Higher Tariff Duty Ordered on Tuna

Washington — (U.P.) — President Eisenhower Saturday ordered a higher tariff duty on excess imports of tuna canned in brine, effective April 14.

The White House said the President's proclamation provides that the 12 1/2 per cent duty will be doubled, to 25 per cent, when imports exceed one-fifth of the previous year's U.S. pack of all varieties of tuna.

The higher duty would remain in effect only for the remainder of a year.

Since one-quarter of this year already is past, the 1936 base percentage of imports will be 15 instead of 20 per cent. This means the higher tariff will be imposed when and if imports, after April 14 exceed 15 per cent of last year's domestic pack.

West Coast fishermen long have sought the tariff on grounds tuna imports were crowding them out of the domestic market.

The White House said Mr. Eisenhower issued the proclamation under the General Agreement on Tariffs and Trade (GATT) in which the United States reserved the right to increase tariffs on tuna canned in brine.
