Neuberger Proposes Campaign Financing

Washington—(U.P.)—Sen. Richard L. Neuberger has proposed that the government finance federal election campaigns to eliminate the "evil" influence of large private contributions. The Oregon Democrat made the proposal in a bill prepared for introduction today. He called it "the Teddy Roosevelt bill" because, he said, it is based on a proposal originally advanced

by President Theodore Roosevelt in 1907. "The main purpose of my bill," he said, "is to bring about the substitution of federal funds, with no political strings attached, for the present evil of large campaign contributions." He said the controversy over the \$2500 contribution offered to Sen. Francis Case (R-S.D.) by an oil lobbyist during the gas bill debate has focussed attention on the problem.

Are you inclined to blame the jockey when your horse loses? A feminine turf enthusiast once wrote a bitter letter to Jockey Silvo Coucci complaining about a ride he had given a horse she had bet on. Much to her surprise

she received this reply, "Dear Madam: I rode the horse you mention to the best of my ability. As the chart will show, I got him off well and had him in a contending position at the far turn but when I called on him to make his move he failed to respond. This often happens in the class of horses to which this one belongs. I hope your future selections will meet with better fortune. Yours sincerely—Silvo Coucci."

Briefly

On restaurant orders of bacon and eggs, only two eggs are usually included. Should be three eggs. That is the custom in Ireland where the combining of bacon and eggs originated. . . . If you never competed at a picnic or outing in a married vs. single men baseball game, a three-legged race or a greased pig chase, how can you rightfully call yourself a "young oldtimer"?
