### Programs Announced for San Francisco Ballet

Programs for the two valley performances of the San Francisco ballet were announced last week. The first appearance of the troupe will be Thursday, April 12 at Ashland High school gymnasium and the second will be in Medford, Friday, April 13 at Hedrick Junior High school auditorium. The performances both days will begin at 8:30 p.m.

The Medford program Friday night will include "A Masque of Beauty and the Shepherd," with music by C. W. von Gluck and choreography by Lew Christensen. The story of this ballet has a mythical background and concerns the goddesses, Hera, Athena, and Aphrodite, who disputed among themselves a golden apple. Journeying to Mount Ida they came upon a shepherd prince, Paris, and offered him bribes. Aphrodite's bribe was the offering of the most beautiful mortal, Helen, accepted by Paris who awarded Aphrodite the golden apple.

The second presentation on the Medford program will be "Concerto Barocco," with music by J. S. Bach and choreography by George Balanchine. The music composition to which the dance is done is "Concerto for Two Violins in D Minor." This is an abstract dance and has no narrative content. The severity and discipline of the dancing respond entirely to the development of the music which the troupe will do in the original concept of this

ballet as a study in baroque form.

The third number on the Medford program will be "Con Amore," with music by Gioacchino Rossini with choreography by Lew Christensen. The story concerns 19th century romancing.

The Ashland program will include "Con Amore," but the other two selections to be given there will be entirely different from the others given here. They will be "The Tarot," also an abstract ballet, and "Jinx," a dramatic which deals with superstitions of a circus troupe. "Jinx" was first presented in 1942 with Miss Janet Reed, former Medford girl in the lead role, with the Dance Players at the National theater in New York. Tickets are on sale in Medford at Swem's Book and Gift shop, Hudson's pharmacy and Purucker's Piano house.

The first graphic demonstration of sound waves was made in 1857.
