States Power and Light Company. Since then Mountain States has merged with Pacific Power.

### Affects Other Cases

Two other cases now pending against Portland General Electric and PP&L which involve about \$4,000,000 will be affected by the decision.

Representing the appellant and asking a refund for all Mountain States consumers was Portland Attorney Walter H. Evans. He claimed the surcharges were over-charges which were illegal. Previously he was turned down in Lane county Circuit Court.

Francis Hills, also of Portland, represented Pacific Power and Light. He argued that the Oregon Public Utilities Commission had approved the surcharges in 1951 when power companies had to switch to more expensive steam generation due to a water shortage.

### Not Legal Procedure

Evans said, however, that the letter from the PUC granting permission for the surcharge was not legal procedure because the company filed no new rate schedule and held no hearings.

An interested observer was State Sen. Monroe Sweetland of Milwaukie. He has announced that the power issue will be part of his campaign as the Democratic nominee for secretary of state.

## Crew of Wrecked Train May Be Asked To Take Lie Detector Tests

Los Angeles — (U.P.) — The district attorney's office said today it will try to give lie detector tests to the crew of a Santa Fe train to determine what caused it to upset, killing 29 persons.

The train's engineer said he caused the crash by backing out. The fireman, Homer Smith, 42, refused Wednesday to see Chief Dep. District Attorney Adolph Alexander who sought

his approval for the test. Conductor George R. Spickard declined to take the test "on advice of counsel," Alexander said. **Blackout Told**

Engineer Frank Parrish accepted responsibility for the accident Sunday. He said he blacked out before Sunday's derailment and thought he was seeing orange groves in the railroad yard. Dr. Marcus Graham, county jail physician, examined Parrish Wednesday.

"Parrish appeared to be perfectly rational and well-oriented," Graham said. "I am convinced there is no psychiatric problem but a physical one could be involved. It is going to be quite a job to figure out exactly what happened."

Graham said it would take several days of tests to determine if there was a functional or organic disorder which might have caused Parrish to imagine seeing orange groves in the railroad yard. The engineer said he saw the groves—none of which are within miles of the accident scene—just before the two-car diesel train overturned on a curve while traveling 71 miles per hour.

**Believes Fireman**  
Smith, the fireman, has insisted he yelled to Parrish to pull the emergency brake but nothing happened when he did so. Graham said that Parrish was confused about putting on the brake "but is willing to believe what his fireman has said."

## Around Hollywood

By ALINE MOSBY  
United Press Correspondent

Hollywood usually laughs at its silent pictures but one great master of the screen, producer-director Cecil B. DeMille, proposes movie-town dust off its classics and bring them back to the theaters.

All the younger generation knows of the silents are the misleading satires on TV or in the movies showing hammy characters moving jerkily about. It took seasoned old-timer DeMille to slap Hollywood's wrist for ignoring its silent classics in his speech when he was given the Screen Producers Guild Milestone award at a banquet this week.

### Consideration Deserved

"The great classics of the screen deserve better treatment," he told the younger producers. "They remain not second rate, but first rate specimens of the motion picture art."

DeMille said the classics should be presented to the public on special projecting machines, running at 60 feet a minute instead of the present 90 that makes great artists jump about

like Woody Woodpecker. "This industry will not come of age until it makes a determined effort to keep its own great classics alive—and to present them regularly to the public in a manner worthy of their merit," DeMille said. "I have wished many times we and the public were more aware of the dramatic riches we have stored in our vaults."

### Complaint Voiced

He complained because such films are called "reissues." "We do not say the next time you go to the Louvre you see a reissue of the Mona Lisa," he explained.

The celebrities burst into applause when DeMille credited the late silent pioneer director D. W. Griffith as being "the teacher of us all."

He also lashed at producers who make films only for money, use "vice" plots or "yield to the ridiculous demands of pressure (censor) groups."

## Woman Determined To Sell To Negro; Cross Set Afire

Dallas, Tex. — (U.P.) — A cross was burned last night on the lawn of Dr. Cosette F. Newton's home which has been offered for sale to a Negro.

The 6-foot high cross, wrapped in gasoline-soaked rags and set afire, was doused with water by the fire department before any damage was done to the home or to a backyard pavilion ship which set off the bitter neighborhood feud.

Dr. Newton offered to sell her fashionable Highland Park home to a Negro after losing a battle fought to the Texas Supreme Court to keep her ship which neighbors called an eyesore.

**Vandals Suspected**  
Police Chief W. H. Naylor said the cross burning may have been the work of vandals.

But Dr. Newton said she believed the burning was done by one of her embattled neighbors. She said she feared the incident may be just a preliminary to burning down of the house, the insurance for which has been cancelled.

Dr. Newton said she has had several offers for the \$40,000 to \$60,000 house, including one from a Baptist minister. She said she will sell the property to a Negro even if the house is destroyed.

## George Lends Backing To Rigid Supports

Washington — (U.P.) — Sen. Walter F. George today put his powerful support behind a congressional drive to restore rigid farm price supports on basic crops.

George's statement followed predictions by Democratic and Republican members of the Senate Agriculture committee that a rigid support bill will be sent to the Senate floor.

The Georgia Democrat said the nation's farmers need immediate financial relief. He expressed confidence that Congress will provide it by voting for a return to rigid price supports.

The Eisenhower administration has proposed a farm program featuring a soil bank to aid the price-squeezed farmer. But the administration wants to keep price supports flexible.

George said the soil bank "has some good features," but its benefits would be mostly long-range.

## Douglas McKay's Wife Has Emergency Surgery

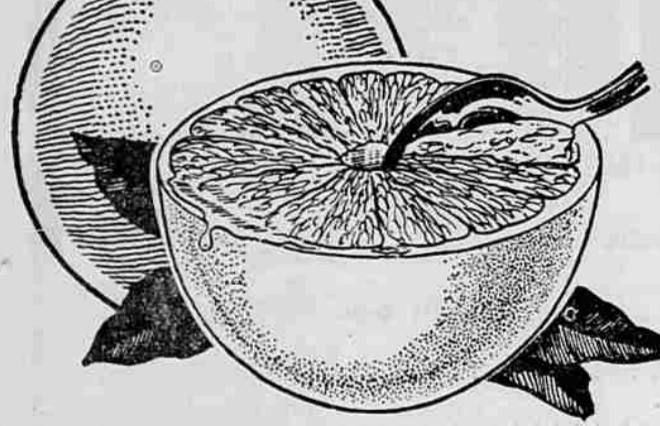

Washington — (U.P.) — Mrs. Douglas McKay, wife of the secretary of interior, was recovering in Walter Reed hospital here today, after undergoing an emergency appendectomy operation Saturday.

Secretary McKay was away from the capitol on a speaking engagement in Wyoming when Mrs. McKay was stricken.

**ASTORIAN NAMED**  
Washington — (U.P.) — President Eisenhower today nominated Neil J. Morfitt to be postmaster at Astoria, Ore.
